## ISQI CTFL-AcT Reliable Cram Materials & Latest CTFL-AcT Exam Preparation

As is known to us, the high pass rate is a reflection of the high quality of CTFL-AcT study torrent. There are more than 98 percent that passed their exam, and these people both used our CTFL-AcT test torrent. There is no doubt that our CTFL-AcT guide torrent has a higher pass rate than other study materials. We deeply know that the high pass rate is so important for all people, so we have been trying our best to improve our pass rate all the time. Now our pass rate has reached 99 percent. If you choose our CTFL-AcT study torrent as your study tool and learn it carefully,

## ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q59-Q64):

### NEW QUESTION # 59

Which one of the following sentences describes BEST a major advantage when business analysts and testers review the acceptance criteria together?

- A. The review of acceptance criteria helps to verify that acceptance test cases cover business processes, business rules and business risks.
- **B. A shared vision between the business analyst and the tester on acceptance criteria facilitates the design of acceptance test cases.**
- C. A joint review ensures that non-functional quality criteria are taken into account.
- D. The review of acceptance criteria is a good practice to improve the quality of test reports.

**Answer: B**

Explanation:

Collaboration between business analysts and testers is essential in defining and reviewing acceptance criteria.

When both roles work together, they ensure the criteria are not only aligned with business goals but also testable and clearly specified.

Option A is correct because shared understanding of acceptance criteria allows testers to design test cases that truly validate business expectations, reducing misinterpretations and increasing confidence in the product.

Other options:

B is valid but not the best - non-functional requirements are important but often handled separately.

C is partially correct but assumes acceptance test cases already exist, whereas the review often happens earlier in the process.

D focuses on test reporting, which is downstream from criteria definition and test case design.

A). A shared vision between the business analyst and the tester on acceptance criteria facilitates the design of acceptance test cases.

#### NEW QUESTION # 60

Suppose you are an acceptance tester in a project developing a medical scanner. The scanner is meant to be used in a hospital and should allow the examination of at least 50 patients per day. Which one of the following perspectives is MOST affected, if the produce does not meet the specified performance requirements?

- A. Functional perspective
- B. Technical perspective
- C. User perspective
- **D. Business perspective**

**Answer: D**

Explanation:

The medical scanner must be able to examine at least 50 patients per day. This requirement directly impacts hospital operations and service efficiency. If the scanner fails to meet performance requirements, such as processing speed or availability, it will affect the hospital's ability to deliver services to patients - impacting schedules, patient flow, and ultimately the business goals of the hospital.

Option C is correct because it reflects the consequences of performance shortfalls from a business outcome perspective: failure to meet this requirement may result in financial loss, compliance issues, or customer dissatisfaction.

Other options:

A (User perspective) is involved, but the impact here is primarily operational/business.

B (Functional perspective) refers to whether the scanner has the correct features, not performance.

D (Technical perspective) is also relevant, but the business impact (e.g., service delivery) takes precedence in this case.

#### NEW QUESTION # 61

How does ISTQB CTFL test activities relate to the IQBBA FL business analysis and requirements engineering activities?

- A. Business analysts and tester have to decide, whether they follow the IQBBA or ISTQB lifecycle processes, because they exclude each other.
- B. Business analysts who follow the IQBBA requirements engineering process will not be involved in designing test cases.
- **C. Test analysis and test design activities may result in changes of acceptance criteria.**
- D. The IQBBA solution evaluation phase precedes the ISTQB test implementation and test execution activities.

**Answer: C**

Explanation:

The relationship between testing and requirements engineering is iterative and collaborative. According to ISTQB CTFL and IQBBA FL syllabi, test activities such as test analysis and test design involve reviewing and interpreting acceptance criteria to derive test conditions and test cases. During this process, testers may identify ambiguities, conflicts, or missing acceptance conditions. These insights often result in feedback to business analysts or stakeholders, leading to refinement or changes in the acceptance criteria to ensure clarity, completeness, and testability.

This iterative feedback loop is essential in both Agile and traditional lifecycles. Therefore, option D is correct.

It reflects the dynamic interaction between requirements and test design, where improving one often improves the other.

Other options are incorrect:

Option A falsely assumes business analysts don't engage in test design, while in practice, they collaborate closely with testers.

Option B incorrectly suggests that IQBBA and ISTQB lifecycles are mutually exclusive. In fact, they complement each other.

Option C is incorrect in sequencing. In reality, solution evaluation (IQBBA) follows test execution, not precedes it.

Exact Reference - ISTQB CTFL Acceptance Testing Syllabus (Section 1.3.2):

"During test analysis, inconsistencies or missing information in the acceptance criteria can be identified and addressed through collaboration with business analysts."

#### NEW QUESTION # 62

Given the following attributes:

- i. commercializability
- ii. functional suitability
- iii. viability
- iv. reliability
- v. security
- vi. cognitive ability
- vii. maintainability

Which one of the following answers contains quality attributes that are MOST relevant for acceptance testing?

- A. ii, v and vii
- B. iii, iv and v
- C. ii, v and vi
- D. i, ii and vi

**Answer: D**

#### NEW QUESTION # 63

Which one of the following test design techniques fits accepting testing purposes BEST?

- A. input validation
- B. static code analysis
- C. equivalence partitioning
- D. defect-based test design

**Answer: C**

#### NEW QUESTION # 64

.....

When looking for a job, of course, a lot of companies what the personnel managers will ask applicants that have you get the CTFL-AcT certification to prove their abilities, therefore, we need to use other ways to testify our knowledge we get when we study at college, such as get the CTFL-AcT Test Prep to obtained the qualification certificate to show their own all aspects of the comprehensive abilities, and the CTFL-AcT exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.
