

Oracle 1Z0-1072-25 Latest Questions | Exam Dumps 1Z0-1072-25 Pdf

P.S. Free & New 1Z0-1072-25 dumps are available on Google Drive shared by Pass4Test: <https://drive.google.com/open?id=1tM1I-3GMIJkWH1fh5QaVTmP6IM4qIUR>

This Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice exam software is easily accessible on all Windows laptops and computers. You do not require an active internet connection after installation of the Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) practice exam software. Repetitive attempts of Oracle Cloud Infrastructure 2025 Architect Associate (1Z0-1072-25) exam dumps boosts confidence and provide familiarity with the 1Z0-1072-25 actual exam format.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	- Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block - File - Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.
Topic 2	Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 3	- Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN - FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.

Topic 4	• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources

First-grade 1Z0-1072-25 Learning Engine: Oracle Cloud Infrastructure 2025 Architect Associate Offer You Amazing Exam Questions - Pass4Test

We can produce the best 1Z0-1072-25 exam prep and can get so much praise in the international market. On the one hand, the software version can simulate the real examination for you and you can download our 1Z0-1072-25 study materials. On the other hand, you can finish practicing all the contents in our 1Z0-1072-25 practice materials within 20 to 30 hours. What's more, during the whole year after purchasing, you will get the latest version of our study materials for free. You can see it is clear that there are only benefits for you to buy our 1Z0-1072-25 learning guide, just have a try right!

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q10-Q15):

NEW QUESTION # 10

What is the primary purpose of the Web Application Acceleration service offered by Oracle Cloud Infrastructure (OCI)?

- A. Improving the reliability of layer 7 HTTP load balancers
- B. Monitoring and analyzing HTTP traffic patterns
- C. Encrypting HTTP traffic
- **D. Speeding up traffic on layer 7 HTTP load balancers**

Answer: D

Explanation:

The primary purpose of the Web Application Acceleration service offered by Oracle Cloud Infrastructure (OCI) is to speed up traffic on layer 7 HTTP load balancers. This service optimizes the delivery of web applications by reducing latency and improving response times, making it ideal for enhancing user experience on web applications.

Functionality: The service utilizes caching, compression, and other acceleration techniques to ensure that HTTP/S traffic is delivered efficiently.

NEW QUESTION # 11

Which is NOT a necessary step to complete this setup for instance principals?

- A. Create a policy granting permissions to the dynamic group to access services in your compartment or tenancy.
- **B. Generate Auth Tokens to enable instances in the dynamic group to authenticate with APIs.**
- C. Create a dynamic group with matching rules to specify which instances can make API calls against services.
- D. Deploy the application and the SDK to all the instances that belong to the dynamic group.

Answer: B

Explanation:

Instance principals in OCI allow compute instances to directly make API calls against OCI services without requiring a user account. To set up instance principals, the following steps are necessary:

- A. Deploy the application and SDK: The application running on the instances must use the OCI SDK or CLI to make API calls.
- B. Create a dynamic group: Define a dynamic group with matching rules to identify which instances can use the API permissions.
- C. Create a policy: Write an IAM policy that grants the dynamic group the necessary permissions to access services.

Option D is NOT necessary because instances in a dynamic group use instance principals to authenticate and do not require Auth Tokens, which are used for user authentication with APIs.

Oracle Cloud Infrastructure Documentation: Using Instance Principals

NEW QUESTION # 12

Which IAM Identity Domain type should you create for a full-featured Identity-as-a-Service (IDaaS) solution?

- A. Premium
- B. Free
- C. Oracle Apps Premium
- D. External User

Answer: A

Explanation:

In Oracle Cloud Infrastructure (OCI), when you need a full-featured Identity-as-a-Service (IDaaS) solution, the appropriate Identity Domain type to create is Premium.

Premium Identity Domain: This option provides a comprehensive set of identity and access management (IAM) capabilities, including advanced security features, identity governance, and support for enterprise-grade integrations. It supports managing user identities, multifactor authentication, and various other identity services required for a robust IDaaS solution.

Other Options:

External User: This is a limited domain type typically used for managing users who only need access to specific external services.

Free: This domain type offers limited features and is not intended for full-featured enterprise IAM requirements.

Oracle Apps Premium: This is tailored for integrating with Oracle applications but does not offer the broad capabilities of the Premium option.

Relevant OCI Documentation:

Oracle Identity Domains Overview

This documentation explains the various identity domain types and their use cases within OCI.

NEW QUESTION # 13

Which TWO options will accomplish a fully redundant connection from an on-premises data center to a Virtual Cloud Network (VCN) in the us-ashburn-1 region?

- A. Configure one FastConnect virtual circuit to the us-ashburn-1 region and the second FastConnect virtual circuit to the us-phoenix-1 region.
- B. Configure two FastConnect virtual circuits to the us-ashburn-1 region and terminate them in diverse hardware on-premises.
- C. Configure one FastConnect virtual circuit to the us-ashburn-1 region and a Site-to-Site VPN to the us-ashburn-1 region.
- D. Configure a Site-to-Site VPN from a single on-premises CPE.

Answer: B,C

Explanation:

For a fully redundant connection from an on-premises data center to a VCN in the OCI us-ashburn-1 region, it is important to ensure high availability and fault tolerance. Here's how each option contributes to redundancy:

Option B: Two FastConnect Virtual Circuits:

FastConnect provides a dedicated, private connection with higher bandwidth and more consistent performance compared to a VPN. To achieve redundancy, you can configure two FastConnect circuits in the same region (us-ashburn-1), each terminated on diverse hardware on-premises. This setup ensures that even if one circuit or its associated hardware fails, the other circuit can maintain the connection. This ensures no single point of failure in the connectivity to OCI. Thus, option B is correct.

Option D: FastConnect and Site-to-Site VPN:

Another approach to redundancy is to have a mix of connection types. By setting up one FastConnect circuit and one Site-to-Site VPN, both terminating in the same region (us-ashburn-1), you create a diverse connection path. If the FastConnect connection fails, traffic can automatically route through the VPN connection, maintaining connectivity. This setup adds an extra layer of redundancy, making option D correct as well.

Incorrect Options:

Option A: Only configuring a Site-to-Site VPN from a single on-premises CPE does not provide redundancy because it involves just one connection path. If that connection or the CPE fails, there would be no fallback.

Option C: Configuring FastConnect circuits to different regions (us-ashburn-1 and us-phoenix-1) does not provide redundancy within a single region but rather across regions, which is not required for regional redundancy.

Relevant OCI Documentation:

OCI FastConnect Overview

Using Site-to-Site VPN and FastConnect for Redundancy

These references offer more detailed information on setting up redundant connections and the benefits of each connection type within OCI.

NEW QUESTION # 14

Which TWO statements are true about performing a multipart upload using the Multipart Upload API?

- A. You can keep adding parts as long as the total number is less than 10,000.
- B. Each part can be as large as 50 GiB.
- C. You do not need to split the object into parts.
- D. You do not have to commit the upload after uploading all parts.

Answer: A,B

Explanation:

When performing a multipart upload using the Multipart Upload API in Oracle Cloud Infrastructure (OCI) Object Storage, the following points are true:

C . Each part can be as large as 50 GiB: OCI allows each part of a multipart upload to be up to 50 GiB in size. This enables the efficient uploading of large objects in smaller, manageable parts.

D . You can keep adding parts as long as the total number is less than 10,000: The Multipart Upload API supports up to 10,000 parts for a single object. This allows the upload of very large objects by dividing them into multiple parts.

Incorrect Statements:

A . After uploading all parts, you must commit the upload to finalize the multipart upload and combine all parts into a single object.

B . The object must be split into parts before uploading when using the Multipart Upload API.

Oracle Cloud Infrastructure Documentation: Multipart Uploads

NEW QUESTION # 15

.....

We provide free update to the clients within one year. The clients can get more 1Z0-1072-25 study materials to learn and understand the latest industry trend. We boost the specialized expert team to take charge for the update of 1Z0-1072-25 study materials timely and periodically. They refer to the excellent published authors' thesis and the latest emerging knowledge points among the industry to update our 1Z0-1072-25 Study Materials. After one year, the clients can enjoy 50 percent discounts and the old clients enjoy some certain discounts when purchasing. So the clients can enjoy more benefits after they buy our 1Z0-1072-25 study materials.
