## Certification 1z0-1077-25 Sample Questions & 1z0-1077-25 Test Topics Pdf

We keep a close watch at the most advanced social views about the knowledge of the test Oracle certification. Our experts will renovate the test bank with the latest 1z0-1077-25 study materials and compile the latest knowledge and information into the questions and answers. In the answers, our experts will provide the authorized verification and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times. All we do is to integrate the most advanced views into our 1z0-1077-25 Study Materials.

## Oracle Order Management Cloud Order to Cash 2025Implementation Professional Sample Questions (Q143-Q148):

### NEW QUESTION # 143

Order Management utilizes a Change Management function to determine how updates to the sales order are executed through the fulfillment lines. To drive this function, Change Management Attributes can be specified on an Orchestration Process Definition. The Change Mode setting determines how often a snapshot of the process state is taken.

Which option is not a valid Change Mode setting?

- A. Simple
- B. Staged
- C. Advanced
- D. None

**Answer: B**

#### NEW QUESTION # 144

You are in the process of setting up a constraint that prohibits update to an extensible flexfield in a fulfillment line if Ship From Warehouse is X and the fulfillment line is booked. You are able to see the extensible flexfield on the "Manage Constraint Entities" page but not on the "Manage Processing Constraints" page.

What could be the reason?

- A. The "generate packages" program was not submitted.
- B. The "Publish extensible flexfield" process was not run.
- C. The extensible flexfield is not enabled.
- **D. A "Record Set" needs to be created for the extensible flexfield to be visible on the "Manage Processing Constraints" page.**

**Answer: D**

Explanation:

A record set is a group of records that are bound by common attribute values for the purpose of constraint evaluation. You can define conditions and specify a record set to be validated for a given condition as defined by the validation template.

#### NEW QUESTION # 145

You import an item-based model structure into the Configurator Modeling Environment, but realize that the minimum for one of your component attributes is incorrectly assigned.

What should you do, prior to releasing, to resolve this issue?

- A. You cannot change the item's user-defined attributes.
- B. Make the changes in the Product Hub or the Configurator Modeling Environment, All the changes are automatically reflected in the other area (that is, changes in the Configurator Modeling Environment will show in the Product Hub and vice versa).
- C. After the item-based model structure is imported, you must wait until after it is released to make the changes.
- **D. Make the changes in the Configurator Modeling Environment on the Item Attributes tab of the model's details.**
- E. Make the changes in the Product Hub and refresh the snapshot for the item-based model structure,

**Answer: D**

Explanation:

Make the changes in the Configurator Modeling Environment on the Item Attributes tab of the model's details.

You can make the changes in the Configurator Modeling Environment on the Item Attributes tab of the model's details, prior to releasing, to resolve the issue of incorrect minimum for one of your component attributes.

Item attributes are user-defined attributes that you can add to an item-based model or its components to capture additional information or to control the configuration process<sup>1</sup>. You can modify the item attributes in the Configurator Modeling Environment after importing the item-based model structure from the Product Hub<sup>2</sup>. You can change the minimum value of the component attribute on the Item Attributes tab of the model's details<sup>3</sup>.

:

Item Attributes

Import Item-Based Models into Configurator

Modify Item Attributes

#### NEW QUESTION # 146

Your company has a requirement to transform sales orders imported from a legacy system into cloud.

Which Oracle Business Rule component determines the specific rule that will be used to transform the imported orders?

- **A. Rule Conditions**
- B. Rule Dictionary
- C. Rule Actions
- D. Facts

**Answer: A**

Explanation:

Rule conditions are the Oracle Business Rule component that determines the specific rule that will be used to transform the imported orders. Oracle Business Rules are a set of logic statements that define the behavior of an application or a process, such as order transformation, order orchestration, or order approval<sup>1</sup>. A rule consists of two parts: a condition and an action. A rule condition is a statement that evaluates to true or false based on the input data, such as order attributes, order lines, or order status. A rule action is a statement that performs a specific task or operation when the rule condition is true, such as updating order attributes, creating order lines, or changing order status<sup>2</sup>. You can use the Manage Order Transformation Rules task to define the rule conditions and actions for transforming the imported orders from a legacy system into Oracle Order Management Cloud<sup>3</sup>.

### NEW QUESTION # 147

Which reporting tool enables you to create ad hoc reports in Excel, Word, or PowerPoint by using BI subject areas?

- A. BI Answers
- **B. SmartView integration**
- C. eText report layout templates
- D. BI Composer

**Answer: B**

Explanation:

SmartView integration is a reporting tool that enables you to create ad hoc reports in Excel, Word, or PowerPoint by using BI subject areas. BI subject areas are predefined data sets that contain the business metrics and attributes that you can use to create reports and analyses. SmartView integration allows you to access the BI subject areas from within the Microsoft Office applications, and use the familiar features and functions of those applications to create and format your reports<sup>1</sup>.
