Oracle 1z0-1080-25 Exam Simulations | 1z0-1080-25 Exam Labs
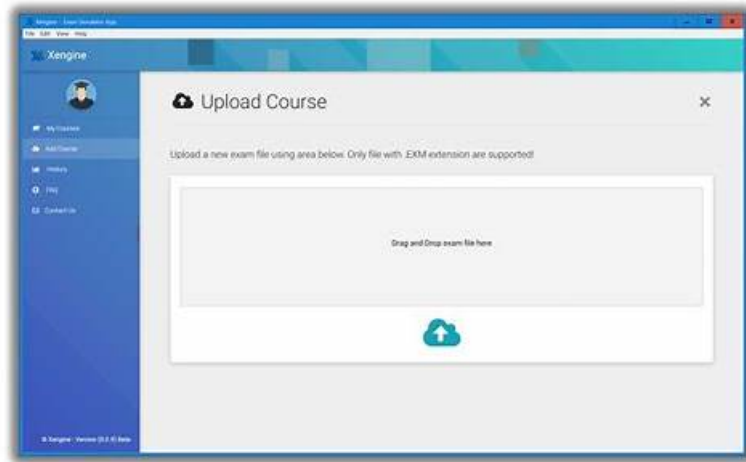

The Oracle Planning 2025 Implementation Professional (1z0-1080-25) Dumps PDF is the most convenient form of Oracle Planning 2025 Implementation Professional (1z0-1080-25) preparation material. It is a collection of actual Oracle 1z0-1080-25 exam questions. So you will have real Oracle Planning 2025 Implementation Professional (1z0-1080-25) questions with accurate answers at your disposal in a 1z0-1080-25 Dumps PDF document. These 1z0-1080-25 PDF questions are also printable, so you can grab a hard copy if you have time to spare for a quick review.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 2	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 3	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 4	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 5	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 6	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 7	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 8	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.

Topic 9	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 10	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 11	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 12	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 13	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 14	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 15	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 16	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 17	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 18	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 19	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.

Topping 1z0-1080-25 Practice Quiz: Oracle Planning 2025 Implementation Professional Supply You the Most Veracious Exam Brain Dumps - PDFDumps

Like the real exam, PDFDumps Oracle 1z0-1080-25 Exam Dumps not only contain all questions that may appear in the actual exam, also the SOFT version of the dumps comprehensively simulates the real exam. With PDFDumps real questions and answers, when you take the exam, you can handle it with ease and get high marks.

Oracle Planning 2025 Implementation Professional Sample Questions (Q81-Q86):

NEW QUESTION # 81
Which three statements are true about importing metadata from a flat file into Planning?

- A. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.
- B. You can rename or delete members of attribute dimensions during a metadata import.
- C. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified.

- D. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record.
- E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system.

Answer: C,D,E

Explanation:
In Oracle Planning 2024, importing metadata from a flat file into Planning involves specific rules and capabilities. The three true statements are:
* A. You can rename or delete members of attribute dimensions during a metadata import: Incorrect.
Metadata imports update dimension members (e.g., adding, updating properties), but renaming or deleting attribute dimension members is not directly supported via flat file import-it requires manual action or a separate process.
* B. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server: Incorrect. Flat file imports are for metadata (e.g., dimensions, members), not artifacts like forms, dashboards, or infolets, which are managed via Migration or Application tools.
* C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record: Correct. The import file format requires a header defining properties (e.g., Name, Parent) and subsequent records with delimited values (e.g., CSV) matching that order, a standard requirement for metadata imports.
* D. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified: Correct. When the "Clear Members" option is selected, unspecified members are removed, but ancestors of specified members and base members of shared members are retained to maintain hierarchy integrity.
* E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system: Correct. Metadata imports support both full loads and incremental updates, allowing administrators to add or modify members as needed from a source system.
The Oracle documentation verifies that C, D, and E accurately describe the metadata import process, making them the correct answers.

NEW QUESTION # 82
Which three form validation rules options are supported in Planning?

- A. Validate only for users with access to this form
- B. Validate only for pages with existing blocks
- C. Validate for all page combinations and all existing or potential blocks
- D. Validate only for cells and pages to which a user has access
- E. Validate rules as Service Administrator, regardless of logged-in user, when the form is loaded or saved

Answer: B,C,D

Explanation:
In Oracle Planning 2024 Implementation, form validation rules ensure data integrity and usability by defining how forms are validated when loaded or saved. The platform supports multiple validation options tailored to performance, security, and user access, as outlined below:
* A. Validate only for cells and pages to which a user has access: This option restricts validation to the data cells and form pages that the logged-in user has permission to view or edit, based on security settings. It enhances performance by limiting the validation scope and ensures users only interact with relevant data.
* C. Validate for all page combinations and all existing or potential blocks: This comprehensive validation option checks all possible page combinations and data blocks (both existing and potential) within the form. It is useful for ensuring complete data consistency across the application, though it may impact performance due to its extensive scope.
* E. Validate only for pages with existing blocks: This option limits validation to pages that already contain data blocks, ignoring potential blocks that could be created. It strikes a balance between performance and thoroughness, focusing validation efforts on existing data.
* B. Validate rules as Service Administrator, regardless of logged-in user, when the form is loaded or saved: While Service Administrators have elevated privileges, this is not a distinct form validation rule option. Validation rules are applied based on form

settings and user access, not specifically tied to the Service Administrator role overriding the logged-in user's context.
* D. Validate only for users with access to this form: This option overlaps with A but is less precise.
Validation is tied to cell-level and page-level access rather than a broad "users with access to this form" criterion, making A the more accurate choice per Oracle's terminology.
References
* Oracle Enterprise Performance Management Cloud Documentation: "Designing Forms - Validation Rules" (docs.oracle.com, updated 2024). Describes validation options including "cells and pages a user has access to," "all page combinations and blocks," and "pages with existing blocks."
* Oracle Planning 2024 Implementation Study Guide: Lists the three supported validation options (A, C, E) under form design and validation settings, aligning with security and performance optimization features.

NEW QUESTION # 83
Which statement is true about configuring Projects with Capital?

- A. Workforce must also be configured.
- B. All modules must be enabled.
- C. If capital projects are enabled, Capital must also be configured.
- D. Strategic Modeling must be enabled.

Answer: C

NEW QUESTION # 84
Which three are use cases for data maps?

- A. To push data from a planning cube to a reporting cube
- B. To integrate data between Planning modules
- C. To integrate data between custom plan types and Planning modules
- D. To allow users to drill back to the data in a different cube
- E. To create a replicated partition between cubes

Answer: A,B

NEW QUESTION # 85
Given these two use cases:
Create a starting point for subsequent versions and replicate your First Pass version to a Second Pass version and make changes to it.
Save your baseline version data for your records and future analysis.
Which Planning Service Administrator-only feature or component can you use to perform tasks for these use cases?

- A. Copy versions
- B. Version management
- C. Task manager
- D. Version mapping

Answer: A

NEW QUESTION # 86
......

To develop a new study system needs to spend a lot of manpower and financial resources, first of all, essential, of course, is the most intuitive skill learning materials, to some extent this greatly affected the overall quality of the learning materials. Our Oracle Planning 2025 Implementation Professional study training dumps do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: Oracle 1z0-1080-25 exam, eventually form a complete set of the review system. Experts before starting the compilation of " the 1z0-1080-25 Latest Questions ", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our

1z0-1080-25 test guide l, and it's all the work of the experts. If you want to pass the qualifying exam with high quality, choose our products. We are absolutely responsible for you. Don't hesitate!
