We are concerted company offering tailored services which include not only the newest and various versions of 1z0-1118-23 practice guide, but offer one-year free updates of our 1z0-1118-23 exam questions services with patient staff offering help 24/7. So there is considerate and concerted cooperation for your purchasing experience accompanied with patient staff with amity. Their enrichment is dependable and reliable on the 1z0-1118-23 training braindumps.

Oracle Cloud Fusion Analytics Warehouse 2023 Implementation Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51

You are required to join the Fusion Applications data extracted through FAW with external data. Which approach would meet your need?

- A. You must join the two sets of data in the ADW schema.
- B. External data and Fusion data cannot be joined.
- C. FAW Semantic Model Extensions provide the ability to join the tables.

Answer: C

Explanation:

Explanation

You can use FAW Semantic Model Extensions to customize the semantic model and join the Fusion Applications data with external data. You can extend ready-to-use dimensions with additional attributes from another data source, add a fact to an existing subject area, and reorganize the ready-to-use subject areas to create a new subject area to name a few

NEW QUESTION # 52

In the FAW Security framework, which mapping paradigm best describes the mapping of Security Content to Data Roles?

- A. Security Context to Data Role is many-to-many
- B. Security Context to Data Role is one-to-many
- C. Security Context to Data Role is one-to-one

Answer: A

Explanation:

Explanation

The FAW Security framework allows a flexible and extensible mapping of Security Content to Data Roles. A Security Content is a predefined attribute that defines the boundaries of data access for a given subject area, such as Business Unit, Country, Department, Job Family, Legal Entity, and Worker Type. A Data Role is a custom role that grants access to specific subsets of data in the data warehouse based on the Security Content.

A Security Content can be mapped to multiple Data Roles, and a Data Role can have multiple Security Content associated with it. For example, a Security Content of Country = US can be mapped to a Data Role of US HR Manager, and a Data Role of US HR Manager can have multiple Security Content such as Country = US, Business Unit = Sales, and Department = Marketing.

NEW QUESTION # 53

You have reviewed out-of-the-box data security through the configuration of context assignment. You need to create custom data security to meet your data security requirements.

Which FAW settings provide this functionality?

- A. You need to modify the Data Security Assignment file with the values you want for the users.
- B. A combination of steps in Security Console and the Security Configurations in the Semantic Model Extensions available at the FAW Console provides this functionality.
- C. The Security Configurations available in the Semantic Model Extensions through the FAW Console provide this functionality

Answer: B

Explanation:

Explanation

To create custom data security to meet your data security requirements, you need a combination of steps in Security Console and the Security Configurations in the Semantic Model Extensions available at the FAW Console. The Security Console allows you to create custom data roles and assign them to users or groups⁵. The Security Configurations allow you to define custom security filters and apply them to dimensions, facts, or subject areas⁶. You do not need to use only the Security Configurations or modify the Data Security Assignment file for this purpose.

NEW QUESTION # 54

During the creation of the FAW instance, you have to provide the Fusion Application connection details and authentication information.

Which method of authentication is recommended by Oracle?

- A. Password-based
- B. Multi-factor authentication
- **C. JSON Web Token**

Answer: C

Explanation:

Explanation

JSON Web Token (JWT) is the recommended method of authentication by Oracle for creating the FAW instance. JWT is a secure and self-contained way of transmitting information between parties as a JSON object. It is used to assert some number of claims

NEW QUESTION # 55

In the FAW Security framework, what purpose do the system groups (like FAW Licensed ERP Authorize and FAW Functional Administrator) help serve?

- A. Duty and data roles are mapped to system groups before they are assigned to users.
- **B. They grant a user access to FAW based on the system groups to which they are assigned.**
- C. They define job-specific roles for users.

Answer: B

Explanation:

Explanation

The purpose of the system groups (like FAW Licensed ERP Authors and FAW Functional Administrator) in the FAW Security framework is to grant a user access to FAW based on the system groups to which they are assigned. System groups are predefined groups that specify the user's system permissions, such as whether they can consume, author, or administer content for a specific module⁵. System groups do not map duty and data roles or define job-specific roles for users.

NEW QUESTION # 56

.....

Maybe you have desired the 1z0-1118-23 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our 1z0-1118-23 study materials will change your mind. With our products, you will soon feel the happiness of study. Thanks to our diligent experts, wonderful study tools are invented for you to pass the 1z0-1118-23 Exam. You can try the demos first and find that you just can't stop studying. Using our 1z0-1118-23 study materials, you will just want to challenge yourself and get to know more.
