

Oracle 1Z0-1123-25 Questions - Free 1Z0-1123-25 Dumps For Every Exam [2025]

P.S. Free & New 1Z0-1123-25 dumps are available on Google Drive shared by SureTorrent: <https://drive.google.com/open?id=1uYfPwPKAzZcUysqbLJWFwqQjZGs2mpZq>

Our 1Z0-1123-25 study materials present the most important information to the clients in the simplest way so our clients need little time and energy to learn our 1Z0-1123-25 study materials. The clients only need 20-30 hours to learn and prepare for the test. For those people who are busy in their jobs, learning or other things this is a good news because they needn't worry too much that they don't have enough time to prepare for the test and can leisurely do their main things and spare little time to learn our 1Z0-1123-25 Study Materials. So it is a great advantage of our 1Z0-1123-25 study materials and a great convenience for the clients.

Oracle 1Z0-1123-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Migrate Containerized Applications to OCI: This section evaluates the expertise of Cloud DevOps Engineers in migrating containerized applications to Oracle Cloud Infrastructure. It introduces the fundamentals of OCI Container Engine for Kubernetes and Oracle Cloud Infrastructure Registry. Candidates will learn the key phases involved in migrating containerized workloads and ensuring proper orchestration and scaling within the OCI ecosystem.
Topic 2	<ul style="list-style-type: none">• Migrate Infrastructure Workloads Between OCI Regions: This section assesses the skills of Cloud Operations Engineers in managing workload replication across OCI regions. It covers OCI Object Storage Replication, Block Volume Replication, and File System Replication to ensure business continuity. Additionally, candidates will learn how to design and implement full-stack disaster recovery strategies using OCI Full Stack Disaster Recovery Service to minimize downtime and data loss.
Topic 3	<ul style="list-style-type: none">• Migrate Oracle Databases to OCI Database Services: This section tests the knowledge of Database Migration Specialists in planning and executing successful database migrations to OCI. It covers database migration strategies, different OCI database services, and the available methods for transferring databases to the cloud. Candidates will learn how to analyze existing database workloads and select the most efficient migration approach for maintaining data integrity and performance.

Topic 4	<ul style="list-style-type: none"> OCI Networking Services for Migrations: This section evaluates the knowledge of Cloud Network Architects in utilizing OCI networking services for cloud migrations. It covers the fundamentals of OCI networking, including Virtual Cloud Networks (VCN), subnets, gateways, and connectivity options. The focus is on ensuring secure and optimized networking configurations that support smooth data migration and integration between on-premises and OCI environments.

1Z0-1123-25 Study Guides, 1Z0-1123-25 Latest Test Materials

You are in a quest for high quality practice materials like our 1Z0-1123-25 preparation exam. We avail ourselves of this opportunity to approach you to satisfy your needs. In order to acquaint you with our 1Z0-1123-25 practice materials, we wish to introduce a responsible company dealing with exclusively in area of 1Z0-1123-25 training engine and it is our company which keeps taking care of the readers' requests, desires and feeling about usage of our 1Z0-1123-25 study questions in mind.

Oracle Cloud Infrastructure 2025 Migration Architect Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

In Oracle Cloud Infrastructure (OCI), how are Security Lists different from Network Security Groups (NSGs) in terms of their functionality and application?

- **A. A Security List defines a set of security rules that applies to all the VNICs in a subnet whereas a Network Security Group lets you define a set of security rules that applies to a group of VNICs in a Virtual Cloud Network (VCN)**
- B. NSGs are primarily used for inbound traffic control, while Security Lists are exclusively utilized for outbound traffic control within a subnet
- C. Security Lists and NSGs are identical in functionality but differ only in naming conventions based on the OCI region where they are deployed
- D. Security Lists offer more advanced features such as intrusion detection and prevention, whereas NSGs focus solely on packet filtering and routing

Answer: A

Explanation:

A Security List in OCI defines a set of security rules that apply to all the Virtual Network Interface Cards (VNICs) within a subnet, while a Network Security Group (NSG) allows you to define a set of security rules that apply to a specific group of VNICs within a Virtual Cloud Network (VCN).

NEW QUESTION # 14

You are planning to migrate an Oracle database from an on-premises data center to OCI Database service. Which two can be used for the migration?

- **A. Data Pump**
- **B. Zero Downtime Migration**
- C. Block Volume Replication
- D. Oracle Cloud Migrations
- E. Data Transfer Service

Answer: A,B

Explanation:

Data Pump and Zero Downtime Migration are both valid options for migrating an Oracle database from on-premises to OCI Database service. Data Pump allows for export and import of data and metadata, while Zero Downtime Migration ensures continuous availability during the migration process.

NEW QUESTION # 15

Which is NOT a benefit of using Hybrid Cloud Extension (HCX) for migrating Virtual Machines (VMs) to Oracle Cloud VMware Solution (OCVS)?

- A. HCX facilitates the migration of VMs from non-VMware environments, such as KVM or Hyper-V
- B. HCX utilizes WAN optimization to accelerate migration traffic, making the migration process faster and more efficient
- C. With HCX, the migrated VMs can retain their original IP addresses
- **D. HCX upgrades the source environment to the latest vSphere version prior to migrating VMs**

Answer: D

Explanation:

HCX does not upgrade the source environment to the latest vSphere version prior to migrating VMs. It focuses on simplifying and accelerating the migration process without requiring upgrades to the source environment.

NEW QUESTION # 16

You are planning to configure VMware Hybrid Cloud Extension (HCX) for a migration from an on-premises data center to Oracle Cloud VMware Solution (OCVS). What are the primary roles of the HCX Manager and HCX Connector?

- **A. The HCX Manager is installed in the source environment to initiate migrations, whereas the HCX Connector receives the migration traffic in the target OCVS environment**
- B. Both HCX Manager and HCX Connector are deployed in the OCVS environment to facilitate bidirectional migrations between cloud instances
- C. The HCX Manager is deployed in the OCVS environment as the Tunnel receivers, whereas the HCX Connector is installed in the on-premises environment as the Tunnel initiators
- D. The HCX Connector is responsible for WAN optimization and network extension in the OCVS environment, whereas the HCX Manager handles these tasks in the on-premises environment

Answer: A

Explanation:

The HCX Manager is responsible for initiating migrations and managing the migration process in the source environment, while the HCX Connector receives the migration traffic in the target OCVS environment.

NEW QUESTION # 17

You have been tasked with provisioning an Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE) cluster to deploy new applications and manage existing ones. Which two statements are FALSE?

- **A. To access the cluster using kubectl, you have to set up a Kubernetes manifest file stored in the \$HOME/.manifest directory**
- B. To access the cluster using kubectl, you have to set up a Kubernetes configuration file stored in the \$HOME/.kube directory
- C. When a cluster's Kubernetes API endpoint has a public IP address, you can access the cluster in Cloud Shell by setting up a kubeconfig file
- **D. The only available option when a cluster's Kubernetes API endpoint has a public IP address is to control the cluster locally using kubectl and the Kubernetes Dashboard**

Answer: A,D

Explanation:

Setting up a Kubernetes manifest file in the \$HOME/.manifest directory is not a standard practice for accessing a Kubernetes cluster using kubectl. Manifest files are used to define and manage Kubernetes resources, such as pods, deployments, and services, but they are not used for configuring access to the cluster.

While controlling the cluster locally using kubectl and the Kubernetes Dashboard is one way to interact with a cluster, it is not the only available option when a cluster's Kubernetes API endpoint has a public IP address. You can also access and manage the cluster remotely using kubectl from any environment that has network connectivity to the cluster.

NEW QUESTION # 18

.....

You must make a decision as soon as possible! I don't know where you heard about 1Z0-1123-25 actual exam, but you must know that there are many users of our 1Z0-1123-25 study materials. Some of these users have already purchased a lot of information. They completed their goals with our 1Z0-1123-25 learning braindumps. Now they have a better life. As you know the company will prefer to employ the staffs with the 1Z0-1123-25 certification.
