Oracle 1Z0-1126-1 Desktop & Practice Test Software By PassExamDumps

Selecting the right method will save your time and money. If you are preparing for 1Z0-1126-1 exam with worries, maybe the professional exam software provided by IT experts from PassExamDumps will be your best choice. Our PassExamDumps aims at helping you successfully Pass 1Z0-1126-1 Exam. If you are unlucky to fail 1Z0-1126-1 exam, we will give you a full refund of the

cost you purchased our dump to make up part of your loss. Please trust us, and wish you good luck to pass 1Z0-1126-1 exam

Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.
Topic 2	<ul style="list-style-type: none">Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
Topic 3	<ul style="list-style-type: none">Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.
Topic 4	<ul style="list-style-type: none">Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.
Topic 5	<ul style="list-style-type: none">Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q49-Q54):

NEW QUESTION # 49

What analytics data is not displayed on the Feedback dashboard?

- A. Guide name
- B. Date/Time
- C. Search terms
- D. Rating

Answer: C

Explanation:

The Feedback dashboard in the OGL console is designed to display data related to user feedback on guides, such as Date/Time

(option B) of submissions, Guide name (option C) to identify the content, and Rating (option D) to gauge user satisfaction. These metrics help administrators and developers assess guide effectiveness and user experience. However, Search terms (option A) are not typically part of the Feedback dashboard, as they relate to how users search for content rather than their feedback on it. Search-related data is more likely found in a Search Terms dashboard or similar analytics tool focused on user navigation behavior, not feedback analysis. Excluding search terms from the Feedback dashboard keeps its focus on evaluative insights rather than discovery patterns, ensuring clarity in its purpose.

NEW QUESTION # 50

What can information from the Application dashboard be used for?

- A. Identify high-usage days to launch messages.
- B. Show decision-makers' feedback from end users.
- C. Deliver a full picture on the types of content.

Answer: A

Explanation:

The Application dashboard in OGL provides data on application usage patterns, such as peak times or high-traffic days, which can be leveraged to strategically launch messages or notifications when users are most active (option A). This timing optimization enhances visibility and engagement. Option B (types of content) aligns with the Content dashboard, not Application, while option C (feedback) pertains to the Feedback dashboard. The Application dashboard's focus on usage trends rather than content specifics or feedback makes it a tactical tool for communication planning, ensuring messages reach users at optimal moments based on their interaction habits.

NEW QUESTION # 51

In the Enable phase, which activities are the Organizational Change and Training Leads responsible for?

- A. Developing knowledge and skills with project governance plans
- B. Communicating known and new issues, and workarounds that will impact users
- C. Establishing mechanisms for collecting feedback and insights from end users

Answer: A

Explanation:

In the Enable phase of an OGL project, Organizational Change and Training Leads focus on developing knowledge and skills among users and stakeholders, often aligned with project governance plans to ensure adoption and competency (option C). This phase emphasizes training delivery and change management to enable successful use of OGL. Establishing feedback mechanisms (option A) and communicating issues (option B) are typically responsibilities of other roles (e.g., administrators or support leads) during later phases like Refine or Hypercare. Option C reflects the Leads' strategic role in building capability, ensuring the organization is equipped to leverage OGL effectively as part of the broader deployment approach.

NEW QUESTION # 52

What is the standard use of a Base Guide?

- A. You want to familiarize the project team with overall business processes.
- B. You want targeted assistance for specific areas of the host application.
- C. You want clear, step-by-step instructions for essential tasks.

Answer: C

Explanation:

A Base Guide in Oracle Guided Learning (OGL) is a content type designed to deliver clear, step-by-step instructions for completing essential tasks within a host application. It differs from Business Process Training, which focuses on familiarizing teams with overarching processes (option A), and Use Cases, which provide targeted assistance for specific areas (option B). Base Guides are practical tools aimed at enabling end users to perform critical functions efficiently, making them a cornerstone of task-oriented guidance in OGL.

NEW QUESTION # 53

Which resource needs to be knowledgeable about how to build and test OGL content items?

- A. Project Managers
- B. OGL Content Developers
- C. OGL Administrators

Answer: B

Explanation:

OGL Content Developers are the resources tasked with building and testing OGL content items, requiring deep knowledge of content creation tools, guide construction, and testing protocols (option C). Project Managers (option A) oversee planning and coordination, not hands-on content work, while OGL Administrators (option B) manage console setup and permissions, not content development. Developers' expertise ensures guides are functional, accurate, and user-ready, making them the technical backbone of content production. Their role involves using the Content Editor, applying best practices, and validating functionality, distinguishing them from other resources in this specialized task.

NEW QUESTION # 54

• • • • •

According to the different demands from customers, the experts and professors designed three different versions of our 1Z0-1126-1 exam questions for all customers. According to your need, you can choose the most suitable version of our 1Z0-1126-1 guide torrent for yourself. The three different versions have different functions. If you decide to buy our 1Z0-1126-1 Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our 1Z0-1126-1 exam questions. We believe that you will like our 1Z0-1126-1 study guide.
