Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which status indicates that content will be seen in Production?

- A. Inactive
- B. Archived
- C. Published
- D. Draft

Answer: C

Explanation:

In OGL, only content with the "Published" status is visible in the Production environment. Inactive (option A) content is disabled, Draft (option B) is in development, and Archived (option C) is stored but not active. Publishing content makes it available to end users in the live system, aligning with OGL's content lifecycle management.

NEW QUESTION # 25

In the Focus phase, which activity is the responsibility of the Functional Consultant?

- A. Complete relevant digital learning through online training resources and tools to become familiar with OGL content development
- B. Collaborate with business process owners to customize OGL templates relevant to the client's application customization
- C. Sign off on OGL content items to signal that content is ready for publishing and end-user consumption

Answer: B

Explanation:

During the Focus phase, which centers on aligning OGL with business needs, the Functional Consultant's role is to collaborate with business process owners to customize OGL templates (option C). This ensures content reflects the client's specific application customizations, enhancing relevance and usability. Signing off on content (option A) typically falls to project managers or content approvers in later phases like Refine, while completing digital learning (option B) is a preparatory step, not a core Focus-phase duty. The Functional Consultant's expertise in business processes and application configuration makes them pivotal in tailoring templates, bridging technical and operational requirements effectively.

NEW QUESTION # 26

What are the attributes of a successful OGL project's testing document?

- A. Is saved to your computer desktop
- B. Is missing the status of development for each content item
- C. Includes people responsible for review and sign-off

Answer: C

Explanation:

A successful OGL testing document must identify people responsible for review and sign-off to ensure accountability and completion. Saving to a desktop (option B) is irrelevant to success, and missing development status (option C) undermines tracking, making it a flaw, not an attribute.

NEW QUESTION # 27

Which key resources must attend the kickoff meeting?

- A. Functional leads
- B. Leadership team
- C. Project managers
- **D. All team members**

Answer: D

Explanation:

The kickoff meeting requires all team members to ensure alignment on roles, responsibilities, and objectives. Subsets like project managers (option A), functional leads (option B), or leadership (option D) are insufficient alone.

NEW QUESTION # 28

What do the following factors determine?

Timelines from the change management strategy

The cloud implementation plan

Planning for optional activities

- A. Hypercare and maintenance
- B. OGL content development
- C. When to celebrate go live
- **D. OGL project scope and timelines**

Answer: D

Explanation:

The listed factors-timelines from change management, the cloud implementation plan, and optional activity planning-collectively determine the OGL project scope and timelines (option B). These elements define the project's boundaries, duration, and resource allocation, integrating change management and implementation schedules into a cohesive framework. Hypercare and maintenance (option A) are outcomes, not determinants, while celebration timing (option C) and content development (option D) are narrower aspects influenced by the broader scope. This holistic determination ensures the project aligns with organizational goals and technical constraints, setting the stage for all subsequent activities.

NEW QUESTION # 29
