

# Oracle 1Z0-1163-1 Dumps - Obtain Brilliant Result (2026)

P.S. Free & New 1Z0-1163-1 dumps are available on Google Drive shared by PrepPDF: [https://drive.google.com/open?id=1bVoawmJmOZotB7Vyut5wjsOcYA\\_1kwzR](https://drive.google.com/open?id=1bVoawmJmOZotB7Vyut5wjsOcYA_1kwzR)

If you choose the help of PrepPDF, we will spare no effort to help you pass the exam. Moreover, we also provide you with a year of free after-sales service to update the exam practice questions and answers. Do not hesitate! Please select PrepPDF, it will be the best guarantee for you to pass 1Z0-1163-1 Certification Exam. Now please add PrepPDF to your shopping cart.

## Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Oracle Cloud Success Navigator &amp; Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.</li></ul>

Topic 6	<ul style="list-style-type: none"> <li>• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.</li> </ul>

## 1Z0-1163-1 Examcollection Dumps | Reliable 1Z0-1163-1 Exam Topics

Our 1Z0-1163-1 practice materials enjoy a very high reputation worldwide. This is not only because our practical materials are affordable, but more importantly, our 1Z0-1163-1 practice materials are carefully crafted after years of hard work and the quality is trustworthy. If you are still anxious about getting a certificate, why not try our 1Z0-1163-1 practice materials? If you have any questions about our practical materials, you can ask our staff who will give you help.

## Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q33-Q38):

### NEW QUESTION # 33

What is the primary purpose of the Production Order to Cost Update OMBP in Oracle Fusion Cloud SCM?

- A. It enhances customer relationship management.
- **B. It provides accurate cost calculations for better decision-making.**
- C. It automates the production process without human supervision.
- D. It ensures immediate financial benefits through real-time cost updates.

**Answer: B**

Explanation:

The Production Order to Cost Update OMBP (D) in Oracle Fusion Cloud SCM focuses on providing accurate cost calculations by capturing and updating costs associated with production orders-materials, labor, and overhead-enabling better decision-making. For instance, if producing 100 units costs \$1,000 (e.g., \$500 materials, \$300 labor, \$200 overhead), this process ensures the total is reflected accurately, allowing managers to adjust pricing or reduce costs. Option A is misleading-while cost updates occur, the primary purpose is accuracy, not immediate financial gains, which are an outcome. Option B is incorrect-customer relationship management is unrelated to production costing. Option C overstates automation; human oversight is still required, and the focus is on cost, not process automation. Accurate cost data supports profitability analysis, budgeting, and strategic planning, making it a critical link between manufacturing and financial management.

### NEW QUESTION # 34

What is the purpose of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It manages only supplier payments without impacting inventory levels.
- B. It guarantees immediate product shipment for all orders.
- **C. It ensures product availability commitments based on inventory and supply constraints.**

**Answer: C**

Explanation:

The Available to Promise (ATP) process in Oracle Fusion Cloud SCM is designed to determine product availability and provide realistic commitments to customers based on current inventory levels and supply constraints, such as production capacity and supplier lead times. ATP calculates how much stock is "available to promise" for new orders by subtracting existing commitments from on-hand inventory and factoring in planned supply. For example, if a warehouse has 50 units of a product, with 20 already allocated to prior orders, ATP shows 30 units available for new promises. Option B is incorrect because ATP has no direct role in managing supplier payments—it focuses on inventory and supply planning. Option C is false as ATP does not guarantee immediate shipment; it provides feasible dates based on availability, not an unrealistic promise of instant delivery. This process supports accurate order promising, prevents stockouts, and aligns customer expectations with operational reality, making it a cornerstone of effective supply chain management.

#### NEW QUESTION # 35

What is a key benefit of Supplier Qualification Management in Oracle Fusion Cloud SCM?

- A. It eliminates supplier performance reviews.
- B. It only tracks supplier payments.
- C. It assesses and approves suppliers based on compliance and performance criteria.

**Answer: C**

Explanation:

Supplier Qualification Management in Oracle Fusion Cloud SCM evaluates and approves suppliers based on predefined compliance and performance criteria, ensuring reliable partnerships. Option A is incorrect as it focuses on payments, not qualification. Option C is wrong—performance reviews are integral to the process. This benefit mitigates risks and ensures quality suppliers.

#### NEW QUESTION # 36

Which feature in Oracle Fusion Cloud SCM assesses and approves suppliers based on compliance and performance criteria?

- A. Cost Accounting.
- B. Supplier Portal.
- C. Manufacturing Execution.
- D. Supplier Qualification Management.

**Answer: D**

Explanation:

Supplier Qualification Management (D) assesses and approves suppliers based on compliance (e.g., regulatory standards) and performance criteria (e.g., delivery reliability). For example, it might evaluate a supplier's 95% on-time delivery rate and ISO certification before approval. Option A (Cost Accounting) tracks costs, not supplier quality. Option B (Supplier Portal) facilitates communication, not qualification. Option C (Manufacturing Execution) manages production, not supplier vetting. This feature ensures reliable, high-quality suppliers, reducing supply chain risks and enhancing procurement outcomes.

Reference:

Below is the batch of questions formatted as requested, with comprehensive and detailed explanations verified against Oracle Fusion Cloud Applications SCM and Procurement documentation. Each explanation is extensive, covering the reasoning behind the correct answer, why other options are incorrect, practical examples, and the broader implications within the SCM or Procurement framework. All questions have four options, so the format includes A, B, C, and D. Note that Question 11 was included in this batch as it aligns with the pattern of your request.

#### NEW QUESTION # 37

How does embedding Oracle Method Based Practices (OMBP) in Starter Configurations benefit Oracle Fusion Applications implementations?

- A. Provides a standard configuration that supports solution-led implementation of Oracle Fusion Applications.
- B. Allows third-party vendors to access and modify configurations.
- C. Enables fully customized setup based on individual customer requirements.

**Answer: A**

Explanation:

Embedding Oracle Method Based Practices (OMBP)s in Starter Configurations (C) provides a prebuilt, standard configuration that streamlines Oracle Fusion Applications implementations using a solution-led approach. These configurations incorporate best practices-e.g., predefined workflows for demand planning-reducing setup time and ensuring consistency. For instance, a company can deploy SCM modules with optimized settings out of the box, customizing only where necessary. Option A is incorrect-third-party access isn't a focus; security restricts modifications. Option B is partially true but misses the point-OMBP)s standardize first, then allow customization, not the reverse. This approach accelerates deployment, lowers costs, and leverages Oracle's expertise for reliable outcomes.

### NEW QUESTION # 38

• • • • •

If you are curious or doubtful about the proficiency of our 1Z0-1163-1 preparation quiz, we can explain the painstakingly word we did behind the light. By abstracting most useful content into the 1Z0-1163-1 exam materials, they have helped former customers gain success easily and smoothly. The most important part is that all contents were being sifted with diligent attention. No errors or mistakes will be found within our 1Z0-1163-1 Study Guide.
