2025 Authoritative 1z0-591 – 100% Free Study Demo | Reliable 1z0-591 Exam Testking

Here in this Desktop practice test software, the Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) practice questions given are very relevant to the actual Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) exam. It is

compatible with Windows computers. Prep4pass provides its valued customers with customizable Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) practice exam sessions. The Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) practice test software also keeps track of the previous Oracle 1z0-591 practice exam attempts.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q111-Q116):

NEW QUESTION # 111

Which option describes how OBIEE natively integrates with HFM?

- A. Direct relational database access
- B. OBIEE does not support HFM integration
- C. Through Essbase connectivity
- D. Through EPM Analytic Data Model (ADM) connectivity

Answer: D

Explanation:

BI EE uses the ADM driver to extract the data from HFM.

Note: HFM (Hyperion Financial Management)

Example:

IEE connects to HFM through JavaHost. So, the setup for configuring the connectivity is to basically make the EPM environment variables available for access to BI EE. Before making the changes, there are a couple of things to be aware of

1.Ensure that DCOM is enabled on the BI Server machine. This is needed for HFM client to work/connect properly with HFM Server.

2.Ensure that HFM Client is installed.

The above assumes EPM 11.1.2.x version. If you are on Hyperion 9.3.3, then you need to have the ADM drivers installed manually. All of this is documented clearly. So, rather than re-iterating that i will just point to the link here. Ensure that you follow all the steps mentioned in the docs else you will have issues in the connectivity. Once all the pre-requisite steps are done, we start off with the metadata import process.

NEW QUESTION # 112

Why is it necessary to join multiple source tables to a single dimension?

- A. Because a single source table often contains all the dimensions needed
- B. Because transactional source systems are often denormalized
- C. Because the dimensions tables are built in the transactional systems
- D. Because transactional source systems are often normalized

Answer: B

Explanation:

Denormalized data in the transactional system could be divided into different tables to increase performance.

NEW QUESTION # 113

Identify the two Object level security functions that are done on the repository by using the BI Admin tool.

- A. Create a new user in the repository
- B. Create a web catalog group
- C. Define permissions for Dashboard
- D. Create a new repository group
- E. Assign users to a web catalog group

Answer: A,D

Explanation:

Explanation/Reference:

The Oracle Business Intelligence (BI) Administration Tool can be used to build, modify, enhance, and manage an Oracle BI repository.

C: To add a new user to a repository

- 1 Open a repository in the Administration Tool.
- 2 Display the security manager by selecting Manage > Security.
- 3 Select Action > New > User to open the User dialog box.
- 4 Type a name and password for the user.
- 5 If you want to log queries for this user in the query log, change the query logging level to 1 or 2.
- 6 Click OK.

This creates a new user with default rights granted to it.

Note: What is Oracle BI Admin Tool/Oracle Business Intelligence Administration Tool?

Oracle Business Intelligence Administration Tool is Used to manage OBIEE server Available only for Windows operating systems.

A Windows application that allows the BI Server administrator to create & edit repositories.

Can edit repositories in either online or offline mode.

Having a session manager and a cache manager in online mode.

NEW QUESTION # 114

Selecting the Manage Map Data link allows one to do which three of the following?

- A. Import images for use on maps
- B. Set the zoom level of an imported map
- C. Associate map layers to columns defined in the OBIEE metadata
- D. Create a new map layer

Answer: A,B,C

Explanation:

Explanation/Reference:

The Oracle BI Presentation Services Administration page provides the Manage Map Data link. This link displays the Manage Map Data page, where you can manage the logical and display versions of the data from various physical data sources. This defines the layers that content designers use when creating map views.

The data that is available for managing maps and data is stored in Oracle Database as part of MapViewer.

Using this page, you provide:

* (A) Logical names to prevent any existing BI column mappings and map analyses from breaking because of changes to the physical data or to the data source.

* Display names so that the geographic data is meaningful to end users.

Note: Administering Maps Using Administration Pages

For (C) -layers, see 3-7 below.

For (D) -import images, see 11-12 below.

To administer maps using Administration pages:

1. Sign in to Oracle Business Intelligence.
2. In the global header, click Administration.
3. Click the Manage Map Data link to display the Manage Map Data page.
4. Click the Layers tab.
5. Click the Import Layers button to display the Import Layers dialog.
6. In the dialog, select the connection and the layers that are needed for zooming and drilling. (This tab is not prepopulated by other selections on the Administration pages. You can use any layers or images with any map.) Click OK when you have finished selecting layers that are appropriate for the subject area with which you are working.
7. Back on the Layers tab, select a layer, then click the Edit Layer button to display the Edit Layer dialog in which you associate layers with attribute columns so that you can display BI data in the map view.

Click OK when you have finished editing the layer.

You use this tab to associate layers with BI data. If you use the City column in multiple subject areas, then you must associate it with a layer for each subject area.

8. Click the Background Maps tab, then click the Import Background Maps button to display the Import Background Maps dialog.

9. In the dialog, select the connection and the main maps to use.

The connection that you select for the main map can be different from the connection for the layers or images.

Click OK when you have finished selecting main maps.

10. Back on the Background Maps tab, select a map, then click the Edit Background Map button to display the Edit Background Map dialog in which you name the map and specify the order of layers and their zoom levels.

Click OK when you have finished editing the map.

11. Optionally, click the Images tab, then click the Import Images button to display the Import Images dialog.

You can import images if you plan to use them as a format on maps.

12. In the dialog, select the connection and the images to use.

Click OK when you have finished selecting images.

13. Click Back when you have finished working with the Administration page. Your changes are saved automatically.

NEW QUESTION # 115

A company's Database Administrator has divided the region table into two tables so that the region "West" is in one table and all the other regions are in another single table. What kind of partition is being used?

- A. Fact-based
- B. Time-based
- C. Complex
- D. Mixed

Answer: C

Explanation:

Explanation/Reference:

You have three sort of fragmentation:

Fact-based / Dimension-based fragmentation

Content-based / Value-based fragmentation

Level-based fragmentation / aggregate navigation

You can combine the techniques above to construct powerful design that are known as Complex partitioning / fragmentation. When you fragment a dimension, you are automatically in a complex fragmentation.

Incorrect answers:

A: Fact-based / Dimension-based fragmentation

The logical table sources have different columns.

NEW QUESTION # 116

.....

We respect different propensity of exam candidates, so there are totally three versions of 1z0-591 guide dumps for your reference. The PDF version of 1z0-591 practice materials helps you read content easier at your process of studying with clear arrangement and the PC Test Engine version of 1z0-591 real test allows you to take simulative exam. Besides, the APP version of our practice materials, you can learn anywhere at any time with 1z0-591 study guide by your electronic devices.
