Once the user has used our 1Z0-771 test prep for a mock exercise, the product's system automatically remembers and analyzes all the user's actual operations. The user must complete the test within the time specified by the simulation system, and there is a timer

on the right side of the screen, as long as the user begins the practice of 1Z0-771 Quiz guide, the timer will run automatic and start counting. The transfer can be based on the 1Z0-771 valid practice questions report to develop a learning plan that meets your requirements. As long as you study with our 1Z0-771 exam questions, you will pass the exam.

Oracle APEX Cloud Developer Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. Initial Prompt
- **B. Welcome Message**
- C. AI Assistant Name

Answer: B

Explanation:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance, offering flexibility across pages.

NEW QUESTION # 48

Which two SQL format options does the APEX Assistant provide when using the "Create Data Model using AI" feature?

- **A. Quick SQL**
- **B. Oracle SQL**
- C. Oracle PL/SQL
- D. MySQL

Answer: A,B

Explanation:

The "Create Data Model using AI" feature in APEX Assistant leverages AI to generate data models based on natural language input.

The supported SQL format options are:

Quick SQL: A shorthand syntax for defining database objects, which APEX can convert into full DDL.

Oracle SQL: Standard SQL syntax compatible with Oracle Database for creating tables and other objects.

MySQL is not supported as it's specific to a different database system, and Oracle PL/SQL is a procedural language, not a format for defining data models in this context.

NEW QUESTION # 49

You created a custom theme for an application. Examine these requirements: (Assuming requirements mandate syncing changes). Which solution guarantees that any changes to the master theme are reflected in the copied theme?

- **A. Subscribing the copied theme to the master theme and refreshing the theme.**
- B. Copying the changes made in the master theme to the copied theme.
- C. Refreshing the templates.
- D. Verifying the theme subscription.

Answer: A

Explanation:

Theme subscription links a copied theme to its master:

A . Subscribing and refreshing: Subscribing the copied theme (in Shared Components > Themes) to the master ensures it inherits updates. "Refresh Theme" (via Theme Roller or Utilities) syncs changes (e.g., CSS, templates) from the master, guaranteeing consistency.

B . Refreshing templates: Only updates individual templates, not the entire theme.

C . Copying changes: Manual, error-prone, and not guaranteed.

D . Verifying subscription: Confirms the link but doesn't sync changes.

Use case: Ideal for maintaining branded consistency across apps.

NEW QUESTION # 50

You have defined a REST Data Source with ORDS as the REST Data Source Type. The Source is being used as source for an editable Interactive Grid. When a user updates an employee record in this Interactive Grid, which operation is performed on the Database?

- **A. PUT**
- B. GET
- C. POST

Answer: A

Explanation:

An editable Interactive Grid synced with a REST Data Source (ORDS) maps CRUD operations to HTTP methods:

C . PUT: Updates an existing resource. When a user edits a row (e.g., changes SALARY), the grid sends a PUT request to the ORDS endpoint (e.g., /employees/101), updating the corresponding record.

A . POST: Creates new records, used for inserts, not updates.

B . GET: Retrieves data, used for initial grid population, not updates.

Technical note: ORDS maps PUT to an update operation on the underlying table, requiring the REST endpoint to support this method.

NEW QUESTION # 51

The Movies faceted search report is filtered only when the Apply button for a selected facet is clicked. What must be done in the Page Designer so that report filtering is automatically executed when any facet value is selected?

- A. Navigate to each facet and then in the Property Editor, turn on Client-Side Filtering.
- B. Navigate to the faceted search region Attributes, and turn off the Show Facet Name attribute.
- **C. Navigate to the faceted search region Attributes, and disable the Batch Facet Changes attribute.**

Answer: C

Explanation:

By default, faceted search can "batch" changes, requiring an "Apply" button click to filter the report. To enable automatic filtering: Disable the Batch Facet Changes attribute: In Page Designer, under the Faceted Search region's Attributes, setting "Batch Facet Changes" to "No" ensures the report refreshes immediately when a facet value is selected, improving responsiveness. This triggers an AJAX call to update the report without a manual submit.

Show Facet Name: This controls facet label visibility, unrelated to filtering behavior.

Client-Side Filtering: This applies to Interactive Reports/Grids, not faceted search regions, and isn't the correct solution here. This adjustment enhances the user experience by providing instant feedback.

NEW QUESTION # 52

.....

As we have three different versions of the 1Z0-771 exam questions, so you can choose the most suitable version that you want to study with. If you are convenient, you can choose to study on the computer. If you live in an environment without a computer, you can read our 1Z0-771 simulating exam on your mobile phone. Of course, the premise is that you have already downloaded the APP version of our 1Z0-771 study materials. It is the right version for you to apply to all kinds of the electronic devices.
