Do you have registered for Oracle 1Z0-931-25 exam? With the drawing near of the examination, I still lack of confidence to pass 1Z0-931-25 test. Then I have not enough time to read reference books. About the above problem, how should I do? Is there shortcut to pass the exam? Do you have such a mood like that, now? There is no need for hurry. Even if the examination time is near, you are also given the opportunity to prepare for 1Z0-931-25 Certification test. And what is the opportunity? It is TroytecDumps 1Z0-931-25 dumps which is the most effective materials and can help you prepare for the exam in a short period of time. What's more, TroytecDumps practice test materials have a high hit rate. 100% satisfaction guarantee! As well as you memorize these questions and answers in our dumps, you must pass Oracle 1Z0-931-25 certification.

You may find that there are a lot of buttons on the website which are the links to the information that you want to know about our 1Z0-931-25 exam braindumps. Also the useful small buttons can give you a lot of help on our 1Z0-931-25 study guide. Some buttons are used for hide or display answers. What is more, there are extra place for you to make notes below every question of the 1Z0-931-25 practice quiz. Don't you think it is quite amazing? Just come and have a try!

New Oracle 1Z0-931-25 Study Plan | Latest 1Z0-931-25 Exam Pass4sure

We are never complacent about our achievements, so all content of our 1Z0-931-25 exam questions are strictly researched by proficient experts who absolutely in compliance with syllabus of this exam. Accompanied by tremendous and popular compliments around the world, to make your feel more comprehensible about the 1Z0-931-25 study prep, all necessary questions of knowledge concerned with the exam are included into our 1Z0-931-25 simulating exam.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q148-Q153):

NEW QUESTION # 148

You are the admin user of an Autonomous Database instance. A new business analyst has joined the team and would like to explore the Autonomous Database tables using Autonomous Database's Data Tools. Which step should you perform to enable the new team member?

- A. Create a REST-enabled database user (with connect and object privileges) and grant the DWROLE role.
- B. Create a database user with the default privileges.
- C. Create an IDCS user and create a database user with connect, resource, and object privileges.
- D. Create a database user with connect, resource, and object privileges.

Answer: A

Explanation:

Full Detailed In-Depth Explanation:

To enable a business analyst to use Autonomous Database Data Tools (e.g., Data Load, SQL Developer Web), specific permissions are required:

REST-enabled user: Data Tools rely on REST APIs, necessitating a user with REST support enabled.

Connect and object privileges: These allow database access and interaction with tables.

DWROLE role: This predefined role grants a comprehensive set of privileges for data analysis tasks in Autonomous Data Warehouse (ADW), including SELECT, EXECUTE, and data loading capabilities.

Evaluating the options:

A: Correct. Creating a REST-enabled user with connect/object privileges and granting DWROLE ensures full access to Data Tools, tailored for ADW exploration.

B: Incorrect. Default privileges are minimal and insufficient for Data Tools usage.

C: Incorrect. While connect, resource, and object privileges provide basic access, they lack the REST enablement and DWROLE's specific analysis permissions.

D: Incorrect. An IDCS (Identity Cloud Service) user is for OCI authentication, not database-level access, and this step overcomplicates the process.

NEW QUESTION # 149

Which of the following two statements are correct? (Choose two.)

- A. Data Transforms Card provides access to Oracle Data Integrator (ODI) Web Edition.
- B. ODI Web Edition can be installed from Oracle Cloud Infrastructure (OCI) Marketplace.
- C. ODI Web Edition is available only on Oracle Linux.
- D. All capabilities of ODI Classic are available with ODI Web Edition.

Answer: B,D

Explanation:

Oracle Data Integrator (ODI) Web Edition integrates with Autonomous Database:

Correct Answer (B): "ODI Web Edition can be installed from Oracle Cloud Infrastructure (OCI) Marketplace" is true. It's offered as a Marketplace image for easy deployment on OCI compute instances.

Correct Answer (D): "All capabilities of ODI Classic are available with ODI Web Edition" is correct; the web version retains full functionality for data integration tasks.

Incorrect Options:

A: ODI Web Edition is not limited to Oracle Linux; it runs on various platforms supported by OCI.

C: The Data Transforms Card in Database Actions uses a simplified UI, not full ODI Web Edition access. This enhances data integration flexibility in the cloud.

NEW QUESTION # 150

Which two statements are true about Data Insights?

- A. You can retrieve previously executed Data Insights searches.
- B. Data Insights is available with on-premises deployments of Oracle Database.
- C. Data Insights is an additional priced option.
- D. You can search for Data Insights against a base table or business model.

Answer: A,D

Explanation:

Full Detailed In-Depth Explanation:

A: True. Data Insights works with tables and business models in ADW.

B: False. Exclusive to Autonomous Database, not on-premises.

C: True. Search history is retrievable.

D: False. Included in ADW, not separately priced.

NEW QUESTION # 151

Which Autonomous Database Cloud Service ignores hints in SQL statements by default?

- A. Both services ignore hints by default
- B. Autonomous Transaction Processing
- C. Neither service ignores hints by default
- D. Autonomous Data Warehouse

Answer: D

Explanation:

Full Detailed In-Depth Explanation:

Oracle Autonomous Database offers two primary services: Autonomous Data Warehouse (ADW) and Autonomous Transaction Processing (ATP), each optimized for different workloads. SQL hints are directives embedded in SQL statements to influence the optimizer's execution plan. However, their handling differs between the services:

Autonomous Data Warehouse (ADW): ADW is designed for analytical workloads and data warehousing, where query performance is critical. To ensure optimal execution, ADW's optimizer relies heavily on its own statistics and algorithms, ignoring SQL hints by default. This behavior prevents user-provided hints from overriding the automated optimization strategies tailored for complex analytical queries.

Autonomous Transaction Processing (ATP): ATP targets transactional workloads (OLTP) and provides more flexibility. It does not ignore hints by default, allowing developers and DBAs to use hints to fine-tune query execution plans for specific transactional needs. Thus, only ADW ignores hints by default, making option C the correct answer. Options A and B are incorrect because ATP does not share ADW's default behavior, and option D incorrectly identifies ATP as the service that ignores hints.

NEW QUESTION # 152

Your customer has upgraded their on-premises 11.2 Database to 12.2. During this migration, the database was migrated to a pluggable database (PDB) and is now in production. How should the customer unplug their database to migrate to an Autonomous Database?

- A. Unplug into an XML file so that the database and XML files can be uploaded to Object Storage.
- B. Unplug into a PDB archive, which can be uploaded to Object Storage.
- C. Create a database link from the source database to the Autonomous Database environment and clone the PDB.
- D. PDBs cannot be migrated to an Autonomous Database using plug, unplug, or clone.

Answer: D

Explanation:

Migrating a PDB to Autonomous Database has limitations:

Correct Answer (B): "PDBs cannot be migrated to an Autonomous Database using plug, unplug, or clone" is true. Autonomous Database does not support direct plugging/unplugging of PDBs due to its managed architecture and differing storage/backup mechanisms.

Incorrect Options:

A: Unplugging into an XML file is valid for traditional PDBs, but Autonomous Database doesn't accept this for migration.

C: Cloning via database link isn't a standard method; it's more aligned with replication tools like GoldenGate.

D: PDB archives (e.g., .pdb files) are not supported for direct import into Autonomous Database.

Instead, use tools like Data Pump or GoldenGate for migration.
