Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q34-Q39):

NEW QUESTION # 34

There are two aggregate tables that are available for query. How would they be mapped into the logical data model so queries can use them?

- A. By creating two new logical tables sources
- B. Both A and B
- C. By creating one new Logical Table Source
- D. By opening the two logical Table Source dialog boxes and mapping the appropriate levels in the Content tab

Answer: D

Explanation:

Explanation

B: Example:

1. Configure the new source table to have the 'logical level' under the content set to 'Countries' (the summarized level)

b

2. Do the similar setting for dimension table

Now when user query the data at 'Countries' level, the query will be redirected to these summary table instead of the more detail fact table Note: Aggregate tables are Physical tables that store Aggregates of measures across multiple levels of a Hierarchy.

NEW QUESTION # 35

Content that is saved in personal and shared folders can be browsed by using which view?

- A. Favorites
- B. Catalog
- C. New -> Analysis
- D. Dashboard
- E. Home

Answer: B

Explanation:

The Catalog Manager workspace enables you to view and work with catalog objects. It displays the following folders for an open catalog:

The shared folder- Contains content that is shared among catalog users. This includes the preconfigured dashboards and analyses that are distributed with prebuilt applications, and other objects such as shared filters.

The system folder - Contains administrative elements of Presentation Services. Some of these elements are distributed with the product, and others are configured by you as the administrator, such as privileges. Avoid modifying any files in this folder.

Presentation Services uses these files internally and modifying them might cause unexpected results.

The users folder - Contains content that catalog users with the appropriate permissions have saved to their personal folders, such as individual analyses.

NEW QUESTION # 36

An organization would like to see a Time folder with subfolders for its Fiscal and Julian calendars. How would you accomplish this?

- A. By creating a Presentation Folder called -Time and then two subsequent folders called + Fiscal Calendar and + Julian Calendar
- B. By creating Presentation Folder called Time and then two subsequent folders called -> Fiscal Calendar and -> Julian Calendar
- C. By creating a Presentation Folder called ->Time called then two subsequent folders called Fiscal Calendar and Julian Calendar
- D. By creating a Presentation Folder called Time<parent> and then two subsequent folders called Fiscal Calendar<child> and Julian Calendar<child>

Answer: B

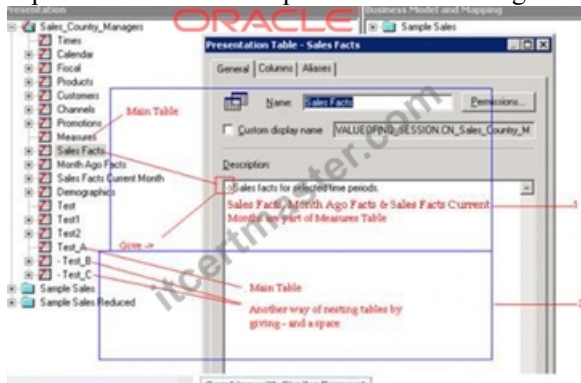

Explanation:

Explanation

You can nest presentation folders in two ways.

- 1) You can enter a hyphen and a greater than sign in the description field of the table to achieve the result.
- 2) Or, prefix the name of the presentation folder to be nested with a hyphen and a space and place it after the folder in which it nests to achieve the same result as shown below.
