

Oracle 1Z1-771 Latest Guide Files & 1Z1-771 Relevant Questions

P.S. Free 2025 Oracle 1Z1-771 dumps are available on Google Drive shared by ExamDumpsVCE: <https://drive.google.com/open?id=1jEJoP1XUhPFdhjFyLTkycgOZ7pZ82VHJ>

A dedicated team is accessible for ExamDumpsVCE customers. One can reach our 24/7 customer support team to resolve their queries. Moreover, our team will also assist users if they face any kind of trouble while using above-mentioned formats of 1Z1-771 practice material. We will offer you a refund guarantee (terms and conditions apply) as saving your money is our priority. Additionally, we offer up to 1 year of free updates and free demo of the 1Z1-771 product. Order 1Z1-771 exam questions now and get excellent these offers.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 2	Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 3	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 4	Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.

Topic 5	Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 6	Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 7	Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 8	Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 9	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.

Free PDF Quiz High Hit-Rate Oracle - 1Z1-771 Latest Guide Files

In recent years, many people are interested in Oracle certification exam. So, Oracle 1Z1-771 test also gets more and more important. As the top-rated exam in IT industry, 1Z1-771 certification is one of the most important exams. With 1Z1-771 certificate, you can get more benefits. If you want to attend the exam, ExamDumpsVCE Oracle 1Z1-771 questions and answers can offer you convenience. The dumps are indispensable and the best.

Oracle APEX Cloud Developer Professional Sample Questions (Q48-Q53):

NEW QUESTION # 48

You have an Interactive Grid component and you are enabling the Save Report functionality. As what can end users save the report type?

- A. As Private and Public only
- B. As Private and Primary only
- C. As Primary

Answer: A

Explanation:

In an Interactive Grid, the "Save Report" functionality allows end users to save customizations (e.g., filters, column order). The available options are:

Private: Saved for the individual user only, visible only to them.

Public: Saved and shared with all users of the application, if permitted by the developer.

Primary: This is a developer-defined default report, not an end-user save option. End users cannot overwrite the Primary report; they can only save as Private or Public (if enabled via the "Allow Public Reports" attribute).

This flexibility empowers users to personalize grids while allowing shared configurations, enhancing collaboration and usability.

NEW QUESTION # 49

Which two AI Service Providers are supported by Oracle APEX?

- A. OCI Generative AI
- B. Jarvis

- C. DOC Document Generator pre-built function
- **D. OpenAI**

Answer: A,D

Explanation:

Oracle APEX integrates with external AI service providers to power features like Generative AI and text generation. The supported providers are:

OpenAI: A widely recognized AI provider offering models like GPT, integrated via API keys for tasks such as text generation, summarization, or SQL authoring in APEX.

OCI Generative AI: Oracle Cloud Infrastructure's native AI service, optimized for Oracle ecosystems, providing secure, scalable AI capabilities directly within the OCI environment.

DOC Document Generator: This is not an AI service provider; it's a hypothetical or misnamed option unrelated to APEX's AI integration.

Jarvis: While a fictional AI (e.g., from Iron Man), it's not a real provider supported by APEX.

These integrations require configuration in the Instance Administration settings, including credentials and endpoints, enabling APEX to leverage cutting-edge AI for app development and runtime features.

NEW QUESTION # 50

Which three data types are supported by Oracle APEX Workflow parameters and item types?

- A. Image
- **B. CLOB**
- **C. VARCHAR**
- **D. NUMBER**

Answer: B,C,D

Explanation:

Workflow parameters and page items in APEX support:

B . NUMBER: For numeric values (e.g., 123.45), used in calculations or IDs.

C . CLOB: For large text (e.g., descriptions), stored as character large objects.

D . VARCHAR: For variable-length strings (e.g., EMPLOYEE_NAME), capped at 4000 characters in most cases.

A . Image: Not a supported data type for parameters or items; images are handled as BLOBs or file uploads, not directly as a Workflow parameter type.

These types align with Oracle Database, ensuring robust data handling in workflows.

NEW QUESTION # 51

In a faceted search page, facets can be displayed as different UI types. Which two facet item types are supported in the faceted search region?

- **A. Range**
- **B. Checkbox Group**
- C. Popup LOV
- D. Date Picker

Answer: A,B

Explanation:

In Oracle APEX, a faceted search page allows users to filter data using facets, which are displayed as UI components in the Faceted Search region. According to the Oracle APEX documentation, the supported facet item types include:

Range: Used for numeric or date ranges, allowing users to filter data within a specified range (e.g., salary or hire date).

Checkbox Group: Used for multi-select options, enabling users to select multiple values from a list (e.g., departments).

Other types like Popup LOV and Date Picker are valid item types in APEX but are not natively supported as facet types in the Faceted Search region. Popup LOV is typically used for single-value selection in forms, and Date Picker is a standalone item type, not a facet-specific UI.

NEW QUESTION # 52

Which statement is true about the Link Column attributes of an Interactive Report?

- A. A Link Column cannot be sorted, hidden, or moved by an end user.
- B. If you select Link Column, it is always displayed as the last column in the report.
- C. It is not possible to include a custom target in Link Column.
- D. It is not possible to exclude Link Column.

Answer: D

Explanation:

The Link Column in an Interactive Report adds a clickable link to each row. The true statement is:

It is not possible to exclude Link Column: Once defined in the report attributes, the Link Column is mandatory and cannot be hidden or excluded via end-user controls (e.g., Column Management). It's always rendered unless removed by the developer.

Custom target: False; custom targets (e.g., URLs, pages) can be defined.

Always last column: False; its position is configurable.

Cannot be sorted/hidden/moved: False; end users can sort or move it, though hiding is restricted.

This behavior ensures consistent navigation in reports.

NEW QUESTION # 53
