

# Oracle 1Z1-771 Practice Test - The Secret To Overcome Exam Anxiety

DOWNLOAD the newest ExamDumpsVCE 1Z1-771 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1jEJoP1XUhPFdhjFyLTkycgOZ7pZ82VHJ>

As the old saying goes, "Everything starts from reality, seeking truth from facts." This means that when we learn the theory, we end up returning to the actual application. Therefore, the effect of the user using the latest 1Z1-771 exam dump is the only standard for proving the effectiveness and usefulness of our products. I believe that users have a certain understanding of the advantages of our 1Z1-771 Study Guide, but now I want to show you the best of our 1Z1-771 training Materials - Amazing pass rate. Based on the statistics, prepare the exams under the guidance of our 1Z1-771 practice materials, the user's pass rate is up to 98% to 100%, And they only need to practice latest 1Z1-771 exam dump to hours.

## Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li></ul>

Topic 6	<ul style="list-style-type: none"> <li>• <b>Creating an APEX Application:</b> This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Creating Progressive Web Apps:</b> This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Migrating Application Development Between Environments:</b> This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• <b>Implementing Security in Your Application:</b> This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• <b>Using Themes and Theme Styles:</b> This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• <b>Leveraging Generative AI in Oracle APEX:</b> This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• <b>Creating and Using Dynamic Actions and Plug-ins:</b> This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• <b>Creating and Using Forms:</b> This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• <b>Implementing Navigation in Your Application:</b> This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• <b>Adding Computations, Processes, Validations, and Branches:</b> This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>

## 100% Pass Quiz 2025 Oracle 1Z1-771: Unparalleled Oracle APEX Cloud Developer Professional Mock Exam

ExamDumpsVCE is a legal authorized company offering the best Oracle 1Z1-771 test preparation materials. So for some candidates who are not confident for real tests or who have not enough time to prepare I advise you that purchasing valid and Latest 1Z1-771 Test Preparation materials will make you half the efforts double the results. Our products help thousands of people pass exams and can help you half the work with double the results.

### Oracle APEX Cloud Developer Professional Sample Questions (Q21-Q26):

#### NEW QUESTION # 21

What happens when you regenerate credentials for Push Notifications in Oracle APEX?

- A. A new notification server must be created.
- **B. Existing Push Subscriptions for the application will be invalidated.**
- C. Push Notifications will be disabled for the application.

**Answer: B**

#### NEW QUESTION # 22

Which statement is true about Theme Styles?

- **A. When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment.**
- B. Theme Styles control the layout of a webpage.
- C. The "Is Current" attribute of a Theme Style depends on the "Read Only" attribute.

**Answer: A**

Explanation:

Theme Styles define visual themes in APEX:

A . When the Is Public attribute is enabled: Setting "Is Public" to "Yes" in Shared Components > Theme Styles allows runtime selection (e.g., via a dropdown in the app UI), letting users switch between styles (e.g., "Vita" to "Vita - Dark").

B . Control layout: False; layout is managed by templates and regions; Theme Styles handle colors, fonts, etc.

C . "Is Current" depends on "Read Only": False; "Is Current" marks the default style, independent of "Read Only" (which locks editing).

Technical Insight: Public styles require multiple defined styles and a UI component (e.g., Dynamic Action) to expose the switcher.

Use Case: Offering light/dark mode options to users.

Pitfall: Without a switcher, "Is Public" has no visible effect.

#### NEW QUESTION # 23

Which three Theme Components are available out-of-the-box with the Universal Theme?

- **A. Comments**
- B. REST Data Sources
- **C. Badge**
- **D. Calendar**

**Answer: A,C,D**

Explanation:

The Universal Theme (Theme 42) provides pre-built components:

A . Calendar: A region type for date-based displays (e.g., events), styled with Universal Theme templates (e.g., FullCalendar integration).

B . Comments: A region type for user feedback or notes, with built-in styling and moderation options.

C . Badge: A UI component for displaying counts or statuses (e.g., "5 New"), often in navigation or lists, styled via CSS classes.

D . REST Data Sources: A data feature, not a theme component; it's a Shared Component, not a UI element tied to Universal Theme.

Technical Insight: These components leverage Universal Theme's CSS (e.g., t-Badge, t-Calendar) and JavaScript for interactivity, reducing custom coding.

Use Case: A dashboard with a Calendar for schedules, Comments for feedback, and Badges for unread alerts.

Pitfall: Customizing requires Theme Roller or CSS overrides.

#### NEW QUESTION # 24

Which two tasks can be performed by the APEX Assistant when you create an application using the "Create App using Generative AI" option?

- A. Update the App icon with a custom image.
- **B. Add a Dashboard page.**
- C. Create a Generative AI service.
- **D. Create the application blueprint.**

**Answer: B,D**

Explanation:

The "Create App using Generative AI" feature in APEX Assistant leverages natural language processing to automate application creation. When invoked:

Create the application blueprint: APEX Assistant generates a foundational structure (blueprint) for the application, including pages, regions, and navigation, based on the user's natural language input (e.g., "Create an app to manage employees"). This blueprint serves as the starting point, which developers can refine.

Add a Dashboard page: The Assistant can interpret requests for specific page types, such as dashboards, and include them in the generated app. Dashboards typically feature charts, summaries, or key metrics, and this is a common task supported by the AI-driven creation process.

Create a Generative AI service: This is not a task performed during app creation; instead, it's a prerequisite configuration step done separately in the Instance Administration settings.

Update the App icon: While app icons can be customized manually post-creation, this is not an automated task performed by APEX Assistant during the generative process.

This feature streamlines development by interpreting intent and building functional components, saving significant time compared to manual creation.

### NEW QUESTION # 25

Which two Plugin types can be created in Oracle APEX?

- A. Email Template
- B. Validation
- C. Region
- D. Process

**Answer: C,D**

Explanation:

Plugins extend APEX's functionality beyond built-in components:

C . Process: A Process plugin executes custom server-side logic (e.g., PL/SQL) during page processing or AJAX calls. Example: A plugin to sync data with an external API after form submission. It's defined with execution points and parameters.

D . Region: A Region plugin creates custom UI areas (e.g., a dynamic chart or carousel). Example: A plugin rendering a custom dashboard. It supports attributes, templates, and refresh events.

A . Validation: While validations are customizable, they're not a plugin type; they're declarative or PL/SQL-based within APEX.

B . Email Template: Email formatting is handled via APEX\_MAIL or templates in Shared Components, not as plugins.

Technical Insight: Plugins are created in Shared Components > Plug-ins, requiring PL/SQL for logic, JavaScript/CSS for UI, and a render function. For instance, a Region plugin might use apex\_plugin.t\_region to define its output.

Use Case: A Process plugin to log audit trails or a Region plugin for a unique data visualization.

Pitfall: Developing plugins requires advanced skills; test thoroughly to avoid runtime errors.

### NEW QUESTION # 26

.....

Will you feel nervous when you are in the exam, and if you do, you can try our exam dumps. 1Z1-771 Soft test engine can stimulate the real environment, through this , you can know the procedure of the real exam, so that you can release your nervous . And you can build up your confidence when you face the real exam. Besides, 1Z1-771 Exam Dumps of us offer you free update for one year after purchasing, and our system will send the latest version to you automatically. We have online and offline chat service stuff, and if you have any questions, just have chat with them.
