

Oracle Autonomous Database Cloud 2025 Professional reliable study training & 1Z0-931-25 latest practice questions & Oracle Autonomous Database Cloud 2025 Professional useful learning torrent

DOWNLOAD the newest PracticeVCE 1Z0-931-25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1OSpum_eBJcqGZO9d995dF9BwQhVNzvU

The product PracticeVCE provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the pass your 1Z0-931-25 exam by the method which is convenient for you. We check the update every day, and we can guarantee that you will get a free update service from the date of purchase. Once you have any questions and doubts about our 1Z0-931-25 Exam Questions we will provide you with our customer service before or after the sale.

Oracle 1Z0-931-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Lake Analytics with Autonomous Database: This section of the exam measures the skills of Big Data Engineers and explores how Autonomous Database can be used for analytics in data lake environments. It includes data ingestion, query optimization, and leveraging cloud-native analytics services, ensuring engineers can efficiently process and analyze large volumes of structured and unstructured data.
Topic 2	• Autonomous Database Dedicated: This section of the exam measures the skills of IT Architects and explores the workflows and functionality of Autonomous Database Dedicated and Autonomous Database Cloud@Customer. It includes provisioning dedicated resources, setting up OCI policies, monitoring infrastructure, scheduling maintenance tasks such as patching, and managing encryption keys for enhanced security. IT Architects will learn how to integrate dedicated database environments within their cloud strategy.
Topic 3	• Getting Started with Autonomous Database: This section of the exam measures the skills of Database Administrators and covers the architecture and key features of Oracle Autonomous Database. It explains how the database integrates within the Oracle ecosystem and provides an overview of different Autonomous Database offerings and their licensing models, helping administrators understand how to deploy and manage these cloud-based databases efficiently.

Topic 4	Autonomous Database Tools: This section of the exam measures the skills of Data Analysts and covers the tools available within Autonomous Databases for advanced data processing and analytics. It includes Oracle Machine Learning, APEX, and SQL Developer Web for database development, as well as data transformation, business model creation, data insights, and data analysis, allowing analysts to extract valuable insights from large datasets.
Topic 5	Migrating to Autonomous Database: This section of the exam measures the skills of Cloud Migration Specialists and covers strategies for migrating existing databases to Autonomous Database. It includes understanding migration considerations, and available options, and using Oracle Data Pump to transfer data seamlessly while minimizing downtime, ensuring smooth transitions to Oracle Cloud infrastructure.

100% Pass Quiz 2025 Oracle 1Z0-931-25: Oracle Autonomous Database Cloud 2025 Professional – Trustable Exam Experience

Oracle Autonomous Database Cloud 2025 Professional 1Z0-931-25 exam dumps are available in an eBook and software format. Many people get burdened when they hear of preparing for a Oracle Autonomous Database Cloud 2025 Professional 1Z0-931-25 examination with software. Oracle 1Z0-931-25 Practice Exam software is easy to use. You don't need to have prior knowledge or training using our 1Z0-931-25 exam questions. Oracle 1Z0-931-25 exam dumps are user-friendly interfaces.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q123-Q128):

NEW QUESTION # 123

Which option describes the connection types that third-party software can use to connect to an Autonomous Database (ADB)?

- A. SQL*NET only
- B. JDBC only
- C. New ADB-specific protocols
- **D. Any protocol supported by Oracle Net Services**

Answer: D

Explanation:

Third-party software can connect to an Autonomous Database using standard Oracle connectivity options. The correct answer is: Any protocol supported by Oracle Net Services (B): Autonomous Database leverages Oracle Net Services (also known as SQL*Net) for connectivity, supporting protocols like TCP/IP with TLS for secure communication. This allows a wide range of third-party tools (e.g., SQL Developer, Tableau, or custom applications) to connect using established Oracle networking standards. The incorrect options are:

New ADB-specific protocols (A): There are no proprietary, ADB-specific protocols; it uses Oracle's existing Net Services framework.

SQL*NET only (C): While SQLNet is part of Oracle Net Services, the broader term "Oracle Net Services" encompasses all supported protocols, not just SQLNet.

JDBC only (D): JDBC is a specific Java-based API for database connectivity, not a protocol, and it's just one of many ways to connect via Oracle Net Services.

This flexibility ensures compatibility with diverse client applications.

NEW QUESTION # 124

Which statement is FALSE about Data Insights?

- A. Data Insights display information about patterns and anomalies in the data of entities in your Oracle Autonomous Database
- B. The results of the Insight analysis appear as a series of bar charts in the Data Insights dashboard
- **C. Data Insights are automatically generated by various analytic functions built into the database**
- D. Data Insights provides a wide range of graphical data presentation capabilities

Answer: C

Explanation:

Data Insights is a feature in Autonomous Database that helps users understand their data. The false statement is:

Data Insights are automatically generated by various analytic functions built into the database (C): This is incorrect. Data Insights are not solely the result of automatic execution of built-in analytic functions (e.g., AVG, SUM, or RANK). Instead, they are generated through a combination of user-initiated analysis and Oracle's machine learning-driven capabilities within the Data Insights dashboard (part of Database Actions or OCI console). Users select datasets or tables, and the system applies algorithms to identify patterns (e.g., trends in sales) or anomalies (e.g., outlier transactions), but this process isn't just a passive outcome of pre-existing database functions—it's an active, curated feature requiring configuration. For example, a user might explore a SALES table, and Data Insights highlights a spike in Q4 sales, but this requires user input to define scope, not just automatic function output.

The true statements are:

Data Insights display information about patterns and anomalies in the data of entities in your Oracle Autonomous Database (A):

True. The feature visualizes trends (e.g., seasonal sales increases) and outliers (e.g., unexpected data drops) in tables or views, helping users spot significant data behaviors. For instance, it might show a bar chart of monthly revenue with an anomaly flagged for a sudden dip.

Data Insights provides a wide range of graphical data presentation capabilities (B): True. It offers visualizations like bar charts, line graphs, and scatter plots, customizable to represent data insights effectively. E.g., a line graph might track customer sign-ups over time, with options to adjust axes or filters.

The results of the Insight analysis appear as a series of bar charts in the Data Insights dashboard (D): True, partially. While bar charts are a common default (e.g., comparing sales by region), the dashboard supports multiple chart types, but the statement's focus on bar charts aligns with typical output for simple insights.

The misconception in C overlooks the interactive, ML-assisted nature of Data Insights, distinguishing it from passive function-based analytics.

NEW QUESTION # 125

Which statement is FALSE about Autonomous Database maintenance on Dedicated Infrastructure?

- A. Autonomous Exadata Infrastructure maintenance runs are for infrastructure patching (including patching of the Exadata grid infrastructure code and operating systems updates) and includes container database patching.
- B. You can change your container database maintenance window or reschedule a single container database maintenance run to ensure that your container database maintenance runs follow.
- C. If a scheduled container database maintenance run cannot take place, Oracle automatically reschedules the container database maintenance for the following quarter.
- D. Autonomous Exadata Infrastructure maintenance takes place at least once each quarter.

Answer: A

Explanation:

Full Detailed In-Depth Explanation:

Maintenance on dedicated infrastructure:

A: True. You can adjust maintenance windows for container databases.

B: False. Exadata Infrastructure maintenance (e.g., OS, grid patching) is separate from container database patching, which occurs independently.

C: True. Oracle reschedules missed maintenance to the next quarter.

D: True. Infrastructure maintenance occurs quarterly.

NEW QUESTION # 126

Which management operation is correct about Autonomous Databases on Shared Exadata Infrastructure?

- A. You can perform a "rolling restart" on all the Autonomous Databases. During a rolling restart, each node on the Autonomous Database is restarted separately while the remaining nodes continue to be available
- B. You can choose to use Release Update or Release Update Revision updates for your Autonomous Databases on Shared Infrastructure
- C. You cannot configure the scheduling for your Autonomous Databases on Shared Exadata Infrastructure
- D. You can skip a scheduled maintenance run. For Autonomous Database on Shared Exadata Infrastructure, you can skip maintenance runs for up to two consecutive quarters if needed

Answer: C

Explanation:

Management operations for Autonomous Databases on Shared Exadata Infrastructure are limited due to its fully managed nature.

The correct statement is:

You cannot configure the scheduling for your Autonomous Databases on Shared Exadata Infrastructure (C): In shared infrastructure, Oracle fully controls maintenance scheduling (e.g., patching, upgrades). Unlike dedicated infrastructure, where users can set maintenance windows, shared ADB users cannot adjust timing. Oracle notifies users of upcoming maintenance (e.g., via email or console), typically in a 7-day window, but the exact schedule is Oracle-driven to optimize the shared Exadata platform. For example, a quarterly patch might occur on a Tuesday at 2 AM UTC, and users must adapt, not reschedule.

The incorrect options are:

You can skip a scheduled maintenance run... (A): False. Shared infrastructure does not allow skipping maintenance runs, even for two quarters. This flexibility exists only in dedicated infrastructure, where users have more control (e.g., skipping up to two consecutive updates). In shared mode, Oracle enforces updates for security and stability across all tenants.

You can perform a "rolling restart"... (B): False. Rolling restarts (restarting nodes sequentially for availability) are not user-initiated in ADB shared infrastructure. Restarts, if needed, are managed by Oracle during maintenance, and users cannot control the process or ensure node-by-node availability.

You can choose to use Release Update or Release Update Revision updates... (D): False. In shared infrastructure, Oracle applies Release Updates (RUs) uniformly across all databases; users cannot choose between RU or Release Update Revisions (RURs), a feature reserved for dedicated deployments.

This reflects the trade-off of shared infrastructure: lower cost and management effort for less control.

NEW QUESTION # 127

Which option should you use to create a graph with Graph Studio?

- A. Graph created by a special tool downloaded from oracle.com
- B. A graph license key
- C. Graph analytics algorithms
- D. NoSQL configuration
- E. Tables in an Autonomous Database instance

Answer: E

Explanation:

Graph Studio in Autonomous Database enables graph creation and analysis:

Correct Answer (A): "Tables in an Autonomous Database instance" are used to create graphs. Graph Studio builds property graphs from relational tables by defining vertices (nodes) and edges (relationships) based on existing data, leveraging the database's schema.

Incorrect Options:

B: Graph analytics algorithms analyze existing graphs, not create them.

C: NoSQL configuration is unrelated; Graph Studio uses relational data.

D: No external tool from oracle.com is required; Graph Studio is a built-in feature.

E: A license key isn't a creation method; graph features are included with Autonomous Database.

This integrates graph capabilities with existing data.

NEW QUESTION # 128

.....

If you are busy with your study or work and have little time to prepare for your exam, choose us, we will do the rest for you.

1Z0-931-25 exam bootcamp are edited and verified by professional experts, therefore the quality and accuracy can be guaranteed.

You just need to spend about 48 to 72 hours on practicing, and you can pass the exam in your first attempt by using 1Z0-931-25

Exam Braindumps of us. We offer you free demo to have a try before buying. Online and offline chat service are available, and if you have any questions about 1Z0-931-25 exam bootcamp, you can have a conversation with us.
