100% Pass Quiz Valid Oracle - 1Z0-1126-1 - Guaranteed Oracle Guided Learning Project Management Foundations Associate - Rel 1 Questions Answers

Therefore, if you have struggled for months to pass Oracle 1Z0-1126-1 exam, be rest assured you will pass this time with the help

of our Oracle 1Z0-1126-1 exam dumps. Every 1Z0-1126-1 exam candidate who has used our exam preparation material has passed the exam with flying colors. Availability in different formats is one of the advantages valued by Oracle Guided Learning Project Management Foundations Associate - Rel 1 exam candidates. It allows them to choose the format of Oracle 1Z0-1126-1 Dumps they want. They are not forced to buy one format or the other to prepare for the Oracle 1Z0-1126-1 exam. Real4test designed Oracle exam preparation material in Oracle 1Z0-1126-1 PDF and practice test (online and offline). If you prefer PDF Dumps notes or practicing on the Oracle 1Z0-1126-1 practice test software, use either.

Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
Topic 2	Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.
Topic 3	Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.
Topic 4	Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.
Topic 5	Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which activity might be included in an effective Hypercare strategy?

- A. Do not designate change champions.
- B. Provide a clear base of operations for escalations.**
- C. Hide resources that might help end users.

Answer: B

Explanation:

Hypercare is the post-go-live support phase in OGL projects, aimed at stabilizing the system and addressing user issues swiftly. Providing a clear base of operations for escalations (option B) establishes a structured process for handling problems, ensuring support teams can respond effectively—a hallmark of an effective Hypercare strategy. Hiding resources (option A) contradicts support goals, and not designating change champions (option C) weakens advocacy and adoption, both being poor practices. Option B's focus on escalation clarity enhances user confidence and system reliability, making it the strategic choice for Hypercare success.

NEW QUESTION # 52

What is a clear sign that OGL is enabled in production?

- A. You can file your expense report.
- B. You will receive an email notification.
- C. You will see the OGL "widget."
- D. You can select infotiles on the home screen.

Answer: C

Explanation:

The OGL "widget" appearing in the host application is a clear visual indicator that OGL is enabled in Production. Other options are not specific to OGL enablement.

NEW QUESTION # 53

Which content library saves users time by keeping cloud configuration support, documentation, and "how-to" guidance easily accessible?

- A. Business Process Training
- B. Use Cases
- C. My Content
- D. Oracle Content

Answer: D

Explanation:

The Oracle Content library is a centralized repository in OGL that provides prebuilt resources, including cloud configuration support, official documentation, and "how-to" guides. This library is designed to save users time by offering readily accessible, standardized content. Business Process Training (option A) focuses on process education, My Content (option C) is for custom user-created content, and Use Cases (option D) target specific scenarios rather than broad configuration support. Oracle Content is the most efficient option for quick access to essential guidance.

NEW QUESTION # 54

Which OGL analytics dashboard provides data on how many of each type of guide is available in the OGL console?

- A. Users dashboard
- B. Activity dashboard
- C. Feedback dashboard
- D. Content dashboard

Answer: D

Explanation:

The Content dashboard in OGL provides a detailed breakdown of the content inventory within the console, including the quantity of each guide type (e.g., Base Guides, Process Guides, Smart Tips). This dashboard is essential for content management, offering visibility into the total number and categories of guides available, whether in Draft, Published, or Archived status. The Users dashboard (option A) focuses on user activity and login metrics, the Activity dashboard (option B) tracks guide usage and engagement over time, and the Feedback dashboard (option D) analyzes user ratings and comments. Only the Content dashboard

directly addresses the question of "how many" by type, making it indispensable for content audits and planning, ensuring teams know the scope of their resources.

NEW QUESTION # 55

In the Enable phase, which activities are the Organizational Change and Training Leads responsible for?

- A. Communicating known and new issues, and workarounds that will impact users
- B. Establishing mechanisms for collecting feedback and insights from end users
- C. **Developing knowledge and skills with project governance plans**

Answer: C

Explanation:

In the Enable phase of an OGL project, Organizational Change and Training Leads focus on developing knowledge and skills among users and stakeholders, often aligned with project governance plans to ensure adoption and competency (option C). This phase emphasizes training delivery and change management to enable successful use of OGL. Establishing feedback mechanisms (option A) and communicating issues (option B) are typically responsibilities of other roles (e.g., administrators or support leads) during later phases like Refine or Hypercare. Option C reflects the Leads' strategic role in building capability, ensuring the organization is equipped to leverage OGL effectively as part of the broader deployment approach.

NEW QUESTION # 56

.....

These Oracle Guided Learning Project Management Foundations Associate - Rel 1 (1Z0-1126-1) practice test covers all the topics of the 1Z0-1126-1 test and includes real 1Z0-1126-1 questions.
