

Oracle New Test Question 1Z0-1127-25 - Realistic New Oracle Cloud Infrastructure 2025 Generative AI Professional Test Question Pass Guaranteed

BTW, DOWNLOAD part of TrainingDumps 1Z0-1127-25 dumps from Cloud Storage: https://drive.google.com/open?id=1XWT2j4glFVgiNcWIVi3uEH_VPoBjlx-w

Do you long to get the 1Z0-1127-25 certification to improve your life? Are you worried about how to choose the 1Z0-1127-25 learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. The 1Z0-1127-25 latest question from our company can help people get their 1Z0-1127-25 certification in a short time.

Oracle 1Z0-1127-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Using OCI Generative AI Service: This section evaluates the expertise of Cloud AI Specialists and Solution Architects in utilizing Oracle Cloud Infrastructure (OCI) Generative AI services. It includes understanding pre-trained foundational models for chat and embedding, creating dedicated AI clusters for fine-tuning and inference, and deploying model endpoints for real-time inference. The section also explores OCI's security architecture for generative AI and emphasizes responsible AI practices.
Topic 2	Fundamentals of Large Language Models (LLMs): This section of the exam measures the skills of AI Engineers and Data Scientists in understanding the core principles of large language models. It covers LLM architectures, including transformer-based models, and explains how to design and use prompts effectively. The section also focuses on fine-tuning LLMs for specific tasks and introduces concepts related to code models, multi-modal capabilities, and language agents.
Topic 3	Implement RAG Using OCI Generative AI Service: This section tests the knowledge of Knowledge Engineers and Database Specialists in implementing Retrieval-Augmented Generation (RAG) workflows using OCI Generative AI services. It covers integrating LangChain with Oracle Database 23ai, document processing techniques like chunking and embedding, storing indexed chunks in Oracle Database 23ai, performing similarity searches, and generating responses using OCI Generative AI.
Topic 4	Using OCI Generative AI RAG Agents Service: This domain measures the skills of Conversational AI Developers and AI Application Architects in creating and managing RAG agents using OCI Generative AI services. It includes building knowledge bases, deploying agents as chatbots, and invoking deployed RAG agents for interactive use cases. The focus is on leveraging generative AI to create intelligent conversational systems.

Pass Guaranteed Oracle 1Z0-1127-25 - Oracle Cloud Infrastructure 2025 Generative AI Professional Updated New Test Question

We hope that you can use your time as much as possible for learning on the 1Z0-1127-25 practice questions. So we have considered every detail of the 1Z0-1127-25 study guide to remove all unnecessary programs. If you try to download our 1Z0-1127-25 study materials, you will find that they are so efficient! And even you free download the demos on the website, you can feel the convenience and efficiency. It is simple and easy to study with our 1Z0-1127-25 learning braindumps.

Oracle Cloud Infrastructure 2025 Generative AI Professional Sample Questions (Q18-Q23):

NEW QUESTION # 18

What does a cosine distance of 0 indicate about the relationship between two embeddings?

- A. They have the same magnitude
- **B. They are similar in direction**
- C. They are completely dissimilar
- D. They are unrelated

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation=

Cosine distance measures the angle between two vectors, where 0 means the vectors point in the same direction (cosine similarity = 1), indicating high similarity in embeddings' semantic content-Option C is correct. Option A (dissimilar) aligns with a distance of 1. Option B is vague-directional similarity matters. Option D (magnitude) isn't relevant-cosine ignores magnitude. This is key for semantic comparison.

OCI 2025 Generative AI documentation likely explains cosine distance under vector database metrics.

NEW QUESTION # 19

What differentiates Semantic search from traditional keyword search?

- **A. It involves understanding the intent and context of the search.**
- B. It depends on the number of times keywords appear in the content.
- C. It is based on the date and author of the content.
- D. It relies solely on matching exact keywords in the content.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation=

Semantic search uses embeddings and NLP to understand the meaning, intent, and context behind a query, rather than just matching exact keywords (as in traditional search). This enables more relevant results, even if exact terms aren't present, making Option C correct. Options A and B describe traditional keyword search mechanics. Option D is unrelated, as metadata like date or author isn't the primary focus of semantic search. Semantic search leverages vector representations for deeper understanding.

OCI 2025 Generative AI documentation likely contrasts semantic and keyword search under search or retrieval sections.

NEW QUESTION # 20

Which role does a "model endpoint" serve in the inference workflow of the OCI Generative AI service?

- **A. Serves as a designated point for user requests and model responses**
- B. Updates the weights of the base model during the fine-tuning process
- C. Hosts the training data for fine-tuning custom models
- D. Evaluates the performance metrics of the custom models

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation=

A "model endpoint" in OCI's inference workflow is an API or interface where users send requests and receive responses from a deployed model-Option B is correct. Option A (weight updates) occurs during fine-tuning, not inference. Option C (metrics) is for evaluation, not endpoints. Option D (training data) relates to storage, not inference. Endpoints enable real-time interaction. OCI 2025 Generative AI documentation likely describes endpoints under inference deployment.

NEW QUESTION # 21

Which is a distinctive feature of GPUs in Dedicated AI Clusters used for generative AI tasks?

- **A. The GPUs allocated for a customer's generative AI tasks are isolated from other GPUs.**
- B. GPUs are used exclusively for storing large datasets, not for computation.
- C. GPUs are shared with other customers to maximize resource utilization.
- D. Each customer's GPUs are connected via a public Internet network for ease of access.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation=

In Dedicated AI Clusters (e.g., in OCI), GPUs are allocated exclusively to a customer for their generative AI tasks, ensuring isolation for security, performance, and privacy. This makes Option B correct. Option A describes shared resources, not dedicated clusters. Option C is false, as GPUs are for computation, not storage. Option D is incorrect, as public Internet connections would compromise security and efficiency.

OCI 2025 Generative AI documentation likely details GPU isolation under Dedicated AI Clusters.

NEW QUESTION # 22

How are documents usually evaluated in the simplest form of keyword-based search?

- A. Based on the number of images and videos contained in the documents
- **B. Based on the presence and frequency of the user-provided keywords**
- C. According to the length of the documents
- D. By the complexity of language used in the documents

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation=

In basic keyword-based search, documents are evaluated by matching user-provided keywords, with relevance often determined by their presence and frequency (e.g., term frequency in TF-IDF). This makes Option C correct. Option A (language complexity) is unrelated to simple keyword search. Option B (multimedia) isn't considered in text-based keyword methods. Option D (length) may influence scoring indirectly but isn't the primary metric. Keyword search prioritizes exact matches.

OCI 2025 Generative AI documentation likely contrasts keyword search with semantic search under retrieval methods.

NEW QUESTION # 23

.....

Our 1Z0-1127-25 real materials support your preferences of different practice materials, so three versions are available. PDF version - legible to read and remember, support customers' printing request. Software version of 1Z0-1127-25 real materials - supporting simulation test system, and support Windows system users only. App online version of 1Z0-1127-25 Guide question - suitable to all kinds of equipment or digital devices, supportive to offline exercises on the condition that you practice it without mobile data. You can take a look of these 1Z0-1127-25 exam dumps and take your time to decide.
