

Oracle - Newest 1Z0-1111-25 - Study Guide Oracle Cloud Infrastructure 2025 Observability Professional Pdf

In today's society, our pressure grows as the industry recovers and competition for the best talents increases. By this way the 1Z0-1111-25 exam is playing an increasingly important role to assess candidates. Considered many of our customers are too busy to study, the 1Z0-1111-25 real study dumps designed by our company were according to the real exam content, which would help you cope with the 1Z0-1111-25 Exam with great ease. With about ten years' research and development we still keep updating our 1Z0-1111-25 prep guide, in order to grasp knowledge points in accordance with the exam, thus your study process would targeted and efficient.

As long as you free download the demos of our 1Z0-1111-25 exam braindumps, you will be surprised by the high quality. It is all about the superior concrete and precision of our 1Z0-1111-25 learning quiz that help. Every page and every points of knowledge have been written from professional experts who are proficient in this line who are being accounting for this line over ten years. Come and buy our 1Z0-1111-25 Study Guide, you will be benefited from it.

>> Study Guide 1Z0-1111-25 Pdf <<

100% Pass 2025 Oracle Study Guide 1Z0-1111-25 Pdf

We have hired professional staff to maintain 1Z0-1111-25 practice engine and our team of experts also constantly updates and renew the question bank according to changes in the syllabus. With 1Z0-1111-25 learning materials, you can study at ease, and we will help you solve all the problems that you may encounter in the learning process. If you have any confusion about our 1Z0-1111-25 Exam Questions, just contact us and we will help you out.

Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

You are working on a project to automate the deployment of Oracle Cloud Infrastructure (OCI) compute instances that are pre-configured with web services. As part of the deployment workflow, you also need to create a corresponding OCI object storage bucket bearing the same name as that of the compute instance. Which of these two options can help you achieve this requirement? (Choose two.)

- A. Events Service
- **B. Service Connector Hub**
- C. Cloud Agent Plugin for the compute instance
- D. OCI CLI command, `oci os bucket create auto`
- **E. Oracle Functions**

Answer: B,E

Explanation:

To automate the creation of an OCI Object Storage bucket with the same name as a compute instance during deployment, you need a mechanism to detect the instance creation event and trigger an action to create the bucket. Two OCI services that can achieve this are Service Connector Hub and Oracle Functions, used in conjunction with the Events Service.

Service Connector Hub (B): This service acts as a cloud message bus that facilitates data movement between OCI services. You can configure a service connector with the Events Service as the source (to detect compute instance creation events, e.g., `com.oraclecloud.computeapi.launchinstance.end`) and Oracle Functions as the target. The service connector filters and routes the event to trigger a function.

Oracle Functions (C): This is a serverless platform that allows you to write and execute code in response to events. You can create a function that retrieves the compute instance name from the event payload and uses the OCI SDK or API to create an Object Storage bucket with the same name.

Why not A, D, or E alone?

Cloud Agent Plugin (A): This is used for monitoring and managing compute instances but does not directly support bucket creation automation.

OCI CLI command (D): The command `oci os bucket create auto` is not a valid OCI CLI command (`oci os bucket create` is valid but requires manual invocation or scripting, not event-driven automation).

Events Service (E): While critical for detecting instance creation, it alone cannot execute the logic to create a bucket-it needs a target like Functions or Notifications.

This solution leverages the event-driven architecture of OCI, combining Events Service (implicitly used with Service Connector Hub) and Oracle Functions for execution.

NEW QUESTION # 26

Choose two FluentD scenarios that apply when using continuous log collection with client-side processing. (Choose two.)

- A. Comprehensive monitoring for OKE/Kubernetes
- B. Monitoring systems that are not currently supported by Management Agent
- C. Managing apps/services which push logs to Object Storage
- D. Log Source

Answer: A,C

Explanation:

FluentD is an open-source data collector used for continuous log collection with client-side processing in OCI Logging. Two applicable scenarios are:

Managing apps/services which push logs to Object Storage (A): FluentD can be configured to collect logs from applications or services (e.g., Oracle Functions) that write logs to Object Storage buckets. It processes these logs client-side and forwards them to OCI Logging or Logging Analytics.

Comprehensive monitoring for OKE/Kubernetes (B): FluentD is widely used in Kubernetes environments like Oracle Container Engine for Kubernetes (OKE) to collect logs from pods, containers, and nodes. It processes these logs locally before sending them to OCI services for analysis.

Why not C or D?

Monitoring unsupported systems (C): While possible, this is not a primary FluentD scenario in OCI-it's more about extending Management Agent capabilities.

Log Source (D): This is a component of Logging Analytics, not a FluentD scenario.

FluentD's flexibility makes it ideal for these use cases in OCI's observability ecosystem.

NEW QUESTION # 27

In Application Performance Monitoring (APM), a distributed tracing user initiates a request through a browser. What is the first span called?

- A. Ajax call
- B. Trace ID
- C. Root span

Answer: C

Explanation:

In distributed tracing within OCI APM:

Root span (C): The first span in a trace, representing the entry point of a user request (e.g., an HTTP request from a browser). It has no parent span and initiates the chain of subsequent spans across services.

Why not A or B?

Ajax call (A): A type of request, not a span term.

Trace ID (B): A unique identifier for the entire trace, not a span.

The root span is foundational to tracing a request's journey.

NEW QUESTION # 28

In Application Performance Monitoring (APM), a distributed tracing user initiates a request through a browser. What is the first span called?

- A. Ajax call
- B. Trace ID
- C. Root span

Answer: C

Explanation:

In distributed tracing within OCI APM:

Root span (C): The first span in a trace, representing the entry point of a user request (e.g., an HTTP request from a browser). It has no parent span and initiates the chain of subsequent spans across services.

Why not A or B?

Ajax call (A): A type of request, not a span term.

Trace ID (B): A unique identifier for the entire trace, not a span.

The root span is foundational to tracing a request's journey.

NEW QUESTION # 29

Which is one of the primary use cases for the Oracle Cloud Infrastructure (OCI) Observability and Management (O&M) Logging Analytics service?

- A. Centralize and relocate any log based on a subscription model
- B. Monitor, aggregate, index, and analyze log data
- C. Create OCI resources automatically based on log events and reports

Answer: B

Explanation:

Logging Analytics is a core O&M service:

Monitor, aggregate, index, and analyze log data (A): Collects logs from OCI and external sources, indexes them for search, and provides analytics (e.g., clustering) to monitor and troubleshoot systems.

Why not B or C?

B: Log centralization occurs, but "subscription model" isn't a feature.

C: Resource creation is an Events Service use case, not Logging Analytics.

This is its primary observability role.

NEW QUESTION # 30

.....

Once you purchase the 1Z0-1111-25 exam dumps from Actual4dump you can use it in three forms Oracle PDF Questions format, web-based software, and desktop Oracle 1Z0-1111-25 practice test. Candidates can use Oracle Cloud Infrastructure 2025 Observability Professional pdf questions file on their mobiles, laptop tablets, or any other device. Candidates can install the 1Z0-1111-25 Practice Exam software on their desktops to attempt the Oracle 1Z0-1111-25 practice test even when they are offline.

Valid Real 1Z0-1111-25 Exam: <https://www.actual4dump.com/Oracle/1Z0-1111-25-actualtests-dumps.html>

The 1Z0-1111-25 exam torrent is free update to you for a year after purchase, Oracle Study Guide 1Z0-1111-25 Pdf Note: don't forget to check your spam.) 1, 1Z0-1111-25 latest pdf vce provides you the simplest way to clear exam with little cost, We are

committed to invest all efforts to making every customers get Oracle Valid Real 1Z0-1111-25 Exam examination certification, You can instantly download Oracle Cloud Infrastructure 2025 Observability Professional 1Z0-1111-25 PDF questions file, desktop practice test software, and web-based Oracle 1Z0-1111-25 practice test software.

Structure is perhaps one of the most critical components of 1Z0-1111-25 Flexible Testing Engine a presentation, After reviewing these materials, you need to jump into the development of your first application.

The 1Z0-1111-25 Exam Torrent is free update to you for a year after purchase, Note: don't forget to check your spam.) 1, 1Z0-1111-25 latest pdf vce provides you the simplest way to clear exam with little cost.

Free PDF Oracle - The Best Study Guide 1Z0-1111-25 Pdf

We are committed to invest all efforts to making 1Z0-1111-25 every customers get Oracle examination certification, You can instantly download Oracle Cloud Infrastructure 2025 Observability Professional 1Z0-1111-25 PDF questions file, desktop practice test software, and web-based Oracle 1Z0-1111-25 practice test software.
