

Oracle Planning and Collaboration Cloud 2024 Implementation Professional exam test & 1z0-1066-24 test training material

P.S. Free & New 1z0-1066-24 dumps are available on Google Drive shared by ExamDumpsVCE: https://drive.google.com/open?id=1wiU5hbSTN3Lf_G1Y3x186U88dP7Sm-sw

The learners' learning conditions are varied and many of them may have no access to the internet to learn our 1z0-1066-24 study materials. If the learners leave home or their companies they can't link the internet to learn our 1z0-1066-24 study materials. But you use our APP online version you can learn offline. If only you use the 1z0-1066-24 study materials in the environment of being online for the first time you can use them offline later. So it will be very convenient for every learner because they won't worry about when they go out or go to the remote area that they can't link the internet to learn our 1z0-1066-24 Study Materials, and they can use our APP online version to learn at any place or time. That's the great merit of our APP online version and the learners who have difficulties in linking the internet outside their homes or companies can utilize this advantage, they can learn our 1z0-1066-24 study materials at any place.

Work hard and practice with our Oracle 1z0-1066-24 dumps till you are confident to pass the Oracle 1z0-1066-24 exam. And that too with flying colors and achieving the Oracle 1z0-1066-24 Certification on the first attempt. You will identify both your strengths and shortcomings when you utilize 1z0-1066-24 practice exam software (desktop and web-based).

100% Pass Quiz Oracle - 1z0-1066-24 - The Best Latest Oracle Planning and Collaboration Cloud 2024 Implementation Professional Cram Materials

Your personal experience will defeat all advertisements that we post before. When you enter our website, you can download the free demo of 1z0-1066-24 exam software. We believe you will like our dumps that have helped more candidates Pass 1z0-1066-24 Exam after you have tried it. Using our exam dump, you can easily become IT elite with 1z0-1066-24 exam certification.

Oracle 1z0-1066-24 Exam Syllabus Topics:

Topic	Details
Topic 1	Using Supply Plans: This part measures the skills of supply chain planners in creating, duplicating, and managing supply plans. It involves setting up safety stock options, executing supply plans, and interpreting results.
Topic 2	Configuring Exceptions: This section tests the expertise of supply chain managers in setting up and analyzing exceptions, ensuring they can identify and resolve issues within supply plans and demand forecasts.

Topic 3	Using Backlog Management: This section evaluates the skills of managers in setting up and managing backlog processes to ensure timely fulfillment of orders and reduce backlog issues.
Topic 4	Configuring Planning Analytics: Here, supply chain consultants are assessed on their ability to configure planning analytics to generate actionable insights that enhance decision-making within the supply chain.
Topic 5	Managing Supply Network Model: Designed for supply chain managers and planners, this section assesses their ability to summarize attributes of the supply network model, manage sourcing and approved suppliers, apply item attributes for supply planning, and handle drop shipments. It also addresses planning for counter sales orders.
Topic 6	Managing Constraint-based Plans: Supply chain planners are assessed on their ability to develop and manage constraint-based supply plans that consider both material and resource constraints.
Topic 7	Managing Advanced Fulfillment: This part assesses the knowledge of logistics and fulfillment managers in managing complex fulfillment processes such as contract manufacturing, back-to-back fulfillment, and configure-to-order within the supply chain.
Topic 8	Understanding Costing and Inventory: Aimed at supply chain managers, this part tests their knowledge of inventory and costing management within the Oracle Supply Chain, ensuring cost-effective and efficient inventory control.
Topic 9	Using Sales and Operations Planning: This segment evaluates the skills of S&OP managers in configuring and integrating Sales and Operations Planning (S&OP) with Oracle SCM Cloud and external systems, aligning demand, supply, and financial objectives.
Topic 10	Using Demand Management: This segment assesses the competency of demand planners and supply chain analysts in configuring, running, and managing demand plans.
Topic 11	Using Production Scheduling: Supply chain managers and planners are tested on their ability to configure and execute production scheduling to improve efficiency in production timelines and resource management.
Topic 12	Managing Replenishment Planning: Supply chain managers are assessed on their expertise in configuring replenishment planning, utilizing multi-dimensional demand segments, and balancing inventory through clustering techniques.
Topic 13	Managing Supply Chain Collaboration: This section measures the ability of supply chain collaboration managers to use Oracle tools for facilitating collaboration on supply planning, contract management, and customer demand management.
Topic 14	Evaluating Simulations: Supply chain planners are tested on their skills in evaluating and executing simulations, enabling them to predict outcomes and develop effective strategies under different supply chain conditions.
Topic 15	Configuring Oracle Supply Chain Planning Cloud: This section evaluates the expertise of supply chain managers in setting up key functionalities within Oracle Supply Chain Planning Cloud. It covers configuring pages, tile sets, tables, and graphs, as well as managing planners, configuring security, and setting profile options, all while ensuring optimal use of Demand Management.

Oracle Planning and Collaboration Cloud 2024 Implementation Professional Sample Questions (Q100-Q105):

NEW QUESTION # 100

Which statement is true about the Production Scheduling Gantt chart?

- A. You can view a Gantt chart or the Dispatch List, but not both at the same time.
- B. The Gantt chart identifies idle time, changeovers, and downtime.
- C. The Gantt chart is read only, but you can change colors, sizing, and perform filtering.

- D. Metrics displayed above the Gantt chart include Late Demands, Late Work Order, Early Work Orders, and Changeover Time.

Answer: B

NEW QUESTION # 101

Planners are complaining about getting too many exception messages, some of which have minima value for evaluating plan health. Which three solutions could reduce message clutter? (Choose three.)

- A. Go to Configure Exceptions, and specify a threshold for various messages.
- B. Go to Configure Exception Sets, and for the currently used exception set, specify a threshold for various messages.
- C. Go to Configure Exception Sets, create a new set with only the messages the planners care about, and then, set all supply plans to use this new exception set.
- D. Go to Configure Exception Sets, duplicate the currently used exception set, remove the undesired messages from the duplicate set, then assign the duplicate set to all plans.

Answer: B,C,D

NEW QUESTION # 102

Your buyers are very attentive in maintaining the approved supplier lists as needed. One of your planners regularly uses the portal to communicate with some of their key suppliers and has noticed that the publication process is taking a lot longer to complete because the business has grown. The planner is also complaining that the collaboration candidates' list is cluttered with items that are not yet required.

Which two steps should you take to address the planner's complaint?

- A. Disable the decomposition and generate candidates' parameters in the Publish Order Forecast scheduled process.
- B. Activate the "Ignore for Supplier Collaboration" item attribute.
- C. Activate a Supply Chain Collaboration setting to ignore zero forecast combinations.
- D. Activate a profile option called "Publish Order Forecast Using Sourcing Rules".

Answer: B,C

Explanation:

To improve performance and reduce unnecessary items in the collaboration candidates list, you can activate settings to ignore zero forecast combinations, which prevents items with no forecast from appearing in the candidates list. Additionally, activating the "Ignore for Supplier Collaboration" attribute for specific items ensures that these are excluded from supplier collaboration processes, streamlining the list to relevant items only. These options help in managing supply collaboration settings efficiently and are verified in Oracle documentation on Supply Chain Collaboration and Publish Order Forecast processes

NEW QUESTION # 103

Segmentation was last run many months ago and the replenishment planner is concerned about losing track of items whose policies get changed due to the upcoming resegmentation. There are also a lot of manually assigned segments that must be preserved. Which two approaches for Execute Segmentation should you use in this planner?

- A. Retain segment overrides should be selected.
- B. Save the last segmentation result should be selected.
- C. Auto-approve segmentation changes should not be selected.
- D. No other setting is needed.

Answer: A,B

Explanation:

Selecting "Save the last segmentation result" archives the current state, preserving historical data for tracking, while "Retain segment overrides" ensures that manually assigned segments are maintained, even after resegmentation. These options help mitigate disruption to existing manual segmentations during updates

NEW QUESTION # 104

How does the Demand Fulfillment view prioritize at-risk demands?

- A. Based on order value weighted by the number of associated recommendations required to make the demand no longer at risk
- B. Based on order value weighted by the number of compression days required to make the demand no longer at risk
- C. Based on the order value per customer weighted by the number of associated recommendations required to make the demand no longer at risk
- D. Based on the number of associated recommendations required to make the demand no longer at risk

Answer: A

Explanation:

Review and Improve Your Demand Fulfillment

To improve the demand fulfillment of your plan, use the Demand Fulfillment table to review the at-risk demands in your plan and their related recommendations. You can take actions to accept recommendations from this page.

In the Demand Fulfillment UI, you can:

View prioritized at-risk demands based on order values weighted by the number of associated recommendations.

Take actions to accept or mark recommendations as complete.

Review summary information provided for the current demand fulfillment position of your plan to analyze the potential for improvement based on selected at-risk demands. The information also provides an understanding of the expected demand fulfillment position based on accepted and completed recommendations.

To review and improve your demand fulfillment:

In a Supply Planning, Planning Central, or Demand and Supply work area, select the Manage Plans task.

On the Manage Plans page, search for and open your plan.

In the Page Layout list, select Plan Summary.

Note that the tiles in the Plan Summary layout include a Demand at Risk in thousands tile.

In the Demand at Risk in thousands tile, click the Select Tile bar to review the Demand at Risk Summary data.

You can review the demand at risk data through a treemap view or a table view, the treemap view is the default. To switch to the table view, click the Show Table icon.

To review the demand at risk data:

Using the treemap: Click an area in the treemap. Typically, you want to start with the area that has the highest demand at risk value.

From the Drill To actions, click Demand Fulfillment.

Using the table: Click the Show Table icon. In the Demand at Risk Summary table, click a cell. Typically, you want to start with the cell that has the highest demand at risk value. From the Drill To actions, click Demand Fulfillment.

The Demand Fulfillment UI shows the individual orders that are at-risk and their related recommendations.

Tip: You can open the Demand Fulfillment table directly without drilling from the Plan Summary. After you open a plan, click the Open button at the page level. In the Open Table, Graph, or Tile Set dialog box, search for and select the Demand Fulfillment table. In the Demand Fulfillment UI, you can search for at-risk demands by using the filter fields in the search panel.

NEW QUESTION # 105

.....

If you have been very panic sitting in the examination room, our 1z0-1066-24 actual exam allows you to pass the exam more calmly and calmly. After you use our products, our 1z0-1066-24 study materials will provide you with a real test environment before the 1z0-1066-24 Exam. After the simulation, you will have a clearer understanding of the exam environment, examination process, and exam outline. And our 1z0-1066-24 learning guide will be your best choice.
