

Outstanding 1z0-915-1 Learning Guide bring you veracious Exam Simulation - PassTorrent

P.S. Free 2025 Oracle 1z0-915-1 dumps are available on Google Drive shared by PassTorrent: <https://drive.google.com/open?id=12kshDV5WiEWGUkmlTzYPUlt2xp0nxiM0>

Are you often regretful that you have purchased an inappropriate product? Unlike other platforms for selling test materials, in order to make you more aware of your needs, 1z0-915-1 study materials provide sample questions for you to download for free. You can use the sample questions to learn some of the topics about 1z0-915-1 study materials and familiarize yourself with the 1z0-915-1 software in advance. If you feel that the 1z0-915-1 study materials are satisfying to you, you can choose to purchase our complete question bank. After the payment, you will receive the email sent by the system within 5-10 minutes. Click on the login to start learning immediately with 1z0-915-1 study materials. No need to wait.

If you are finding a study material to prepare your exam, our material will end your search. Our 1z0-915-1 exam torrent has a high quality that you can't expect. I think our Oracle MySQL HeatWave Implementation Associate Rel 1 prep torrent will help you save much time, and you will have more free time to do what you like to do. I can guarantee that you will have no regrets about using our 1z0-915-1 Test Braindumps. When the time for action arrives, stop thinking and go in, try our 1z0-915-1 exam torrent, you will find our products will be a very good choice for you to pass your exam and get your certificate in a short time.

1z0-915-1 questions & answers are valid, covering the whole chapter in the actual test and the key points. You can take 1z0-915-1 pdf torrent as your study reference. After you get the 1z0-915-1 exam dumps, do not worry about the update, because one year free update is provided to you. Please pay attention to your payment email and check if there is any 1z0-915-1 Updated Dumps. Dear, if you have any questions about 1z0-915-1 study torrent, you can contact us by email or online chat as you like. In addition, we have money back guarantee, in case of failure, we will give you full refund.

Oracle 1z0-915-1 Exam Syllabus Topics:

Topic	Details
Topic 1	MySQL HeatWave Service: For database administrators, cloud architects, and DevOps engineers, this section of the exam covers identifying key features and benefits, describing MySQL HeatWave architecture, defining MySQL HeatWave terminology, and identifying MySQL HeatWave limitations.
Topic 2	Managing DB systems: For network administrators and cloud infrastructure specialists, this domain of the exam covers demonstrating a command of DRG and DRG Attachments, applying BGP in the OCI environment, evaluating OCI VPN Services, and validating the various FastConnect products from OCI.

Topic 3	• Read Replicas: For database architects and replication specialists, this domain of the exam covers creating and managing read replicas, describing the read replica load balancer, connecting to a read replica, etc.
Topic 4	• Data Migrations: For data migration specialists and database administrators, this part of the exam covers creating a DB system with data import, importing data into a DB system, and exporting data from MySQL servers and DB systems.
Topic 5	• Provisioning and Connecting DB systems: For system administrators and database engineers, this part of the exam covers identifying VCN requirements for provisioning DB systems, connecting to DB systems with OCI Bastion, connecting to DB systems with MySQL Shell, connecting to DB systems with OCI Cloud Shell, connect to DB system with OCI SQL Worksheet, and authenticate DB system with OCI Identify Access Management credentials.
Topic 6	• Inbound Replication: For database administrators and replication experts, this section of the exam covers setting up and troubleshoot inbound replication and creating channels.

Oracle MySQL HeatWave Implementation Associate Rel 1 Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which two are true about creating a Bastion service to connect to a MySQL DB system? (Choose two.)

- A. The Bastion service must be in the same VCN as the DB system.
- B. The Bastion service must have a public IP address.
- C. The Bastion subnet must have an ingress rule to allow stateful connections on the MySQL DB system port number.
- D. The Bastion CIDR block allowlist must include the IP address of the DB system.
- E. The Bastion CIDR block allowlist must include the IP address of all valid client machines.

Answer: C,E

Explanation:

When creating a Bastion service to connect to a MySQL DB system, the following are true:

* The Bastion CIDR block allowlist must include the IP address of all valid client machines(Answer C):

This ensures that only the IP addresses specified in the allowlist can access the Bastion service, enhancing security by restricting access to known clients.

* The Bastion subnet must have an ingress rule to allow stateful connections on the MySQL DB system port number(Answer E):

This allows the Bastion service to communicate with the MySQL DB system by permitting traffic through the necessary ports.

References:

* OCI Bastion Service Documentation

* Setting Up Bastion with MySQL DB System

NEW QUESTION # 31

Which two methods can you use to import data into a MySQL DB system by using MySQL Shell? (Choose two.)

- A. `util.loadDump()`
- B. `util.dumpSchemas()`
- C. `util.importTable()`
- D. `util.dumpInstance()`

Answer: A,C

Explanation:

Two methods to import data into a MySQL DB system using MySQL Shell are:

`A.util.importTable()`: This utility imports data from a file into a table. `D.util.loadDump()`: This utility loads a previously dumped database or table into a MySQL DB system.

NEW QUESTION # 32

The first query has an estimated cost of 100,000,000 and is offloaded to a HeatWave cluster for execution:

SELECT flightno, departure, country FROM flight JOIN airport_geo ON 'flightno'=airport_id; The second query has an estimated cost of 10,000 and is NOT offloaded to the Heatwave cluster for execution:

SELECT DISTINCT country FROM airport_geo ORDER BY country;

Which two methods can offload the second query to the Heatwave cluster for execution? (Choose two.)

- A. SET use_secondary_engine=FORCED;
- B. SET optimizer_trace="enabled=on";
- C. CALL sys.heatwave_load(['airport_geo']);
- D. SET secondary_engine_cost_threshold=1000;
- E. CALL sys.heatwave_advisor(JSON_OBJECT("auto_enc", JSON_OBJECT("mode", "recommend")));

Answer: A,D

Explanation:

To offload the second query to the HeatWave cluster for execution, you can use the following methods:

* SET use_secondary_engine=FORCED(Answer A): This forces the use of the HeatWave secondary engine for query execution, regardless of the estimated cost.

* SET secondary_engine_cost_threshold=1000(Answer B): This lowers the cost threshold for queries to be offloaded to the HeatWave cluster, allowing queries with lower estimated costs to be offloaded.

Steps:

* Before running the second query, execute SET use_secondary_engine=FORCED; to force the offloading of queries to HeatWave.

* Alternatively, execute SET secondary_engine_cost_threshold=1000; to adjust the cost threshold, making the second query eligible for offloading.

NEW QUESTION # 33

Which two methods can be used to stop a DB system? (Choose two.)

- A. Use the STOP action on the DB system details page in the OCI Console.
- B. Run the SHUTDOWN SQL statement from any connected client logged in as the admin user.
- C. Execute the mysql db-system stop command from OCI CLI.
- D. Run the shutdown command from a mysqladmin client logged in as the admin user.

Answer: A,C

Explanation:

You can stop a MySQL DB system using the following methods:

A. Use the STOP action on the DB system details page in the OCI Console: This is a straightforward way to stop the DB system via the Oracle Cloud Infrastructure web interface. D. Execute the mysql db-system stop command from OCI CLI: This command uses the Oracle Cloud Infrastructure Command Line Interface to stop the DB system programmatically.

NEW QUESTION # 34

You want to migrate an on-premises MySQL database to MySQL HeatWave by exporting the MySQL database with MySQL Shell util.dumpInstance.

What is the purpose of the ocimds: true option?

- A. It enables all MySQL HeatWave compatibility options.
- B. It returns an error if the database has any incompatibilities with MySQL HeatWave.
- C. It launches a new DB system and imports the data concurrently with the export operation.
- D. It stores the exported files in OCI Object Storage.

Answer: D

Explanation:

The purpose of the ocimds: true option in the util.dumpInstance command is to:

D. It stores the exported files in OCI Object Storage: This option ensures that the exported database files are stored directly in Oracle Cloud Infrastructure Object Storage.

NEW QUESTION # 35
