Pass-Sure Exam 1z0-591 Course – Updated Latest Dumps Ppt Provider for 1z0-591: Oracle Business Intelligence Foundation Suite 11g Essentials

As long as you are willing to exercise on a regular basis, the exam will be a piece of cake, because what our 1z0-591 practice questions include are quintessential points about the exam. They are almost all the keypoints and the latest information contained in our 1z0-591 Study Materials that you have to deal with in the real exam. And we have high pass rate of our 1z0-591 exam questions as 98% to 100%. It is hard to find in the market.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q104-Q109):

NEW QUESTION # 104

Security Manager is used for_____.

- A. Setting permissions for individual objects in the Presentation Layer
- B. Setting up new Roles and Groups
- C. Setting permissions for particular users or application roles
- D. Setting up new Application Roles

Answer: C

Explanation:

Explanation/Reference:

Security Manager - is used to setup users, groups, synchronize LDAP users and Groups, set access rights for Objects (tables, columns) and to control over when and what data a user can access.

Note: When you open the administration tool, you can reach the security manager by the Menu :
Manage > Security

NEW QUESTION # 105

Why is it necessary to join multiple source tables to a single dimension?

- A. Because a single source table often contains all the dimensions needed
- B. Because transactional source systems are often denormalized
- C. Because the dimensions tables are built in the transactional systems
- D. Because transactional source systems are often normalized

Answer: D

Explanation:

Explanation

Denormalized data in the transactional system could be divided into different tables to increase performance.

NEW QUESTION # 106

Selecting the Manage Map Data link allows one to do which three of the following?

- A. Create a new map layer
- B. Import images for use on maps
- C. Set the zoom level of an imported map
- D. Associate map layers to columns defined in the OBIEE metadata

Answer: B,C,D

Explanation:

Explanation/Reference:

The Oracle BI Presentation Services Administration page provides the Manage Map Data link. This link displays the Manage Map Data page, where you can manage the logical and display versions of the data from various physical data sources. This defines the layers that content designers use when creating map views. The data that is available for managing maps and data is stored in Oracle Database as part of MapViewer.

Using this page, you provide:

* (A) Logical names to prevent any existing BI column mappings and map analyses from breaking because of changes to the physical data or to the data source.

* Display names so that the geographic data is meaningful to end users.

Note: Administering Maps Using Administration Pages

For (C) -layers, see 3-7 below.

For (D) -import images, see 11-12 below.

To administer maps using Administration pages:

1. Sign in to Oracle Business Intelligence.
2. In the global header, click Administration.

3. Click the Manage Map Data link to display the Manage Map Data page.
4. Click the Layers tab.
5. Click the Import Layers button to display the Import Layers dialog.
6. In the dialog, select the connection and the layers that are needed for zooming and drilling. (This tab is not prepopulated by other selections on the Administration pages. You can use any layers or images with any map.)
Click OK when you have finished selecting layers that are appropriate for the subject area with which you are working.
7. Back on the Layers tab, select a layer, then click the Edit Layer button to display the Edit Layer dialog in which you associate layers with attribute columns so that you can display BI data in the map view.
Click OK when you have finished editing the layer.
You use this tab to associate layers with BI data. If you use the City column in multiple subject areas, then you must associate it with a layer for each subject area.
8. Click the Background Maps tab, then click the Import Background Maps button to display the Import Background Maps dialog.
9. In the dialog, select the connection and the main maps to use.
The connection that you select for the main map can be different from the connection for the layers or images.
Click OK when you have finished selecting main maps.
10. Back on the Background Maps tab, select a map, then click the Edit Background Map button to display the Edit Background Map dialog in which you name the map and specify the order of layers and their zoom levels.
Click OK when you have finished editing the map.
11. Optionally, click the Images tab, then click the Import Images button to display the Import Images dialog. You can import images if you plan to use them as a format on maps.
12. In the dialog, select the connection and the images to use.
Click OK when you have finished selecting images.
13. Click Back when you have finished working with the Administration page. Your changes are saved automatically.

NEW QUESTION # 107

Point-and-click generation of case statement logic can be accessed via which option?

- A. Column Formula -> Bins tab
- B. Column Properties -> Conditional Format tab
- C. Advanced Tab
- D. Compound Layout
- E. Subject Area metrics

Answer: A

Explanation:

Explanation

The "Edit Column Formula" dialog box has a second, very tiny tab called, "Bins." You can use this tab to have OBIEE build a CASE statement for you in a formula (you can also create a CASE statement yourself by using one of the functions that appears under "Expressions" if you want). A CASE statement is a lot like an IF-THEN-ELSE statement, except that it's a little easier to read when you have multiple options. Basically, it puts values in different buckets that you define.

Note:

Figure:

NEW QUESTION # 108

If Security attributes conflict, what happens?

- A. The user or application role is granted the Fully Restrictive security attribute
- **B. The user or application role is granted the minimum security attribute**
- C. The user or application role is granted No security attribute
- D. The user or application role is granted the maximum security attribute

Answer: B

Explanation:

Explanation/Reference:

If security attributes conflict, a user or group is granted the least restrictive security attribute.

NEW QUESTION # 109
