

Palo Alto Networks NetSec-Generalist Authorized Test Dumps: Palo Alto Networks Network Security Generalist - TestkingPass Quality and Value Guaranteed

BONUS!!! Download part of TestkingPass NetSec-Generalist dumps for free: <https://drive.google.com/open?id=1ejnoXtlyK8TnQ9I6os5fBaZOiRqrU2N0>

In modern society, you cannot support yourself if you stop learning. That means you must work hard to learn useful knowledge in order to survive especially in your daily work. Our NetSec-Generalist learning questions are filled with useful knowledge, which will broaden your horizons and update your skills. Lack of the knowledge cannot help you accomplish the tasks efficiently. But our NetSec-Generalist Exam Questions can help you solve all of these problems. And our NetSec-Generalist study guide can be your work assistant.

Among all substantial practice materials with similar themes, our NetSec-Generalist practice materials win a majority of credibility for promising customers who are willing to make progress in this line. With excellent quality at attractive price, our NetSec-Generalist Exam Questions get high demand of orders in this fierce market. You can just look at the data about the hot hit on the NetSec-Generalist study braindumps everyday, and you will know that how popular our NetSec-Generalist learning guide is.

NetSec-Generalist Exam Questions Vce & Latest NetSec-Generalist Test Fee

Our TestkingPass have a lot of IT professionals and the exam practice questions and answers we provide have been certified by many IT elites. Besides, the exam practice questions and answers have wide coverage of the content of the examination and the correct rate is up to 100%. Although there are many similar websites, perhaps they can provide you study guide and online services, our TestkingPass is leading these many websites. The reason of making the TestkingPass stand out in so many peers is that we have a lot of timely updated practice questions and answers which accurately and correctly hit the exam. So we can well improve the exam pass rate and make the people ready to participate in Palo Alto Networks Certification NetSec-Generalist Exam safely use practice questions and answers provided by TestkingPass to pass the exam. TestkingPass 100% guarantee you to pass Palo Alto Networks certification NetSec-Generalist exam.

Palo Alto Networks Network Security Generalist Sample Questions (Q36-Q41):

NEW QUESTION # 36

A company uses Prisma Access to provide secure connectivity for mobile users to access its corporate-sanctioned Google Workspace and wants to block access to all unsanctioned Google Workspace environments.

What would an administrator configure in the snippet to achieve this goal?

- A. Dynamic User Groups
- B. URL category
- C. Tenant restrictions
- D. Dynamic Address Groups

Answer: C

NEW QUESTION # 37

Which network design for internet of things (IoT) Security allows traffic mirroring from the switch to a TAP interface on the firewall to monitor traffic not otherwise seen?

- A. DHCP server on firewall
- B. Firewall in DHCP path
- C. Firewall outside DHCP path
- D. Firewall as DHCP relay

Answer: C

Explanation:

To monitor traffic for Internet of Things (IoT) devices that may not otherwise be visible, the network design should place the firewall outside the DHCP path and use traffic mirroring from the switch to a TAP (Test Access Point) interface on the firewall.

Traffic Mirroring: Switches mirror the traffic to the firewall's TAP interface, enabling the firewall to inspect the traffic without directly interfering with the device communication.

IoT Monitoring: Many IoT devices use lightweight communication protocols or non-standard methods, making direct interception difficult. Traffic mirroring allows passive monitoring for behavioral analysis, anomaly detection, and threat prevention.

Firewall Placement: Keeping the firewall outside the DHCP path ensures that monitoring does not disrupt IoT device communications while still providing visibility into their network activity.

Traffic Mirroring and TAP Interfaces

NEW QUESTION # 38

What is the primary role of Advanced DNS Security in protecting against DNS-based threats?

- A. It uses machine learning (ML) to detect and block malicious domains in real-time.
- B. It automatically redirects all DNS traffic through encrypted tunnels.
- C. It replaces traditional DNS servers with more reliable and secure ones.
- D. It centralizes all DNS management and simplifies policy creation.

Answer: A

Explanation:

Advanced DNS Security in Palo Alto Networks provides real-time protection against DNS-based threats using machine learning (ML) and threat intelligence.

Why Machine Learning-Based Detection is Critical?

Detects and Blocks Malicious Domains in Real-Time -

Identifies phishing, malware command-and-control (C2), and data exfiltration attempts using ML models.

Prevents zero-day DNS attacks that traditional static methods fail to detect.

Analyzes DNS Traffic to Identify Malicious Patterns -

Monitors DNS queries for suspicious behaviors, such as algorithm-generated domain names (DGAs) used by botnets.

Enhances Network Security Without Affecting Performance -

DNS Security operates inline to block threats before malicious domains can be accessed.

Works without disrupting legitimate DNS traffic.

Why Other Options Are Incorrect?

A . It replaces traditional DNS servers with more reliable and secure ones. ☐ Incorrect, because Advanced DNS Security does not replace DNS servers-it analyzes DNS traffic for threats.

B . It centralizes all DNS management and simplifies policy creation. ☐ Incorrect, because Advanced DNS Security is not a DNS management solution, but a threat prevention feature.

C . It automatically redirects all DNS traffic through encrypted tunnels. ☐ Incorrect, because it does not encrypt DNS traffic, but analyzes it for malicious activity.

Reference to Firewall Deployment and Security Features:

Firewall Deployment - Protects against DNS-based attacks via inline inspection.

Security Policies - Enforces malicious domain blocking.

VPN Configurations - Secures DNS queries even from remote users.

Threat Prevention - Blocks malicious DNS requests before they resolve.

WildFire Integration - Identifies DNS-based malware C2 communication.

Zero Trust Architectures - Prevents threat actors from leveraging DNS tunneling for data exfiltration.

Thus, the correct answer is:

☐ D. It uses machine learning (ML) to detect and block malicious domains in real-time.

NEW QUESTION # 39

An IT security administrator is maintaining connectivity and security between on-premises infrastructure, private cloud, and public cloud environments in Strata Cloud Manager (SCM).

Which set of practices must be implemented to effectively manage certificates and ensure secure communication across these segmented environments?

- A. Rely on the cloud provider's default certificates.
Avoid renewing certificates to reduce overhead and complexity. Manage certificate deployment manually.
- B. Use self-signed certificates for all environments.
Renew certificates manually once a year.
Avoid automating certificate management to maintain control.
- **C. Use a centralized certificate management solution. Regularly renew and update certificates. Employ strong encryption protocols.**
- D. Implement different certificate authorities (CAs) for each environment. Use default certificate settings.
Renew certificates only when they expire to reduce overhead and complexity.

Answer: C

NEW QUESTION # 40

Which Security profile should be queried when investigating logs for upload attempts that were recently blocked due to sensitive information leaks?

- A. URL Filtering
- B. Antivirus
- C. Anti-spyware
- **D. Data Filtering**

Answer: D

NEW QUESTION # 41

.....

Our NetSec-Generalist guide questions enjoy a very high reputation worldwide. This is not only because our NetSec-Generalist practical materials are affordable, but more importantly, our NetSec-Generalist useful test files are carefully crafted after years of hard work and the quality is trustworthy. If you are still anxious about getting a certificate, why not try our NetSec-Generalist Study Guide? If you have any questions about our NetSec-Generalist practical materials, you can ask our staff who will give you help. And we offer considerable services on the NetSec-Generalist exam questions for 24/7.

NetSec-Generalist Exam Questions Vce: <https://www.testkingpass.com/NetSec-Generalist-testking-dumps.html>

Palo Alto Networks NetSec-Generalist Authorized Test Dumps You can check out with 1024 Bit SSL encryption, Palo Alto Networks NetSec-Generalist Authorized Test Dumps It is universally accepted that the competition in the labor market has become more and more competitive in the past years, If you choose NetSec-Generalist learning materials of us, we can ensure you that your money and account safety can be guaranteed, We are willing to recommend you to try the NetSec-Generalist study materials from our company.

Whether you consider yourself well-versed or a novice on the topic, NetSec-Generalist Authorized Test Dumps working in large or small environments, this work will provide a clear understanding of the diverse subject of virtualization.

Three Different Formats of TestkingPass Palo Alto Networks NetSec-Generalist Exam Dumps

It is believed that our NetSec-Generalist latest question is absolutely good choices for you There are many advantages of our product and it is worthy for you to buy it.

You can check out with 1024 Bit SSL encryption, It is universally NetSec-Generalist accepted that the competition in the labor market has become more and more competitive in the past years.

If you choose NetSec-Generalist learning materials of us, we can ensure you that your money and account safety can be guaranteed, We are willing to recommend you to try the NetSec-Generalist study materials from our company.
