career in your advantage successfully. As long as you have the CyberArk PAM-DEF Certification, you will be treated equally by all countries.

## CyberArk Defender - PAM Sample Questions (Q68-Q73):

### NEW QUESTION # 68

Which Cyber Ark components or products can be used to discover Windows Services or Scheduled Tasks that use privileged accounts? Select all that apply.

- A. Export Vault Data (EVD)
- B. On Demand Privileges Manager (OPM)
- C. Auto Detection (AD)
- D. Accounts Discovery
- E. Discovery and Audit (DMA)

**Answer: C,D,E**

### NEW QUESTION # 69

Which CyberArk utility allows you to create lists of Master Policy Settings, owners and safes for output to text files or MSSQL databases?

- A. PrivateArk Client
- B. Export Vault Information
- C. Privileged Threat Analytics
- D. Export Vault Data

**Answer: B**

Explanation:

Explanation

The Export Vault Information utility is a CyberArk tool that allows you to create lists of Master Policy settings, owners and safes for output to text files or MSSQL databases. This utility can be used to export various types of information from the Vault, such as accounts, safes, platforms, policies, users, groups, and audit records. The utility can also generate reports based on predefined templates or custom queries. The utility can be run from the command line or the graphical user interface. References: Export Vault Information, Export Vault Information Utility

### NEW QUESTION # 70

Match the built-in Vault User with the correct definition.

	 <b>CYBERARK</b> The Identity Security Company	
This user appears on the highest level of the User hierarchy and has all the possible permissions. As such, it can create and manage other Users on any level on the Users' hierarchy.	Drag answer here	Administrator
This user appears at the top of the User hierarchy, enabling it to view all the Users in the Safe. The user can produce reports of Safe activities and User activities, which enables it to keep track of activity in the Safe and User requirements.	Drag answer here	Batch
This user is an internal user that cannot be logged onto and carries out internal tasks, such as automatically clearing expired user and Safe history.	Drag answer here	Master
This user has all available Safe member authorizations except Authorize password requests. This user has complete system control, manages a full recovery when necessary and cannot be removed from any Safe.	Drag answer here	Auditor

**Answer:**

**Explanation:**

This user appears on the highest level of the User hierarchy and has all the possible permissions. As such, it can create and manage other Users on any level on the Users' hierarchy.	This user appears on the highest level of the User hierarchy and has all the possible permissions. As such, it can create and manage other Users on any level on the Users' hierarchy.	Administrator

This user has all available Safe member authorizations except Authorize password requests. This user has complete system control, manages a full recovery when necessary and cannot be removed from any Safe.	This user appears at the top of the User hierarchy, enabling it to view all the Users in the Safe. The user can produce reports of Safe activities and User activities, which enables it to keep track of activity in the Safe and User requirements.	Auditor

This user appears on the highest User hierarchy and has all the possible permissions. As such, it can create and manage other Users on any level on the Users' hierarchy.

Administrator

This user is an internal user that cannot be logged onto and carries out internal tasks, such as automatically clearing expired user and Safe history.

Batch

This user has all available Safe member authorizations except Authorize password requests. This user has complete system control, manages a full recovery when necessary and cannot be removed from any Safe.

Master

This user appears at the top of the User hierarchy, enabling it to view all the Users in the Safe. The user can produce reports of Safe activities and User activities, which enables it to keep track of activity in the Safe and User requirements.

Auditor

#### NEW QUESTION # 71

Which CyberArk group does a user need to be part of to view recordings or live monitor sessions?

- A. Vault Admin
- B. DR Users
- C. Auditors
- D. Operators

**Answer: C**

Explanation:

Explanation

To view recordings or live monitor sessions, users must be part of the Auditors group or have the appropriate permissions in the relevant Account Safes and Recording Safes<sup>12</sup>. The other groups do not have the necessary permissions to access the recordings or monitor the sessions by default. References: Monitor Active Sessions, Active Session Monitoring

#### NEW QUESTION # 72

A user has successfully conducted a short PSM session and logged off. However, the user cannot access the Monitoring tab to view the recordings.

What is the issue?

- A. The PSM service is not running
- B. The user must login as PSMAdminConnect
- C. The user is not a member of the Auditors group
- D. The user is not a member of the PVWAMonitor group

**Answer: C**

Explanation:

Explanation

To access the Monitoring tab and view the recordings of the PSM sessions, the user must have membership in the Auditors group or membership in the relevant Account Safes and Recording Safes with the appropriate permissions<sup>1</sup>. The user must also use the same connection method (RDP file or HTML5 Gateway) as the end user who conducted the session<sup>1</sup>. The other options are not relevant to the issue, as the user does not need to login as PSMAdminConnect, the PSM service is running if the user was able to conduct a session, and the PVWAMonitor group is not a valid group in CyberArk.
