Certification 220-1202 Sample Questions & Test 220-1202 Engine

Feedbacks of many IT professionals who have passed CompTIA certification 220-1202 exam prove that their successes benefit from TrainingQuiz's help. TrainingQuiz's targeted test practice questions and answers to gave them great help, which save their valuable time and energy, and allow them to easily and smoothly pass their first CompTIA Certification 220-1202 Exam. So TrainingQuiz a website worthy of your trust. Please select TrainingQuiz, you will be the next successful IT person. TrainingQuiz will help you achieve your dream.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q74-Q79):

NEW QUESTION # 74

A network technician notices that most of the company's network switches are now end-of-life and need to be upgraded. What should the technician do first?

- A. Schedule the change
- B. Implement the change
- C. Approve the change
- D. Document the change

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Before any change is implemented, it must be documented as part of change management procedures. This ensures transparency, review, and tracking.

From Quentin Docter - CompTIA A+ Complete Study Guide:

"Documenting a change is the first step in change management. This includes defining the scope, purpose, impact, and implementation plan before approval or scheduling."

NEW QUESTION # 75

A network technician notices that most of the company's network switches are now end-of-life and need to be upgraded. Which of the following should the technician do first?

- A. Schedule the change
- B. Implement the change
- C. Approve the change
- D. Propose the change

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The first step in the IT change management process is to identify and propose the change. In this case, the technician notices a need (end-of-life network switches), so the appropriate action is to formally propose a change. This proposal would be documented and submitted for approval before any planning or implementation occurs.

According to the CompTIA A+ 220-1102 objectives under Operational Procedures (Domain 4.0), the change management process follows these typical steps:

- * Submit a change request (Propose the change)
- * Review and approval (Approve the change)
- * Planning and scheduling (Schedule the change)
- * Implementation
- * Documentation and review

Therefore, proposing the change is the correct first step in accordance with standard ITIL-based change management practices.

Reference:

CompTIA A+ 220-1102 Objective 4.1: Given a scenario, implement best practices associated with documentation and support systems information management.

Study Guide Section: Change Management Process

NEW QUESTION # 76

Which of the following is found in an MSDS sheet for a battery backup?

- **A. Emergency procedures**
- B. Configuration steps
- C. Voltage specifications
- D. Installation instructions

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

An MSDS (Material Safety Data Sheet), now commonly referred to as SDS (Safety Data Sheet), is a document that provides detailed information on the properties of a particular substance. It includes safety guidelines and emergency procedures related to handling, exposure, fire hazards, and first aid-not installation or configuration instructions.

For a battery backup (UPS device), the MSDS would include emergency procedures such as what to do in case of a chemical spill, exposure to battery acid, or fire hazard due to overheating or chemical leakage. This ensures the safety of personnel and complies with hazardous materials handling regulations.

Reference:

CompTIA A+ 220-1102 Objective 4.1: Given a scenario, implement best practices associated with documentation and support systems information management.

Study Guide Section: MSDS/SDS usage and safety documentation

NEW QUESTION # 77

An administrator is investigating a zero-day vulnerability. If left unpatched, it could severely impact business. The patch requires downtime. What should the administrator do?

- A. Immediately freeze all changes.
- B. Continue operations until the next change interval.
- **C. Implement an emergency change.**
- D. Create a standard change request.

Answer: C

Explanation:

A zero-day vulnerability demands an emergency change to quickly secure the system, even if downtime is needed.

From Mike Meyers' Lab Manual:

"Emergency changes bypass standard scheduling to quickly address critical vulnerabilities that pose immediate risks." .

NEW QUESTION # 78

The battery on a user's smartphone discharges quickly when the user travels. The smartphone was replaced two weeks ago. Which of the following should a technician do first?

- A. Replace the battery with a higher capacity option
- **B. Look for applications that are reporting the highest utilization**
- C. Ensure that the charging port is working as expected
- D. Provide an external battery to extend the usage time

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

High battery drain is often due to apps running in the background or using GPS during travel. The first step should always be to check battery usage statistics to see if an application is misbehaving.

From All-in-One Exam Guide:

"Travel conditions can increase app activity, especially navigation or social media. Check app battery usage before assuming hardware faults."
