300-710 learning materials can help them turn to very clear ones. We have been abiding the intention of providing the most convenient services for you all the time on Securing Networks with Cisco Firepower 300-710 Study Guide, which is also the objection of us. Cisco 300-710 practice materials are successful measures and methods to adopt.

Cisco 300-710 (Securing Networks with Cisco Firepower) certification exam is a well-recognized and highly sought-after certification in the IT industry. Securing Networks with Cisco Firepower certification exam is designed to validate the skills and knowledge required to implement and manage security features of Cisco Firepower Next-Generation Firewall (NGFW), including policy configuration, intrusion prevention system (IPS), and URL filtering. Securing Networks with Cisco Firepower certification is ideal for network security engineers, network administrators, and network architects who wish to enhance their skills in managing and securing Cisco Firepower NGFW.

Cisco 300-710 certification exam is an industry-recognized credential that validates the knowledge and skills of IT professionals in network security using Cisco Firepower NGFW solutions. Securing Networks with Cisco Firepower certification is intended for network security engineers, network administrators, security analysts, and security consultants who are responsible for designing, deploying, and managing security solutions for their organizations. Earning this certification demonstrates an individual's expertise in securing networks with Cisco Firepower, and can help to advance their career in the field of network security.

Cisco 300-710 Exam is a part of the Cisco Certified Network Professional Security (CCNP Security) certification track. Securing Networks with Cisco Firepower certification track is designed to validate the candidates' skills in implementing, maintaining, and troubleshooting the Cisco network security solutions. The CCNP Security certification is aimed at the professionals who have at least three to five years of experience in the field of network security and who are looking to advance their career in this field.

## Pass Guaranteed Marvelous Cisco 300-710 - Securing Networks with Cisco Firepower Real Question

If you purchasing our 300-710 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful 300-710 practice materials by recommending our 300-710 Guide preparations for you. Only in a few minutes, your ordered 300-710 exam questions are sent to you, and whenever you have any question on the 300-710 practice guide, you can contact with our service at 24/7.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q252-Q257):

### NEW QUESTION # 252

A network engineer is extending a user segment through an FTD device for traffic inspection without creating another IP subnet. How is this accomplished on an FTD device in routed mode?

- A. by using a BVI and create a BVI IP address in the same subnet as the user segment
- B. by assigning an inline set interface
- C. by bypassing protocol inspection by leveraging pre-filter rules
- D. by leveraging the ARP to direct traffic through the firewall

**Answer: A**

Explanation:

Explanation

<https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config-guide-v64/transp>

### NEW QUESTION # 253

Which action must be taken to permit communication between a bridge group and routed interface on Cisco Secure Firewall?

- A. Define a source NAT address.
- B. Enable split tunneling.
- C. Create an ACL for the bridge group.
- D. Create an access rule to allow the traffic.

**Answer: D**

### NEW QUESTION # 254

A network administrator notices that remote access VPN users are not reachable from inside the network. It is determined that routing is configured correctly, however return traffic is entering the firewall but not leaving it. What is the reason for this issue?

- A. An external NAT IP address is configured to match the wrong interface.
- B. An external NAT IP address is not configured.
- C. An object NAT exemption rule does not exist at the top of the NAT table.
- D. A manual NAT exemption rule does not exist at the top of the NAT table.

**Answer: D**

Explanation:

<https://www.cisco.com/c/en/us/support/docs/security/firepower-management-center/212702-configure-and-verify>

### NEW QUESTION # 255

An administrator must fix a network problem whereby traffic from the inside network to a webserver is not getting through an instance of Cisco Secure Firewall Threat Defense. Which command must the administrator use to capture packets to the webserver that are dropped by Secure Firewall Threat Defense and resolve the issue?

- A. capture CAP type asp-drop all headers-only
- B. capture CAP int INSIDE match ip any host WEBSERVERIP
- C. capture CAP int INSIDE match tcp any 80 host WEBSERVERIP 80
- D. capture CAP int OUTSIDE match ip any host WEBSERVERIP

**Answer: A**

Explanation:

To capture packets that are dropped by Cisco Secure Firewall Threat Defense (FTD) and troubleshoot the issue of traffic from the inside network to a webserver not getting through, the administrator should use the command to capture packets dropped by the accelerated security path (ASP) engine.

The correct command is:

capture CAP type asp-drop all headers-only

This command captures all packets dropped by the ASP engine, which includes packets that are being blocked by access control

policies, NAT issues, or other security checks.

Steps:

Access the FTD CLI.

Run the command capture CAP type asp-drop all headers-only to capture dropped packets.

Analyze the captured data to identify the cause of the drops. This command provides detailed information on why packets are being dropped, helping the administrator resolve the issue.

### NEW QUESTION # 256

The CEO ask a network administrator to present to management a dashboard that shows custom analysis tables for the top DNS queries URL category statistics, and the URL reputation statistics.

Which action must the administrator take to quickly produce this information for management?

- A. Run the Attack report and filter on DNS to show this information.
- B. Copy the intrusion events dashboard tab and modify each widget to show the correct charts.
- C. Create a new dashboard and add three custom analysis widgets that specify the tables needed.
- D. Modify the Connection Events dashboard to display the information in a view for management.

Answer: C

### NEW QUESTION # 257

.....

Some people want to study on the computer, but some people prefer to study by their mobile phone. Whether you are which kind of people, we can meet your requirements. Because our 300-710 study torrent can support almost any electronic device, including iPod, mobile phone, and computer and so on. If you choose to buy our Securing Networks with Cisco Firepower guide torrent, you will have the opportunity to use our study materials by any electronic equipment when you are at home or other places. We believe that our 300-710 Test Torrent can help you improve yourself and make progress beyond your imagination. If you buy our 300-710 study torrent, we can make sure that our study materials will not be let you down.
