NEW QUESTION # 199

Which two statements about Mobile and Remote Access certificate are true? (Choose two.)

- A. The Jabber client can work with public or private CA signed certificate.
- B. Expressway Core can use private CA signed certificate.
- C. Expressway Edge must use public CA signed certificate.
- D. You must upload the root certificates in the phone trust store.
- E. Expressway must generate certificate signing request.

Answer: A,B

NEW QUESTION # 200

Refer to the exhibit.

Cisco Unified Communications Manager routes the call via the Webex Meetings route list and route group to the Video Mesh cluster. Node#1 in the Video Mesh cluster is hosting the meeting and has reached full capacity, but other nodes in the cluster still have spare capacity.

What happens to the participant's call?

- A. Another node in the cluster is used and an intra-cluster cascade between the two Video Mesh nodes is formed.
- B. The call is queued.
- C. The call fails.
- D. Another node in the cluster is used and an intra-cluster cascade between Webex and the new Video Mesh node is formed.

Answer: D

NEW QUESTION # 201

Which two statements about Mobile and Remote Access certificate are true? (Choose two.)

- A. The Jabber client can work with public or private CA signed certificate.
- **B. Expressway Core can use private CA signed certificate.**
- C. You must upload the root certificates in the phone trust store.
- **D. Expressway Edge must use public CA signed certificate.**
- E. Expressway must generate certificate signing request.

Answer: B,D

Explanation:

Public vs. Private Certificate Authority (CA)

There are a number of options to sign certificates on the Expressway-C and E servers. You can opt to have the Certificate Signing Request (CSR) signed by a public CA such as GoDaddy, Verisign, or others, or you can sign it internally using your own Certificate Authority (CA) (can either be self signed using openSSL or an internal enterprise CA such as a Microsoft Windows server).

The only server that is really required to be signed by a public CA is the Expressway-E. This is the only server that clients will see the certificate from when singing in via MRA therefore using a public CA will ensure that users do not have to manually accept the certificate. Using an internal CA to sign the Expressway-E will work but first time users will be prompted to accept the untrusted certificate. MRA registration of 7800 and 8800 series phones also will not work with internal certificates because their certificate trust list cannot be modified. For simplicity it is suggested that your Expressway-C and Expressway-E certificates both be signed by the same CA however this is not a requirement as long as you properly configured the trusted CA lists on both servers.

NEW QUESTION # 202

Refer to the exhibit. Logins and failing via mobile and remote access. How is this resolved?

Unified Communications status		
Unified Communications status (last updated: 14:11:51 PST)		
Unified Communications status	Enabled	
Unified CM registrations	Domain configured but no active zone connection	
IM and Presence Service	Domain configured but no active zone connection	
XMPP Federation	Not configured (Configure a domain on Expressway-C)	
Single Sign-On support	Not configured (Enable on the Unified Communications page)	
OAuth token with refresh	Not configured (Enable on the Unified Communications page)	
Activity		
Unified CM calls: Current video	0	
Unified CM calls: Current audio (SIP)	0	
Current UCM/LDAP basic authenticated sessions	8	
Total UCM/LDAP basic authenticated sessions	15	
Total provisioning requests since last restart	21	
Domains		
Name	Services	Associated zones
pod1.local	Unified CM registrations, IM and Presence Service	No associated zones
Servers		
IM and Presence Service nodes	1	
Unified CM servers	1	
Unity Connection servers	There are no Unity Connection servers configured.	
Zones		
There are no Unified Communications traversal zones configured. Configure a secure Unified Communications traversal zone connection between this Expressway-C and the Expressway-E.		
xstatus zones zone 2 's Zones: / Zone: 2: Bandwidth: ClusterUsage: "0" LocalUsage: "0" Name: "EXP1.pod1.local" Status: "Active" TraversalClient: Peer: SIP: Address: "10.0.101.119" Apparent: "10.0.101.115:27240" LastStatusChange: "2021-02-02 14:26:21" Port: "7001" ResourceUsage: NonTraversalCallsAvailable: "1500" ProtocolMode: "Both" RegistrationsAvailable: "0" ResourceUsageValid: "True" TURN: Port: Count: "0" Port: "3478" Ports: Count: "1" TURNRelaysAvailable: "1800" TraversalCallsAvailable: "300" Server: "TANDBERG/4137 (X12.5.3)" Status: "Active" Type: "TraversalClient"		

- A. Although a traversal client zone exists, there is no Unified Communications traversal client zone. One must be created.
- B. SIP is disabled on the Expressway-E. The SIP protocol must be enabled on the server.
- C. No Cisco UCM servers are configured in the Expressway-C. Servers must be added for CallManager and IM and Presence services.
- D. Mobile and remote access login has not been enabled for the domain configured in the Expressway-C. The domain must be edited to allow Cisco UCM registrations.

Answer: A

Explanation:

If you look at the bottom of the diagram, it shows a CUCM server configured and also states at the very bottom that the UC traversal zone is not configured.

NEW QUESTION # 203
