Professional Pdf FCP_FMG_AD-7.4 Exam Dump Spend Your Little Time and Energy to Clear Fortinet FCP_FMG_AD-7.4 exam

Our PrepAwayETE has devoted more time and efforts to develop the FCP_FMG_AD-7.4 exam software for you to help you successfully obtain FCP_FMG_AD-7.4 exam certification with less time and efforts. Our promise of "no help, full refund" is not empty talk. No matter how confident we are in our dumps, once our dumps do not satisfy you or have no help for you, we will immediately full refund all your money you purchased our FCP_FMG_AD-7.4 Exam software. However, we believe that our FCP_FMG_AD-7.4 exam software will meet your expectation, and wish you success!

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47

Refer to the exhibit.

Managed FortiGate devices

The screenshot displays the FortiManager 7.4 interface for managing FortiGate devices. The top navigation bar includes 'Add Device', 'Device Group', and 'Install Wizard'. A search bar is present. The left sidebar shows a tree view with 'Managed FortiGate (4)' selected, containing 'ISFW (3)' (with sub-items 'root', 'Student', 'Trainer') and 'Local-FortiGate'. Below this is 'Managed FortiAnalyzer (1)' with 'FAZVM64-KVM'. The main area features a green donut chart showing '2 Devices'. Below the chart are buttons for 'Edit', 'Delete', and 'Import Configuration'. A table lists the devices with checkboxes for selection:

Device Name
ISFW
root [NAT] (Management)
Student [NAT]
Trainer [NAT]
Local-FortiGate

FortiManager policy package

The screenshot shows the FortiManager 7.4 interface for policy packages. The top navigation bar includes 'Policy Package', 'Install Wizard', and 'ADOM Revisions'. A search bar is present. The left sidebar shows a tree view with 'Local-FortiGate_root', 'Remote-FortiGate', and 'Shared_Package'. Under 'Shared_Package', 'Firewall Header Policy' and 'Firewall Policy' are listed. 'Installation Targets' is selected, showing a list of targets with checkboxes for selection:

Installation Target
Local-FortiGate
ISFW
root [NAT] (Management)
Trainer [NAT]
Student [NAT]

FortiManager policy package

The screenshot shows the FortiManager 7.4 interface for policy packages. The top navigation bar includes 'Policy Package', 'Install Wizard', 'ADOM Revisions', and 'Tools'. A search bar is present. Below the search bar are buttons for '+ Create New', 'Edit', 'Delete', 'Section', 'Policy Lookup', and 'Co'.

FORTINET

Local-FortiGate_root	<input type="checkbox"/>	#	Name	Install On	From	To
Remote-FortiGate	<input type="checkbox"/>	1	Ping_Access	ISFW (root) ISFW (Student)	port3	port1
Shared_Package	<input type="checkbox"/>	2	Web	Local-FortiGate (root) ISFW (Student)	port3	port1
Firewall Header Policy	<input type="checkbox"/>	3	Source_Device	Installation Targets	port3	port1
Firewall Policy	<input type="checkbox"/>					
Installation Targets	<input type="checkbox"/>					
default	<input type="checkbox"/>					
	<input type="checkbox"/>		Implicit (4/4 Total:1)			
	<input type="checkbox"/>	4	Implicit Deny	Installation Targets	any	any

Given the configuration shown in the exhibit, which two conclusions can you draw from the installation targets in the Install On column? (Choose two.)

- A. Policy seq.# 1 will be installed on the ISFW device root[NAT] and Student[NAT] VDOMs only.
- B. Policy seq.# 2 will not be installed on the Local-FortiGate root VDOM because there is no root VDOM in the Installation Target
- C. Policy seq.# 3 will be skipped because no installation targets are specified.
- D. Policy seq.S will be installed on all managed devices and VDOMs that are listed under Installation Targets

Answer: A,D

NEW QUESTION # 48

What does a policy package status of Never Installed indicate?

- A. The policy package was never imported after a device was registered on FortiManager.
- B. The policy configuration has been changed on a managed device and changes have not yet been imported into FortiManager.
- C. FortiManager is unable to determine the policy package status.
- D. The policy configuration has been changed on FortiManager and changes have not yet been installed on the managed device.

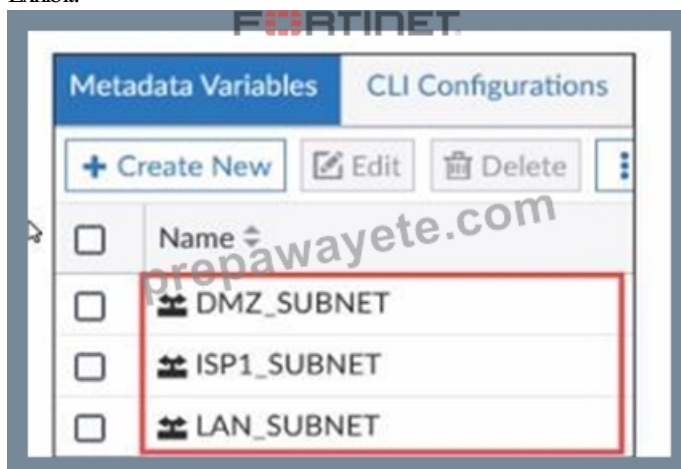

Answer: A

Explanation:

This status means that the policy package has not yet been associated with the managed device since its registration in FortiManager. Essentially, no configuration from that policy package has been pushed to the device.

NEW QUESTION # 49

Exhibit.

What is true about the objects highlighted in the image?

- A. They can be set to optional or required.
- B. They cannot be created in the global database ADOM.
- C. They can be used as variables in scripts.

- D. They are available across all ADOMs by default.

Answer: C

Explanation:

The objects highlighted in the image (DMZ_SUBNET, ISP1_SUBNET, LAN_SUBNET) are metadata variables.

* C. They can be used as variables in scripts.

* These metadata variables are placeholders that can be used in FortiManager scripts to dynamically insert specific values, enabling script flexibility and scalability across multiple devices or ADOMs.

Options A, B, and D are incorrect because:

* A suggests optional or required settings, which do not apply to metadata variables.

* B implies they are available across all ADOMs by default, which is not always the case.

* D states they cannot be created in the global database ADOM, but metadata variables are typically managed within ADOMs and can be utilized globally based on specific configurations.

FortiManager References:

* Refer to FortiManager 7.4 Administrator Guide: Using Metadata Variables and Script Management.

NEW QUESTION # 50

What will be the result of reverting to a previous revision version in the revision history?

- A. It will tag the device settings status as Auto-Update.
- B. It will install configuration changes to managed device automatically.
- **C. It will modify the device-level database.**
- D. It will generate a new version ID and remove all other revision history versions.

Answer: C

NEW QUESTION # 51

Refer to the exhibit. An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask is shown on FortiManager for this firewall address object for devices without a Per-Device Mapping set?

FortiManager address object

Mapped Device	Details
Local-FortiGate [root]	IP/Netmask: 192.168.1.0/255.255.255.240

- **A. 192.168.1.0/24**
- B. 192.168.1.0/28
- C. FortiManager replaces the address object to none.
- D. FortiManager generates an error for each FortiGate without a per-device mapping defined for that object.

Answer: A

NEW QUESTION # 52
