Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which statement about EPS bursting is true?

- A. FortiSIEM must be provisioned with ten percent the licensed EPS to handle potential event surges.
- B. FortiSIEM will let you burst up to five times the licensed EPS at any given time, regardless of unused of EPS.
- C. FortiSIEM will let you burst up to five times the licensed EPS at any given time, provided it has accumulated enough unused EPS.
- D. FortiSIEM will let you burst up to five times the licensed EPS once during a 24-hour period.

Answer: C

Explanation:

EPS bursting in FortiSIEM allows temporary spikes in events per second (EPS) beyond the licensed limit, but only if there are accumulated unused EPS credits. This ensures flexibility in handling short-term surges without requiring a permanent license upgrade.

FortiSIEM accumulates unused EPS credits when actual EPS usage is below the licensed limit.

When an event surge occurs, FortiSIEM can burst up to 5x the licensed EPS, but only if there are sufficient accumulated credits.

This allows adaptive scaling while preventing abuse of resources beyond allocated licensing.
