

Pass Guaranteed 1Z0-182 - Oracle Database 23ai Administration Associate—Efficient Pass Leader Dumps

P.S. Free 2025 Oracle 1Z0-182 dumps are available on Google Drive shared by PassLeaderVCE: https://drive.google.com/open?id=1EK5GHUcTKXkFXICxpOA8_9ssYVxZ9BVl

With the help of our 1Z0-182 practice materials, you can successfully pass the actual exam with might redoubled. Our company owns the most popular reputation in this field by providing not only the best ever 1Z0-182 study guide but also the most efficient customers' servers. We can lead you the best and the fastest way to reach for the certification of 1Z0-182 Exam Dumps and achieve your desired higher salary by getting a more important position in the company.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.
Topic 2	Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.
Topic 3	Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.
Topic 4	Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.

Topic 5	Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 6	Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.

Oracle Database 23ai Administration Associate Latest Pdf Material & 1Z0-182 Valid Practice Files & Oracle Database 23ai Administration Associate Updated Study Guide

Our website is a pioneer in providing comprehensive Oracle dumps torrent because we have a group of dedicated IT experts who have more than 10 years of experience in the study of 1Z0-182 test questions and answers. They work in advance to make sure that our candidates will get latest and accurate 1Z0-182 Exam Prep materials. You will get 1Z0-182 passing score with the shortest duration for exam preparation.

Oracle Database 23ai Administration Associate Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which two statements are true about the PMON background process?

- A. It frees resources held by abnormally terminated processes.
- B. It records checkpoint information in the control file.
- C. It registers database services with all local and remote listeners known to the database instance.
- D. It rolls back transactions when a process fails.
- E. It frees unused temporary segments.

Answer: A,D

Explanation:

- A .False. LREG handles registration in 23ai, not PMON.
- B .False. CKPT (Checkpoint) process updates the control file.
- C .True. PMON cleans up after failed processes (e.g., releases locks).
- D .True. PMON rolls back uncommitted transactions of failed processes.
- E .False. SMON (System Monitor) manages temporary segment cleanup.

NEW QUESTION # 19

You are going to perform a hot remote clone of PDB1 from CDB1 as TESTPDB in CDB2. Which of the following is a necessary prerequisite for the hot remote clone?

- A. TESTPDB must be in read-only mode after the cloning process is complete.
- B. PDB1 must be taken offline before the cloning process begins.
- C. PDB1 must be in read-only mode.
- D. Both CDBs need to be in local undo mode.

Answer: C

Explanation:

- C .True. Hot cloning requires the source PDB (PDB1) to be read-only to ensure consistency during the clone. Others are not prerequisites.

NEW QUESTION # 20

Examine this command: ALTER DATABASE MOVE DATAFILE '/u01/sales01.dbf' TO '/u02/sales02.dbf'; Which two statements are true?

- A. It overwrites any existing file with the name sales02.dbf in /u02 by default.
- **B. DML may be performed on tables with one or more extents in this data file during the execution of this command.**
- C. Compressed objects in sales01.dbf will be uncompressed in sales02.dbf after the move.
- **D. Tables with one or more extents in this data file may be queried during the execution of this command.**
- E. The "TO" clause containing the new file name must be specified even if Oracle Managed Files (OMF) is used.

Answer: B,D

Explanation:

The ALTER DATABASE MOVE DATAFILE command relocates a data file to a new location while the database remains online, introduced in Oracle 12c and enhanced in subsequent releases like 23ai. Let's evaluate each option:

A . DML may be performed on tables with one or more extents in this data file during the execution of this command. True. The move operation is online by default in Oracle 23ai, allowing DML (INSERT, UPDATE, DELETE) operations on tables within the data file being moved. The database ensures consistency using redo and undo mechanisms.

B . It overwrites any existing file with the name sales02.dbf in /u02 by default. False. By default, the command does not overwrite an existing file unless the REUSE clause is specified (e.g., ALTER DATABASE MOVE DATAFILE ... REUSE). Without it, the command fails if the target file exists.

C . The "TO" clause containing the new file name must be specified even if Oracle Managed Files (OMF) is used. False. When OMF is enabled (via DB_CREATE_FILE_DEST), the TO clause is optional. If omitted, Oracle automatically generates a file name and places it in the OMF destination.

D . Compressed objects in sales01.dbf will be uncompressed in sales02.dbf after the move. False. The move operation is a physical relocation of the data file; it does not alter the logical structure or compression state of objects within it. Compressed data remains compressed.

E . Tables with one or more extents in this data file may be queried during the execution of this command. True. The online nature of the move allows queries (SELECT statements) to proceed without interruption, leveraging Oracle's multi-version consistency model.

NEW QUESTION # 21

Which two are benefits of external tables?

- A. They support DELETES, which transparently deletes records in the file system as if they were table rows.
- B. They can be queried while the database is in the MOUNT state like dynamic performance views.
- **C. The results of a complex join or aggregating function or both can be unloaded to a file for transportation to other systems.**
- **D. They can be queried, transformed, and joined with other tables without having to load the data first.**
- E. They support UPDATES, which transparently updates records in the file system as if they were table rows.

Answer: C,D

Explanation:

A . False. External tables are read-only; no DELETE.

B . False. Require OPEN state, unlike V\$ views.

C . False. No UPDATE support; read-only.

D . True. Queryable like regular tables without loading.

E . True. Data Pump can unload query results to files.

NEW QUESTION # 22

You must create a tablespace of nonstandard block size in a new file system and plan to use this command: CREATE TABLESPACE ns_tbs DATAFILE '/u02/oracle/data/nstbs_f01.dbf' SIZE 100G BLOCKSIZE 32K; The standard block size is 8K, but other nonstandard block sizes will also be used. Which two are requirements for this command to succeed?

- **A. The /u02 file system must have at least 100G space for the datafile.**
- B. The operating system must use a 32K block size.
- **C. DB_32K_CACHE_SIZE must be set to a value that can be accommodated in the SGA.**
- D. DB_32K_CACHE_SIZE should be set to a value greater than DB_CACHE_SIZE.
- E. DB_32K_CACHE_SIZE must be less than DB_CACHE_SIZE.

Answer: A,C

Explanation:

A .False. No such restriction exists; DB_32K_CACHE_SIZE is independent of DB_CACHE_SIZE.

B .True. A nonstandard block size (32K) requires a corresponding cache (DB_32K_CACHE_SIZE) set to a non-zero value within SGA limits.

C .False. OS block size is irrelevant; Oracle manages its own block sizes.

D .False. No requirement for it to exceed DB_CACHE_SIZE.

E .True. The file system must have 100G available for the datafile.

NEW QUESTION # 23

.....

The study material is available in three formats, i.e. PDF format, web-based practice exam, and desktop practice test software. The PDF format is easy for those who always have their smart devices and love to study from them. Users can also make notes of printed PDF Oracle Database 23ai Administration Associate certification exam so they can study them anywhere to pass Oracle 1Z0-182 Certification test with a good score.
