Free PDF Quiz 2025 Valid Esri EAPA_2025: Latest ArcGIS Pro Associate 2025 Practice Questions

The importance of learning is well known, and everyone is struggling for their ideals, working like a busy bee. We keep learning and making progress so that we can live the life we want. Our EAPA_2025 study materials help users to pass qualifying examination to

obtain a qualification certificate are a way to pursue a better life. If you are a person who is looking forward to a good future and is demanding of yourself, then join the army of learning. Choosing our EAPA_2025 Study Materials will definitely bring you many unexpected results.

Esri EAPA_2025 Exam Syllabus Topics:

Topic	Details
Topic 1	• Create and Share Maps and Layouts: This section of the exam measures skills of GIS Specialist and includes creating polished maps—designing layouts, inserting elements like scale bars, legends, titles, and sharing outputs via print, PDF, or packages for collaboration.
Topic 2	• Automate Workflows: This section of the exam measures skills of GIS Specialist and examines your ability to build and manage models using ModelBuilder, construct geoprocessing workflows, chain together tools, and automate repeatable GIS tasks effectively.
Topic 3	• Edit Features and Organize Workflows: This section of the exam measures skills of GIS Analyst and evaluates your competency in editing geospatial features through snapping, templates, sketch tools, performing quality control, and managing simple tasks including map layouts and bookmarks.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q64-Q69):

NEW QUESTION # 64
A GIS analyst receives a project and data from a colleague. When opening the project, the analyst notices that the data links are broken. All the data is located in the same folder, and the analyst wants to repair all the broken links simultaneously.
Which workflow should the analyst use?

- A. Right-click the layer > Properties > Source > Set Data Source
- B. View > Catalog View > Data Sources > Item> New Path > Apply
- C. Click the red exclamation point > Change Data Source

Answer: B

Explanation:
The Data Sources tab in the Catalog View allows the analyst to repair multiple broken data paths simultaneously by assigning a new folder location. This is the most efficient way to repair multiple broken links at once.
* Set Data Source (Option A) and Change Data Source (Option B) only repair one layer at a time.
* Catalog View > Data Sources (Option C) supports batch repairs.
Therefore, the correct answer is C.
-

NEW QUESTION # 65
A GIS analyst has an electrical line feature class that contains attributes such as wire gauge and amperage.
The analyst wants to limit acceptable values during the editing process for amperage based on the choice of wire gauge.
Which type of attribute rule should be used?

- A. Validation rule
- B. Calculation rule
- C. Constraint rule

Answer: C

Explanation:
Constraint rules prevent invalid data entry during editing. In this case, a constraint rule ensures that only valid amperage values are allowed based on the chosen wire gauge. If an invalid amperage is entered, the rule will block the edit and display an error message.
* Calculation rule (Option A) automatically calculates values but doesn't prevent invalid inputs.
* Validation rule (Option C) flags invalid data but doesn't prevent edits from being saved.
Therefore, the correct answer is B.

-

NEW QUESTION # 66

Which ArcGIS Pro tab gives a user the option to export a map layout to a file?

- A. Map
- B. Share
- C. Project

Answer: B

Explanation:

The Share tab in ArcGIS Pro contains all options related to exporting maps, layouts, and sharing data. Export Layout options for formats like PDF, PNG, and others are found here.
* Project tab is used for application-level settings.
* Map tab is for map design and editing.
* Share tab includes all export and sharing options for layouts.
Therefore, the correct answer is C.

NEW QUESTION # 67

A GIS analyst has a buildings feature class. The analyst needs to show the type of building, such as commercial or residential, and extrude the buildings based on height.
Which symbology type should the analyst use to produce the required output?

- A. Dictionary
- B. Bivariate colors
- C. Attribute-driven

Answer: C

Explanation:

Attribute-driven symbology allows different fields to control different aspects of visualization. In this case, one field (building type) can control color or symbol category, while another field (building height) controls the 3D extrusion. Attribute-driven symbology is designed specifically for this type of multi-attribute control.
* Bivariate colors (Option B) map two numeric fields into a color grid but do not control extrusion.
* Dictionary symbology (Option C) applies rule-based symbology often used for military or complex symbols, not 3D extrusion.
Therefore, the correct answer is A.
-

NEW QUESTION # 68

A GIS technician wants to use raster functions to quickly visualize optimal positioning for solar panels based on a digital elevation model. Requirements state that for the area of interest, the panels must face north.
Additionally, flatter terrain is preferred.
Which function(s) will allow for the quickest visualization of these factors?

- A. Shaded Relief
- B. Curvature, Slope
- C. Aspect-Slope

Answer: C

Explanation:

The Aspect-Slope function combines slope and aspect information from a DEM to help identify ideal orientations and slope conditions for solar panel placement. Since north-facing panels and flatter slopes are required, this function directly provides both variables together for quick visualization.
* Curvature, Slope (Option A) would show slope steepness and surface curvature but not directionality (aspect).
* Shaded Relief (Option B) is only for visual hillshading and does not provide aspect or slope data.
Therefore, the correct answer is C.

-

NEW QUESTION # 69

......

The EAPA_2025 web-based practice exam requires no installation so you can start your preparation instantly right after you purchase. With thousands of satisfied customers around the globe, questions of the ArcGIS Pro Associate 2025 (EAPA_2025) exam dumps are real so you can pass the ArcGIS Pro Associate 2025 (EAPA_2025) certification on the very first attempt. Hence, it reduces your chances of failure and you can save money and time as well. Esri exam questions come in three formats i.e., web-based practice test, desktop practice test software, and PDF dumps.
