

Pass Guaranteed 2025 Fantastic Oracle Latest 1Z1-771 Test Guide

DOWNLOAD the newest TrainingQuiz 1Z1-771 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1dVLJVw7tpJ9O_bdiWsEN-XK4u8OWzsPT

The TrainingQuiz is one of the top-rated and trusted platforms that are committed to making the Oracle 1Z1-771 exam preparation simple, easy, and quick. To achieve this objective the TrainingQuiz is offering valid, updated, and easy-to-use Oracle 1Z1-771 Exam Practice test questions in three different formats. These three formats are Oracle 1Z1-771 exam practice test questions PDF dumps, desktop practice test software, and web-based practice test software.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 2	<ul style="list-style-type: none">Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.

Topic 3	<ul style="list-style-type: none"> • Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 4	<ul style="list-style-type: none"> • Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 5	<ul style="list-style-type: none"> • Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 6	<ul style="list-style-type: none"> • Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 7	<ul style="list-style-type: none"> • Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 8	<ul style="list-style-type: none"> • Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 9	<ul style="list-style-type: none"> • Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 10	<ul style="list-style-type: none"> • Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 11	<ul style="list-style-type: none"> • Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 12	<ul style="list-style-type: none"> • Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 13	<ul style="list-style-type: none"> • Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
Topic 14	<ul style="list-style-type: none"> • Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 15	<ul style="list-style-type: none"> • Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.

Valid 1Z1-771 Exam Tips & 1Z1-771 Real Sheets

With the best quality of 1Z1-771 braindumps pdf from our website, getting certified will be easier and fast. For the preparation of the certification exam, all you have to do is choose the most reliable 1Z1-771 real questions and follow our latest study guide. You can completely rest assured that our 1Z1-771 Dumps Collection will ensure you get high mark in the formal test. You will get lots of knowledge from our website.

Oracle APEX Cloud Developer Professional Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which two declarative options in Oracle APEX allow you to download BLOB/CLOB content?

- A. Download Dynamic Action
- B. Share Dynamic Action
- C. Download Page Process
- D. APEX_UTIL.DOWNLOAD PL/SQL API

Answer: A,C

Explanation:

Declarative options for downloading BLOB/CLOB content include:

Download Dynamic Action: A built-in action type to trigger downloads of BLOB/CLOB data.

Download Page Process: A process type that declaratively handles BLOB/CLOB downloads from a table.

APEX_UTIL.DOWNLOAD is a PL/SQL API, not a declarative option, and Share Dynamic Action is for sharing URLs, not downloading files.

NEW QUESTION # 20

Which two statements are true about the APEX_MAIL API?

- A. You can send emails using the APEX_MAIL package from an Oracle APEX application.
- B. You can add files as attachments to your emails using the APEX_MAIL package.
- C. The APEX_MAIL package supports sending emails only to Oracle database users.
- D. You can receive emails using the APEX_MAIL package in an Oracle APEX application.

Answer: A,B

Explanation:

The APEX_MAIL API facilitates email functionality:

A . You can add files as attachments: Using APEX_MAIL.ADD_ATTACHMENT (e.g.,

APEX_MAIL.ADD_ATTACHMENT(p_mail_id, p_attachment, p_filename)), you can attach BLOBs (e.g., PDFs) to emails.

C . You can send emails: APEX_MAIL.SEND (e.g., APEX_MAIL.SEND(p_to => 'user@example.com', p_body => 'Hello')) sends emails from APEX, leveraging the configured mail server.

B . You can receive emails: False; APEX_MAIL is send-only; receiving requires custom integration (e.g., IMAP).

D . Only to Oracle database users: False; emails can go to any valid address, not just database users.

Pitfall: Ensure the mail queue is processed (APEX_MAIL.PUSH_QUEUE) for timely delivery.

NEW QUESTION # 21

Which two statements are true about creating and using dynamic actions?

- A. If no client-side condition is defined, true actions will not fire.
- B. If a client-side condition is defined, the true action will fire when the condition is met.
- C. After you create a dynamic action, you cannot add more true actions.
- D. You can execute JavaScript code by creating a dynamic action.

Answer: B,D

Explanation:

Dynamic Actions in APEX enable responsive behavior:

If a client-side condition is defined, the true action will fire when the condition is met: A condition (e.g., this.browserEvent ===

'click') ensures the true action (e.g., Show, Hide) executes only when true, enhancing precision in event handling. You can execute JavaScript code by creating a dynamic action: The "Execute JavaScript Code" action type allows custom scripts (e.g., alert('Clicked!')); extending functionality beyond declarative options. Cannot add more true actions: False; multiple true actions can be added post-creation. No condition, true actions won't fire: False; without a condition, true actions fire unconditionally on the event. Dynamic Actions are a cornerstone of interactive UIs in APEX.

NEW QUESTION # 22

You have defined a REST Data Source with ORDS as the REST Data Source Type. The Source is being used as source for an editable Interactive Grid. When a user updates an employee record in this Interactive Grid, which operation is performed on the Database?

- A. GET
- **B. PUT**
- C. POST

Answer: B

Explanation:

An editable Interactive Grid synced with a REST Data Source (ORDS) maps CRUD operations to HTTP methods:

C . PUT: Updates an existing resource. When a user edits a row (e.g., changes SALARY), the grid sends a PUT request to the ORDS endpoint (e.g., /employees/101), updating the corresponding record.

A . POST: Creates new records, used for inserts, not updates.

B . GET: Retrieves data, used for initial grid population, not updates.

Technical note: ORDS maps PUT to an update operation on the underlying table, requiring the REST endpoint to support this method.

NEW QUESTION # 23

In a faceted search page, facets can be displayed as different UI types. Which two facet item types are supported in the faceted search region?

- **A. Checkbox Group**
- **B. Range**
- C. Popup LOV
- D. Date Picker

Answer: A,B

Explanation:

In Oracle APEX, a faceted search page allows users to filter data using facets, which are displayed as UI components in the Faceted Search region. According to the Oracle APEX documentation, the supported facet item types include:

Range: Used for numeric or date ranges, allowing users to filter data within a specified range (e.g., salary or hire date).

Checkbox Group: Used for multi-select options, enabling users to select multiple values from a list (e.g., departments).

Other types like Popup LOV and Date Picker are valid item types in APEX but are not natively supported as facet types in the Faceted Search region. Popup LOV is typically used for single-value selection in forms, and Date Picker is a standalone item type, not a facet-specific UI.

NEW QUESTION # 24

.....

Our 1Z1-771 exam materials are the product of this era, which conforms to the development trend of the whole era. It seems that we have been in a state of study and examination since we can remember, and we have experienced countless tests. In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained? Therefore, we get the test 1Z1-771 Certification and obtain the qualification certificate to become a quantitative standard, and our 1Z1-771 learning guide can help you to prove yourself the fastest in a very short period of time.
