

Pass Guaranteed 2025 Latest VMware 2V0-41.24: VMware NSX 4.X Professional V2 Reliable Exam Vce

P.S. Free & New 2V0-41.24 dumps are available on Google Drive shared by TestkingPass: https://drive.google.com/open?id=1AEp4iY3_X4MV57FCySXz_LxKTVpS0Ywh

In the PDF version, real 2V0-41.24 exam questions are available. These VMware 2V0-41.24 real questions are printable and portable. You can take this PDF document anywhere and study for the VMware NSX 4.X Professional V2 (2V0-41.24) exam without time restrictions. TestkingPass regularly make changes in the 2V0-41.24 PDF format when required. 2V0-41.24 questions in this format are relevant to the actual test.

VMware 2V0-41.24 Exam Syllabus Topics:

Topic	Details
Topic 1	VMware Solution: This section measures the skills of VMware NSX Networking professionals and covers knowledge of the VMware Virtual Cloud Network and NSX. Candidates will demonstrate an understanding of the NSX management cluster and the data plane, focusing on how these components interact to provide network virtualization.
Topic 2	Install, Configure, and Administrate the VMware Solution: This domain targets VMware System administrators and emphasizes preparing an NSX infrastructure for deployment. Candidates will learn to create transport zones and configure essential components necessary for a functional NSX environment.
Topic 3	Troubleshoot and Optimize the VMware Solution: This section evaluates the skills of VMware Networking Professionals in troubleshooting and optimizing NSX solutions. Candidates will use log files to identify issues, including locating default log file locations and generating log bundles to assist in diagnostics.

2V0-41.24 New Braindumps | Dumps 2V0-41.24 Cost

If I tell you, you can get international certification by using 2V0-41.24 preparation materials for twenty to thirty hours. You must be very surprised. However, you must believe that this is true! You can ask anyone who has used 2V0-41.24 Actual Exam. We can receive numerous warm feedbacks every day. Our reputation is really good. After you have learned about the achievements of 2V0-41.24 study questions, you will definitely choose us!

VMware NSX 4.X Professional V2 Sample Questions (Q18-Q23):

NEW QUESTION # 18

In an NSX environment, an administrator is observing low throughput and congestion between the Tier-0 Gateway and the upstream

physical routers.

Which two actions could address low throughput and congestion? (Choose two.)

- A. Add an additional vNIC to the NSX Edge node.
- **B. Configure ECMP on the Tier-0 gateway.**
- C. Configure NAT on the Tier-0 gateway.
- **D. Deploy Large size Edge node/s.**
- E. Configure a Tier-1 gateway and connect it directly to the physical routers.

Answer: B,D

Explanation:

Configure ECMP on the Tier-0 gateway: ECMP (Equal-Cost Multi-Path) allows multiple paths for traffic between the Tier-0 Gateway and the upstream physical routers, effectively distributing the traffic load and improving throughput. By enabling ECMP, you can reduce congestion and increase bandwidth utilization, thus addressing performance issues.

Deploy Large size Edge node/s: Deploying larger Edge nodes can provide more resources (CPU, memory, and network interfaces) to handle higher throughput and reduce congestion. This is especially important if the existing Edge node is overwhelmed by the amount of traffic.

NEW QUESTION # 19

Which three data collection sources are used by NSX Network Detection and Response to create correlations/Intrusion campaigns? (Choose three.)

- **A. Files and anti-malware (file events from the NSX Edge nodes and the Security Analyzer)**
- B. Distributed Firewall flow data from the ESXi hosts
- **C. Suspicious Traffic Detection events from NSX Intelligence**
- D. East-West anti-malware events from the ESXi hosts
- **E. IDS/IPS events from the ESXi hosts and NSX Edge nodes**

Answer: A,C,E

Explanation:

<https://docs.vmware.com/en/VMware-NSX-T-Data-Center/3.2/administration/GUID-14BBE50D-9931-4719-8FA7-884539C0D277.html>

NEW QUESTION # 20

What are four NSX built-in role-based access control (RBAC) roles? (Choose four.)

- A. Read
- B. Full Access
- **C. Enterprise Admin**
- **D. LB Operator**
- **E. Network Admin**
- F. None
- **G. Auditor**

Answer: C,D,E,G

Explanation:

<https://docs.vmware.com/en/VMware-NSX/4.1/administration/GUID-26C44DE8-1854-4B06-B6DA-A2FD426CDF44.html>

NEW QUESTION # 21

When configuring OSPF on Tier-0 Gateway, which three of the following must match in order to establish a neighbor relationship with an upstream router? (Choose three.)

- **A. Area ID**
- B. Address of the neighbor
- **C. MTU of the Uplink**

C Naming convention

- D. Protocol and Port
- E. Subnet mask

Answer: A,C,E

Explanation:

Area ID: Both routers must belong to the same OSPF area for a neighbor relationship to form.

MTU of the Uplink: Mismatched MTU settings can prevent the OSPF adjacency from forming, as OSPF packets may be dropped if they exceed the MTU size.

Subnet mask: Both routers must have the same subnet mask on the interface where OSPF is configured to establish a neighbor relationship.

NEW QUESTION # 22

Which two of the following will be used for Ingress traffic on the Edge node supporting a Single Tier topology? (Choose two.)

- A. Tier-1 SR Router Port
- B. Downlink Interface for the Tier-0 DR
- C. Inter-Tier interface on the Tier-0 gateway
- D. Downlink Interface for the Tier-1 DR
- E. Tier-0 Uplink interface

Answer: B,E

Explanation:

The two interfaces that will be used for ingress traffic on the Edge node supporting a Single Tier topology are:

B) Tier-0 Uplink interface

C) Downlink Interface for the Tier-0 DR

The Tier-0 Uplink interface is the interface that connects the Tier-0 gateway to the external network. It is used to receive traffic from the physical router or switch that is the next hop for the Tier-0 gateway. The Tier-0 Uplink interface can be configured with a static IP address or use BGP to exchange routes with the external network.

The Downlink Interface for the Tier-0 DR is the interface that connects the Tier-0 gateway to the workload segments. It is used to receive traffic from the VMs or containers that are attached to the segments. The Downlink Interface for the Tier-0 DR is a logical interface (LIF) that is distributed across all transport nodes that host the segments. The Downlink Interface for the Tier-0 DR has an IP address that acts as the default gateway for the VMs or containers on the segments.

NEW QUESTION # 23

.....

Take your exam preparation to the next level with TestkingPass VMware Practice Test engine. Our practice test engine is designed by experts and features real VMware NSX 4.X Professional V2 (2V0-41.24) practice questions, providing you with a simulated exam environment. By using the practice test engine, you can assess your progress, identify areas of weakness, and master the exam material. This interactive tool enhances your understanding of the actual 2V0-41.24 pattern, ensuring you feel fully prepared on exam day.
