Hot Sharing-and-Visibility-Architect Reliable Braindumps 100% Pass | Valid Sharing-and-Visibility-Architect Quiz: Salesforce Certified Sharing and Visibility Architect

These formats hold high demand in the market and offer a great solution for quick and complete Salesforce Certified Sharing and Visibility Architect (Sharing-and-Visibility-Architect) exam preparation. These formats are Sharing-and-Visibility-Architect PDF dumps, web-based practice test software, and desktop practice test software. All these three Salesforce Certified Sharing and Visibility Architect (Sharing-and-Visibility-Architect) exam questions contain the real, valid, and updated Salesforce Exams that will provide you with everything that you need to learn, prepare and pass the challenging but career advancement Sharing-and-Visibility-Architect certification exam with good scores.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47
A sales rep at Universal Containers was added to an opportunity team with Read/Write permissions.
Which action is she allowed to perform in the opportunity?

- A. Update opportunity stage.
- B. Replace opportunity owner.
- C. Add/remove members in the opportunity team.

Answer: A

Explanation:
The Opportunity Team feature allows collaboration by granting specific permissions (Read, Read/Write, or access defined by roles) to users added to an opportunity. In this scenario, the sales rep has Read/Write permissions, which means they can:
* View and update the opportunity, including editing fields like the opportunity stage.
* They cannot perform administrative tasks like transferring ownership or managing the opportunity team unless explicitly granted "Full Access" or assigned additional roles that permit these actions.
* Option A (Correct): Updating the opportunity stage is allowed as part of Read/Write access.
* Option B: Replacing the opportunity owner requires administrative privileges, which are not included in standard Read/Write permissions.
* Option C: Adding or removing members in the opportunity team requires "Full Access," which exceeds Read/Write permissions.

* Opportunity Team Management
* Salesforce Sharing and Permissions Documentation

NEW QUESTION # 48
Assuming Person Account is enabled in a Salesforce organization, which three objects can be configured as "Controlled by Parent" in Sharing Settings?
Choose 3 answers

- A. Contact
- B. Case
- C. Asset
- D. Order
- E. Opportunity

Answer: A,C,D

NEW QUESTION # 49
Universal Containers (UC) uses a custom Visualforce page to display shipment tracking information (custom object, private OWD) to field manager and agents. The IT team wants to make sure that users have access to only the information that is allowed.
Which Apex method must be used to make sure only allowed fields are shown to the users?

- A. isReadable()
- B. isViewable()
- C. isAccessible()
- D. isShowable()

Answer: C

NEW QUESTION # 50
What should a Salesforce architect recommend to make sure that users that gained access to a custom of sharing do not lose access to it when its owner is changed?

- A. Use "With Sharing" keyword to make sure record visibility will be considered
- B. Use "runAS" system method in Apex classes to enforce record visibility.
- C. Create a specific Sharing Reason for the custom object.
- D. Create a new record in_Share object with RowCause "Manual"

Answer: C

Explanation:
Explanation

Creating a specific Sharing Reason for the custom object is the best way to make sure that users that gained access to a custom object do not lose access to it when its owner is changed. Sharing Reasons are labels that identify why users or groups have access to records. They are used in Apex managed sharing, which allows developers to programmatically create and maintain sharing rules1. Using "runAS" system method in Apex classes to enforce record visibility, creating a new record in_Share object with RowCause "Manual", and using "With Sharing" keyword to make sure record visibility will be considered are not ways to prevent losing access when the owner changes.

NEW QUESTION # 51
How would you make sure Visualforce page is security proof? Choose 3 answers

- A. Use debug to check hijacked requests
- B. Manually check for sql injection
- C. Submit to force security scanner
- D. Use web application tool for security
- E. Manually check for cross site

Answer: A,C,D

Explanation:
Explanation
According to this source, submitting to Force.com Security Scanner, using web application security tools, and using debug logs to check hijacked requests are some of the ways to make sure Visualforce pages are secure.
The other options are not sufficient or recommended.

NEW QUESTION # 52

......

We understand your enthusiasm of effective practice materials, because they are the most hopeful tools help us gain more knowledge with the least time to achieve success, and we have been in your shoes.
