## Salesforce Certified Industries CPQ Developer Sample Questions (Q252-Q257):

#### NEW QUESTION # 252

A product does not need a base price to:

Note: This question displayed answer options in random order when taking this Test.

- A. Appear in the cart
- B. Indicate the type of price it is
- C. Have rules associated with it
- D. Show up as a pricing variable

**Answer: A**

#### NEW QUESTION # 253

What does the affectivity date for a product's price list entry control?

- A. Whether a pricing element can be paired with a pricing variable
- B. Whether the product displays in the Products list of the cart
- C. Whether a pricing element is used or not
- D. Whether an adjustment or an override can be used to discount the product

**Answer: B**

Explanation:

The affectivity date for a product's price list entry in Salesforce Industries CPQ controls whether the product displays in the Products list of the cart. This date defines the period during which a specific price list entry is valid. If the current date falls within the affectivity date range, the product and its associated pricing are considered active and will display in the cart's product list. This helps manage the availability of products for sale based on temporal pricing strategies or promotional periods.

#### NEW QUESTION # 254

What does the remote method postCartItems do?

Note: This question displayed answer options in random order when taking this Test.

- A. Submits the order
- B. puts items in the cart
- C. Filters products for the cart
- D. Moves the order to the next stage
- E. Puts the items in the selectables list

**Answer: B**

Explanation:

The remote method postCartItems in Guided Selling is specifically designed to put items into the cart. This method handles the addition of selected products to the cart, allowing for further actions such as quantity updates, configuration changes, or removals. It is an integral part of managing cart operations dynamically within the guided selling process, facilitating user interactions and backend processes that reflect the current state of the cart.

#### NEW QUESTION # 255

When you create a quote from an existing asset, what will the status of the corresponding line Item be?

- A. Existing
- B. Disconnect
- C. Add
- D. Change

**Answer: D**

#### NEW QUESTION # 256

You can apply context rules to order line Items.

- A. True
- B. False

**Answer: A**

Explanation:

Context rules can indeed be applied to order line items in Salesforce Industries CPQ. These rules assess the context in which products are sold and apply specific configurations or restrictions based on that context. This capability is crucial for ensuring that products and services are configured and priced correctly according to the specific circumstances of an order, enhancing accuracy and compliance in sales operations.
