P.S. Free & New C-ACDET-2506 dumps are available on Google Drive shared by ExamsTorrent: https://drive.google.com/open?id=1_rVLhBZ7GLdNgKBp7711rzJH8mCdWzV_

Now SAP C-ACDET-2506 certification test is very popular. Not having got C-ACDET-2506 certificate, you must want to take the exam. Indeed, SAP C-ACDET-2506 test is very difficult exam, but this is not suggested that you cannot get high marks and pass your exam with ease. Without knowing the shortcut of SAP C-ACDET-2506 Exam, do you want to know the testing technique? As for the point, I can tell you that ExamsTorrent SAP C-ACDET-2506 study guide is your unique choice.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Exam SAP C-ACDET-2506 PDF & C-ACDET-2506 Detailed Study Plan

In order to let you have a deep understanding of our C-ACDET-2506 learning guide, our company designed the trial version for our customers. We will provide you with the trial version of our C-ACDET-2506 study materials before you buy our products. If you want to know our C-ACDET-2506 Training Materials, you can download the trial version from the web page of our company. It is easy and fast to download the free trial version of our C-ACDET-2506 exam braindumps.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q31-Q36):

NEW QUESTION # 31

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields. What is the recommended way to handle this scenario?

- A. Create a Microsoft Form from the Actions menu for managing all the requirements.
- **B. Configure as many custom fields as possible for data capture purposes.**
- C. Suggest the customer put a Word document on the template and capture all information in that document.
- D. Create a dynamic form (dform) where common data can be synced with the project header through customization.

Answer: B

Explanation:

The recommended approach is to configure custom fields for capturing non-standard data in sourcing projects or contracts. Custom fields allow structured data capture directly within SAP Ariba, which can then be fully included in reporting and analytics. Documents like Word files (A) are unstructured and not reportable. Dynamic forms synced with project headers (B) are not supported as standard functionality. External tools like Microsoft Forms (C) do not integrate with SAP Ariba's reporting capabilities. Custom fields can include picklists, validation rules, translations, and help tips, enabling flexible, maintainable data collection aligned with reporting and compliance needs.

NEW QUESTION # 32

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- **A. Deployment Description**
- B. Partner Statement of Work
- C. Inline Help
- D. Onboard Resource Center

Answer: A

NEW QUESTION # 33

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? (Select 2 correct answers)

- A. SAP Ariba Buying and Invoicing
- **B. SAP Ariba Supplier Lifecycle and Performance**
- **C. SAP Ariba Contracts**
- D. SAP Ariba Category Management

Answer: B,C

Explanation:

The SAP Ariba Strategic Sourcing Suite typically includes SAP Ariba Contracts and SAP Ariba Supplier Lifecycle and Performance (SLP) solutions. These modules, along with SAP Ariba Sourcing and Supplier Risk, form the core sourcing suite for supplier management, contract lifecycle management, and performance analytics. Category Management and Buying and Invoicing belong to different SAP Ariba product suites focused on procurement and spend management rather than strategic sourcing.

NEW QUESTION # 34

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- B. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.
- C. Discard any other packages that appear in My Action Items.
- D. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- E. Publish the form template within the test site in order to add the form fields in the package.

Answer: A,B,D

NEW QUESTION # 35

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- B. New templates that successfully migrated to the production site are in Draft state.
- C. Draft templates on the source site are skipped.
- D. Batch imports are available for templates when migrating configuration bundles.

Answer: B,C

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

NEW QUESTION # 36

.....

The SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our C-ACDET-2506 exam torrent and then you can attend the exam. Among the people who prepare for the exam, many are office workers or the students. For the office worker, they are both busy in the job or their family; for the students, they possibly have to learn or do other things.
