Three Formats of BraindumpsVCE SolarWinds SCP-NPM Practice Test Questions

We offer you free demo for SCP-NPM pdf dumps. You can check out the questions quality and usability of our training material before you buy. SolarWinds SCP-NPM questions are written to the highest standards of technical accuracy with accurate answers. If you prepare for your exams using BraindumpsVCE SCP-NPM practice torrent, it is easy to succeed for your certification in the first attempt. Besides, we offer the money refund policy, in case of failure, you can ask for full refund.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

You want to limit a user to only monitor Windows servers and not be able to view other devices that NPM monitors. How can you do this?

- A. Alert limitations
- B. Account views
- C. Account limitations
- D. View permissions

Answer: C

Explanation:

Account limitations are a way of restricting the access of Orion user accounts to specific network objects, such as nodes, interfaces, groups, maps, or alerts. You can use account limitations to limit a user to only monitor Windows servers and not be able to view other devices that NPM monitors. For example, you can create a custom limitation based on the node property Operating System, and select only Windows as the value. Then, you can apply this limitation to the user account or user group that you want to restrict. The other options are not effective ways of limiting user access to specific devices, as they either affect the visibility of the entire view (view permissions), the layout of the view (account views), or the scope of the alerts (alert limitations). Reference:

Limit user access to network areas with account limitations

Create custom account limitations

NEW QUESTION # 31

How can you add entities from NPM to monitor for all registered devices in your company domain?

- A. Select to query Domain Controllers in a Network Discovery and then select the Organizational Units (OUs) with the registered devices you want to scan
- B. Add each of your Domain Controllers as nodes to NPM and scan Active Directory Organization Units (OUs) for the registered devices
- C. Add each registered device individually, and then select the entities you want to monitor
- D. Use the NPM Active Directory Discovery tool to find all registered devices on the domain

Answer: A

Explanation:

Network Discovery is a feature of SolarWinds NPM that allows you to automatically discover and add network devices to the Orion Platform for monitoring. You can use Network Discovery to query Domain Controllers in your company domain and then select the Organizational Units (OUs) with the registered devices you want to scan. This way, you can add entities from NPM to monitor for all registered devices in your company domain in a single discovery. The other options are not as efficient or accurate as Network Discovery, as they either require manual addition of each device, or rely on the Domain Controllers to provide the list of registered devices, which may not be up-to-date or complete. References:

Discover your network devices and add them to the Orion Platform

Discover devices on your network using Active Directory

NEW QUESTION # 32

You inherit an environment with NPM and begin to receive High Traffic Utilization alerts from interfaces. When you view the alert, the issue is resolved. How do you modify NPM to receive fewer false alerts?

- A. Increase the statistics polling frequency on the problematic interfaces
- B. Configure the alert so that it resets only when traffic utilization remains high for a sustained period
- C. Increase the status polling frequency on the problematic interfaces

- D. Configure the alert so that it triggers only when traffic utilization remains high for a sustained period

Answer: A

NEW QUESTION # 33

How can you ensure the trigger actions you set on an alert will work?

- A. Click **Simulate on the assigned trigger action**
- B. Simulate a performance interruption on a network device to test the alert trigger
- C. Use the Database Manager to trigger and test the alert
- D. Test the alert from within Alert View of the Web Console

Answer: A

Explanation:

When you create or edit an alert, you can test the trigger and reset actions by clicking **Simulate** next to the action you want to test. This will execute the action regardless of the trigger condition. You can also select an object to resolve any variables you have used in your action. For example, if your action is to send an email with the node name and status, you can select a node to see how the email will look like. This way, you can ensure the trigger actions you set on an alert will work as expected. References: Test alert triggers and actions in the SolarWinds Platform, How to Create Intelligent Alerts with NPM, How alerts work.

NEW QUESTION # 34

While building an Orion map in the NPM web console you notice that two of your devices do not show a connection between them. You verify the two devices are connected. How can you resolve this issue? (Choose all that apply.)

- A. Build a new Orion map and add the related entities instead of the nodes
- B. **Build a custom connection between the devices**
- C. Change the monitoring method from SNMP to CLI
- D. **Verify you are monitoring Layer 2 and 3 topologies**

Answer: B,D

NEW QUESTION # 35

.....

Hence, memorizing them will help you get prepared for the SolarWinds SCP-NPM examination in a short time. The product of BraindumpsVCE comes in PDF, desktop practice exam software, and SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) web-based practice test. To give you a complete understanding of these formats, we have discussed their features below.

Reliable SCP-NPM Test Book: https://www.braindumpsvce.com/SCP-NPM_exam-dumps-torrent.html

SCP-NPM from BraindumpsVCE's audio training and the great BraindumpsVCE SCP-NPM online audio lectures can make your future bright y providing you success in the challenging certification, Working in IT industry, IT people most want to attend SolarWinds Reliable SCP-NPM Test Book certification exam, Here's How, The desktop SolarWinds Network Performance Monitor (NPM) Exam practice exam software comes with all specs of the SolarWinds SCP-NPM web-based version but it works offline only on Windows computer or laptop.

That's where this Quick Guide comes in, That event came to be known as the Battle of the Coral Sea, SCP-NPM from BraindumpsVCE's audio training and the great BraindumpsVCE SCP-NPM online audio lectures can make your future bright y providing you success in the challenging certification.

Enhance Your Success Rate with BraindumpsVCE's SolarWinds SCP-NPM Exam Dumps

Working in IT industry, IT people most want to SCP-NPM attend SolarWinds certification exam, Here's How, The desktop SolarWinds Network Performance Monitor (NPM) Exam practice exam software comes with all specs of the SolarWinds SCP-

NPM web-based version but it works offline only on Windows computer or laptop.

Once you have used our SCP-NPM exam training guide in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use SCP-NPM exam training at your own right.
