

# Pass Guaranteed 2025 The Best Oracle Valid 1Z1-771 Exam Papers

2025 Latest ActualTestsQuiz 1Z1-771 PDF Dumps and 1Z1-771 Exam Engine Free Share: <https://drive.google.com/open?id=1yby2hH2sArdTx0lvwb4YZ4fwn-LEf7gO>

Exams like the Oracle 1Z1-771 exam provided by Oracle are crucial for the advancement of your career. Candidates want to succeed on their Oracle APEX Cloud Developer Professional exam. For candidates to study for and successfully pass their chosen certification exam the first time, ActualTestsQuiz provides Oracle APEX Cloud Developer Professional 1Z1-771 Exam Questions. You may use the top 1Z1-771 study resources from ActualTestsQuiz to prepare for the Oracle APEX Cloud Developer Professional exam. Oracle 1Z1-771 exam questions are a dependable and trustworthy source of training.

## Oracle 1Z1-771 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                           |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li></ul> |
|         |                                                                                                                                                                                                                                                                                                                   |

|          |                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 2  | <ul style="list-style-type: none"> <li>Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li> </ul>                                                                                          |
| Topic 3  | <ul style="list-style-type: none"> <li>Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>                                                                                          |
| Topic 4  | <ul style="list-style-type: none"> <li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li> </ul>                                                                                 |
| Topic 5  | <ul style="list-style-type: none"> <li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li> </ul>                                                                        |
| Topic 6  | <ul style="list-style-type: none"> <li>Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>                                                                               |
| Topic 7  | <ul style="list-style-type: none"> <li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>                                                                                             |
| Topic 8  | <ul style="list-style-type: none"> <li>Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li> </ul>                                                                                                |
| Topic 9  | <ul style="list-style-type: none"> <li>Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>                                                            |
| Topic 10 | <ul style="list-style-type: none"> <li>Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>                                                                             |
| Topic 11 | <ul style="list-style-type: none"> <li>Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li> </ul> |
| Topic 12 | <ul style="list-style-type: none"> <li>Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>                                                                                |
| Topic 13 | <ul style="list-style-type: none"> <li>Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li> </ul>                                                                                             |
| Topic 14 | <ul style="list-style-type: none"> <li>Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>                                                                                        |
| Topic 15 | <ul style="list-style-type: none"> <li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>                                                                                               |

## Training Oracle 1Z1-771 Materials - High 1Z1-771 Passing Score

No matter where you are, we will ensure that you can use our 1Z1-771 guide quiz at any time. We have provided you with three versions for your choice: the PDF, Software and APP online. At home, you can use the Software. Outside, you can use the APP version of our 1Z1-771 Study Materials. If you like the aroma of paper, you can choose the PDF version. You can carry the printed material with you and write your own notes on it. If you want to know more about them, just free download the demos of our 1Z1-771 exam questions.

### Oracle APEX Cloud Developer Professional Sample Questions (Q18-Q23):

#### NEW QUESTION # 18

Which two Plugin types can be created in Oracle APEX?

- A. Validation
- B. Region
- C. Process
- D. Email Template

**Answer: B,C**

Explanation:

Plugins extend APEX's functionality beyond built-in components:

C . Process: A Process plugin executes custom server-side logic (e.g., PL/SQL) during page processing or AJAX calls. Example: A plugin to sync data with an external API after form submission. It's defined with execution points and parameters.

D . Region: A Region plugin creates custom UI areas (e.g., a dynamic chart or carousel). Example: A plugin rendering a custom dashboard. It supports attributes, templates, and refresh events.

A . Validation: While validations are customizable, they're not a plugin type; they're declarative or PL/SQL-based within APEX.

B . Email Template: Email formatting is handled via APEX\_MAIL or templates in Shared Components, not as plugins.

Technical Insight: Plugins are created in Shared Components > Plug-ins, requiring PL/SQL for logic, JavaScript/CSS for UI, and a render function. For instance, a Region plugin might use apex\_plugin.t\_region to define its output.

Use Case: A Process plugin to log audit trails or a Region plugin for a unique data visualization.

Pitfall: Developing plugins requires advanced skills; test thoroughly to avoid runtime errors.

#### NEW QUESTION # 19

Which two are valid evaluation points for Authorization Schemes?

- A. Once per page view
- B. Once per user
- C. Once per session
- D. Never

**Answer: A,C**

Explanation:

Authorization Schemes in APEX can be evaluated at:

Once per page view: Checks authorization each time a page is rendered.

Once per session: Checks once per user session, caching the result.

Once per user and Never are not valid evaluation points in the Authorization Scheme settings.

#### NEW QUESTION # 20

What are two reasons to enable the "Used by App Builder" option while creating a Generative AI Server?

- A. To create a REST-enabled database object
- B. To author SQL powered by Generative AI
- C. To create a Working Copy of your application

- **D. To build applications using natural language powered by Generative AI**

**Answer: B,D**

Explanation:

Enabling "Used by App Builder" for a Generative AI Server allows:

Author SQL powered by Generative AI: Integrates AI-driven SQL generation in App Builder.

Build applications using natural language: Enables natural language prompts to create app components.

Options A and B are unrelated to this setting, as it's specific to AI integration in App Builder.

#### NEW QUESTION # 21

There is a validation of type Item is Numeric on the P1\_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- A. Setting Value Required to Yes on P1\_SALARY.
- **B. Setting Display Location to Inline in Notification**
- C. Removing P1\_SALARY from the validation Associated Item.

**Answer: B**

Explanation:

Validation errors in APEX default to both inline (next to the item) and notification (top of page):

C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.

A . Removing Associated Item: Breaks the validation's link to P1\_SALARY, stopping it entirely.

B . Value Required: Adds a separate check, unrelated to display location.

Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.

#### NEW QUESTION # 22

What do you achieve by performing the "Refresh Working Copy" task?

- A. Update the changes from one Working Copy to another.
- **B. Get the latest updates from the Main application.**
- C. Merge the Working Copy changes with the Main application.

**Answer: B**

Explanation:

Working Copies in APEX allow safe experimentation:

C . Get the latest updates from the Main application: "Refresh Working Copy" (in App Builder > Working Copies) pulls changes from the Main application into the Working Copy, ensuring it reflects the latest state (e.g., new pages, fixes) without overwriting Working Copy changes.

A . Merge with Main: Merging is a separate "Merge Working Copy" task.

B . Update between Working Copies: Not supported; refreshing is Main-to-Working only.

Practical note: Use this to sync collaborative development efforts.

#### NEW QUESTION # 23

.....

Success in the test of the Oracle APEX Cloud Developer Professional (1Z1-771) certification proves your technical knowledge and skills. The Oracle APEX Cloud Developer Professional (1Z1-771) exam credential paves the way toward landing high-paying jobs or promotions in your organization. Many people who attempt the Oracle APEX Cloud Developer Professional (1Z1-771) exam questions don't find updated practice questions. Due to this they don't prepare as per the current Oracle APEX Cloud Developer Professional (1Z1-771) examination content and fail the final test. Failure in the Oracle APEX Cloud Developer Professional (1Z1-771) exam dumps wastes the money and time of applicants.
