OCPE Pesticide Applicator Category 7A General and Household Pest Control Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33

Cockroaches develop through:

- A. Complete metamorphosis (egg, larva, pupa, adult)
- **B. Gradual metamorphosis (egg, nymph, adult)**
- C. Total metamorphosis (egg, adult)

Answer: B

Explanation:

Cockroaches undergo gradual metamorphosis, which includes three stages: egg, nymph, and adult.

Nymphs hatch from eggs and resemble smaller, wingless adults, molting several times before reaching maturity. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7:

Cockroaches) confirms this life cycle for common species like the German cockroach. Option B (complete metamorphosis) applies to insects like flies or beetles. Option C (total metamorphosis) is not a recognized term and is incorrect.

NEW QUESTION # 34

Silverfish feed on:

- **A. Starch materials associated with paper, books, and wallpaper**
- B. Wool or cotton fabrics
- C. Grain found in kitchen areas

Answer: A

Explanation:

Silverfish are known to feed on starch materials like paper, books, and wallpaper, as well as starchy foods. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7:

Silverfish) notes that they are common in damp areas and can damage household items containing starch or glue. Option A (grain) is more typical of pantry pests like weevils. Option B (wool or cotton) is associated with clothes moths, not silverfish.

NEW QUESTION # 35

The "recipe" used to mix the pesticide includes the:

- A. Rate per given area
- **B. Total amount of pesticide concentrate and diluent**
- C. Percentage of water used

Answer: B

Explanation:

The "recipe" for mixing a pesticide refers to the specific instructions for preparing the pesticide solution, which includes the total

amount of pesticide concentrate (active ingredient) and diluent (e.g., water or another carrier) to achieve the correct concentration for application. This is detailed on the pesticide label and in the General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 5: Pesticide Application). Option B (percentage of water) is incorrect because the label specifies amounts, not percentages. Option C (rate per given area) refers to the application rate, not the mixing recipe.

NEW QUESTION # 36

The suggested method for earwig control is an:

- A. Interior and exterior foundation fogging
- B. Interior baseboard residual spray
- C. Exterior treatment along with debris removal along the foundation

Answer: C

Explanation:

Earwigs are outdoor pests that enter structures, often hiding in debris near foundations. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Earwigs) recommends exterior treatment (e.g., perimeter spraying) combined with debris removal to eliminate harborage sites. Option A (fogging) is not a standard method for earwigs. Option B (interior baseboard spray) may be used but is less effective without addressing outdoor sources.

NEW QUESTION # 37

Bedbugs go through:

- A. Gradual metamorphosis (nymphs similar to adult stage)
- B. Just two stages (egg and adult)
- C. Four distinct stages of development (egg, larva, pupa, and adult)

Answer: A

Explanation:

Bedbugs undergo gradual metamorphosis, also known as incomplete metamorphosis, which includes three stages: egg, nymph, and adult. Nymphs resemble smaller versions of adults and go through several molts before reaching maturity. The General Pest Management: Guide for Commercial Applicators - Category 7A (Chapter 7: Bedbugs) confirms this life cycle. Option A (four stages: egg, larva, pupa, adult) describes complete metamorphosis, typical of insects like beetles, not bedbugs. Option C (two stages) is incorrect, as nymph stages are a critical part of bedbug development.

NEW QUESTION # 38

.....

After a series of investigations and studies, we found that those students who wish to pass the Category-7A-General-and-Household-Pest-Control exam through their own in-depth study of the textbooks are often slack in their learning.
