NEW QUESTION # 35

Which UiPath Communications Mining model performance factor relates to the proportion of messages in the dataset that have informative label predictions?

- **A. Coverage.**
- B. Balance.
- C. Average label performance.
- D. Underperforming labels.

Answer: A

Explanation:

In UiPath Communications Mining, the term Coverage refers to the proportion of messages in the dataset that have informative label predictions. This is an important metric that indicates how much of the dataset the model is able to classify with meaningful and relevant labels. High coverage means that the model is effectively assigning labels to a large portion of the data, which is crucial for ensuring the model's usefulness in automating communication mining tasks.

NEW QUESTION # 36

Which Source Control Plugins can be connected at the same time?

- A. GIT, SVN, TFS
- **B. You cannot connect to multiple plugins at the same time.**
- C. GIT, TFS, Azure DevOps
- D. GIT, TFS

Answer: B

Explanation:

UiPath Studio does not allow connecting to multiple source control plugins at the same time. A single version control system (e.g., GIT, TFS, SVN) can be used per project to manage code versions.

NEW QUESTION # 37

Which of the following statements is true regarding reviewing and applying entities in UiPath Communications Mining?

- **A. All of the entities within a paragraph should be reviewed.**
- B. A single entity value can be split across multiple paragraphs.
- C. If the entity value is correctly predicted, but the entity type is wrong, it cannot be changed.
- D. All of the entities in a communication must be reviewed.

Answer: A

Explanation:

According to the UiPath Communications Mining documentation, reviewing and applying entities is a crucial step for improving the accuracy and performance of the entity extraction models. When reviewing entities, users should check all of the predicted entities within a paragraph, as well as any missing or incorrect ones.

Users can accept, reject, edit, or create entities using the platform's interface or keyboard shortcuts. Users can also change the entity type if the value is correct but the type is wrong. Reviewing and applying entities helps the platform learn from the user feedback and refine its predictions over time. It also helps users assess the automation potential and benefit of the communications data.
