Prep4sures AWS-Solutions-Associate practice test has real AWS-Solutions-Associate exam questions. You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) exam dumps. Here we listed some of the most important benefits you can get from using our AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) practice questions.

The AWS Certified Solutions Architect - Associate exam is a computer-based exam consisting of multiple-choice and multiple-response questions. AWS-Solutions-Associate exam is designed to test an individual's knowledge and expertise in various areas, including designing and deploying scalable, highly available, and fault-tolerant systems on AWS, selecting the appropriate AWS services to meet specific requirements, and understanding AWS architectural best practices.

The AWS-Solutions-Associate Certification is valid for two years, after which candidates must recertify to maintain their credentials. Recertification can be achieved by passing the latest version of the AWS-Solutions-Associate exam or by achieving a higher-level certification, such as the AWS Certified Solutions Architect - Professional.

Pass Guaranteed Quiz Amazon - AWS-Solutions-Associate Reliable Test Cram

The AWS-Solutions-Associate Practice Questions are designed and verified by experienced and renowned AWS Certified Solutions Architect - Associate (SAA-C03) exam trainers. They work collectively and strive hard to ensure the top quality of Prep4sure AWS-Solutions-Associate exam practice questions all the time. The AWS-Solutions-Associate Exam Questions are real, updated, and error-free that helps you in AWS Certified Solutions Architect - Associate (SAA-C03) exam preparation and boost your confidence to crack the upcoming AWS-Solutions-Associate exam easily.

Amazon AWS-Solutions-Architect-Associate exam is a certification exam that tests the knowledge and skills of candidates in designing and deploying scalable, highly available, and fault-tolerant systems on Amazon Web Services (AWS). AWS-Solutions-Associate Exam is intended for individuals who have experience in designing and deploying cloud-based solutions on AWS and want to validate their skills and knowledge.

Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q497-Q502):

NEW QUESTION # 497

A mobile client requires data from several application-layer services to populate its user interface. What can the application team use to decouple the client interface from the underlying services behind them?

- A. Amazon API Gateway
- **B. Amazon Cognito**
- C. Application Load Balancer
- D. AWS Device Farm

Answer: B

NEW QUESTION # 498

A company needs to implement a relational database with a multi-Region disaster recovery Recovery Point Objective (RPO) of 1 second and an Recovery Time Objective (RTO) of 1 minute. Which AWS solution can achieve this?

- A. Amazon DynamoDB global tables.
- B. Amazon Aurora Global Database
- **C. Amazon RDS for MySQL with Multi-AZ enabled.**
- D. Amazon RDS for MySQL with a cross-Region snapshot copy.

Answer: C

NEW QUESTION # 499

A company hosts a website analytics application on a single Amazon EC2 On-Demand Instance. The analytics application is highly resilient and is designed to run in stateless mode.

The company notices that the application is showing signs of performance degradation during busy times and is presenting 5xx errors. The company needs to make the application scale seamlessly.

Which solution will meet these requirements MOST cost-effectively?

- **A. Create an Amazon Machine Image (AMI) of the web application. Apply the AMI to a launch template. Create an Auto Scaling group that includes the launch template. Configure the launch template to use a Spot Fleet. Attach an Application Load Balancer to the Auto Scaling group.**
- B. Create an AWS Lambda function to stop the EC2 instance and change the instance type. Create an Amazon CloudWatch alarm to invoke the Lambda function when CPU utilization is more than 75%.
- C. Create an Amazon Machine Image (AMI) of the web application. Use the AMI to launch a second EC2 On-Demand Instance. Use an Application Load Balancer to distribute the load across the two EC2 instances.
- D. Create an Amazon Machine Image (AMI) of the web application. Use the AMI to launch a second EC2 On-Demand Instance. Use Amazon Route 53 weighted routing to distribute the load across the two EC2 instances.

Answer: A

Explanation:

Auto Scaling is the most effective solution for ensuring seamless scalability of a stateless application. Key points:

Leverages Auto Scaling with a Spot Fleet for cost efficiency and attaches an ALB to distribute traffic.

A and B do not provide automated scaling and would require manual intervention to add more instances.

C changes the instance type but does not scale out horizontally, which is required here.

AWS Documentation Reference:

Amazon EC2 Auto Scaling

NEW QUESTION # 500

A company has multiple AWS accounts that use consolidated billing. The company runs several active high performance Amazon RDS for Oracle On-Demand DB instances for 90 days. The company's finance team has access to AWS Trusted Advisor in the consolidated billing account and all other AWS accounts.

The finance team needs to use the appropriate AWS account to access the Trusted Advisor check recommendations for RDS. The finance team must review the appropriate Trusted Advisor check to reduce RDS costs.

Which combination of steps should the finance team take to meet these requirements? (Select TWO.)

- A. Review the Trusted Advisor check for Amazon Redshift Reserved Node Optimization.
- B. Review the Trusted Advisor check for Amazon RDS Idle DB Instances.
- C. Use the Trusted Advisor recommendations from the consolidated billing account to see all RDS instance checks at the same time.
- D. Use the Trusted Advisor recommendations from the account where the RDS instances are running.
- E. Review the Trusted Advisor check for Amazon RDS Reserved Instance Optimization.

Answer: C,E

Explanation:

B: Use the Trusted Advisor recommendations from the consolidated billing account to see all RDS instance checks at the same time. The consolidated billing account has access to all the other AWS accounts that use consolidated billing. Using the Trusted Advisor recommendations from the consolidated billing account will allow the finance team to see all RDS instance checks for all accounts at the same time.

C: Review the Trusted Advisor check for Amazon RDS Reserved Instance Optimization.

The Trusted Advisor check for Amazon RDS Reserved Instance Optimization provides recommendations for purchasing reserved instances to reduce RDS costs. By reviewing this check, the finance team can identify which RDS instances can be converted to reserved instances to save costs.

NEW QUESTION # 501

A company is developing a real-time multiplier game that uses UDP for communications between client and servers in an Auto Scaling group. Spikes in demand are anticipated during the day, so the game server platform must adapt accordingly. Developers want to store gamer scores and other non-relational data in a database solution that will scale without intervention.

Which solution should a solution architect recommend?

- A. Use a Network Load Balancer for traffic distribution and Amazon DynamoDB on-demand for data storage.
- B. Use an Application Load Balancer for traffic distribution and Amazon DynamoDB global tables for data storage.
- C. Use a Network Load Balancer for traffic distribution and Amazon Aurora Global for data storage.
- D. Use Amazon Route 53 for traffic distribution and Amazon Aurora Serverless for data storage.

Answer: D
