The EC-Council Certified CISO (CCISO) Exam is a certification exam offered by the International Council of Electronic Commerce Consultants (EC-Council). 712-50 Exam is designed to test the knowledge and skills of individuals who are seeking to become a Chief Information Security Officer (CISO). The CCISO certification is recognized worldwide as a standard for measuring the knowledge and competencies of CISOs.

The EC-Council Certified CISO (CCISO) program is a certification program that recognizes the unique and specialized knowledge and experience required of top-level information security professionals. The CCISO program is designed to provide a comprehensive and rigorous curriculum that covers all aspects of information security management, from strategy and policy development, to risk management and incident response.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q316-Q321):

NEW QUESTION # 316

What are the common data hiding techniques used by criminals?

- A. Encryption, Steganography, and Changing Metadata/Timestamps
- B. Disabled Logging and admin elevation
- C. Website defacement and log manipulation
- D. Unallocated space and masking

Answer: A

NEW QUESTION # 317
Scenario: You are the CISO and have just completed your first risk assessment for your organization. You find many risks with no security controls, and some risks with inadequate controls. You assign work to your staff to create or adjust existing security controls to ensure they are adequate for risk mitigation needs. You have identified potential solutions for all of your risks that do not have security controls.
What is the NEXT step?

- A. Screen potential vendor solutions
- B. Verify that the cost of mitigation is less than the risk
- C. Create a risk metrics for all unmitigated risks
- D. Get approval from the board of directors

Answer: B

NEW QUESTION # 318
SCENARIO: A CISO has several two-factor authentication systems under review and selects the one that is most sufficient and least costly. The implementation project planning is completed and the teams are ready to implement the solution. The CISO then discovers that the product it is not as scalable as originally thought and will not fit the organization's needs.
The CISO is unsure of the information provided and orders a vendor proof of concept to validate the system's scalability. This demonstrates which of the following?

- A. An approach that allows for minimum budget impact if the solution is unsuitable
- B. A risk-based approach to determine if the solution is suitable for investment
- C. A methodology-based approach to ensure authentication mechanism functions
- D. An approach providing minimum time impact to the implementation schedules

Answer: B

Explanation:
* Validation Through PoC:
* Demonstrates due diligence by verifying claims about product functionality.
* Reduces potential risks of implementing an unsuitable solution.
* Risk-Based Methodology:
* Ensures investment decisions are based on data and evidence.
* Balances functionality, compliance, and cost considerations.
* Other Options:
* A: Budget considerations are secondary to suitability.
* B: Methodology is important, but risk evaluation is the primary focus.
* C: Time impact is a factor but not the primary driver.
* Risk Management Frameworks: Highlights the importance of validating solutions to reduce investment risks.
* Project Assurance Techniques: Proof of concept is a recognized method for verifying solution suitability.

NEW QUESTION # 319
According to ISO 27001, of the steps for establishing an Information Security Governance program listed below, which comes first?

- A. Define Information Security Policy
- B. Decide how to manage risk
- C. Define the budget of the Information Security Management System

- D. Identify threats, risks, impacts and vulnerabilities

Answer: A

Explanation:
First Step in Establishing Governance per ISO 27001:An Information Security Policy outlines the organization's commitment to security, its objectives, and the framework for managing risks. This foundational step provides direction and purpose for the ISMS (Information Security Management System).
Why This Comes First:
* Establishes the scope and objectives of the ISMS.
* Aligns information security goals with business objectives.
* Guides subsequent actions like risk assessments and resource allocation.
Why Other Options Are Incorrect:
* A. Identify threats, risks, impacts, and vulnerabilities: Occurs after policy definition to align with its framework.
* B. Decide how to manage risk: Requires a policy foundation.
* C. Define the budget: Happens after defining scope and needs.
References:ISO 27001 mandates the creation of a high-level information security policy as the first step in an ISMS lifecycle.

NEW QUESTION # 320
Which of the following are not stakeholders of IT security projects?

- A. Third party vendors
- B. Board of directors
- C. CISO
- D. Help Desk

Answer: D

Explanation:
Stakeholder Roles:
* Stakeholders are those who have a vested interest in or are affected by IT security projects.
* The Help Desk typically serves as a support function and is not directly involved in decision-making or implementation.
Why Other Options Are Valid Stakeholders:
* A. Board of directors: Responsible for approving funding and ensuring alignment with business goals.
* B. Third party vendors: Often supply solutions or services critical to IT security projects.
* C. CISO: Directly responsible for overseeing and guiding IT security initiatives.
EC-Council CISO Reference:The curriculum identifies stakeholders based on their roles in governance, risk management, and operations, excluding roles like Help Desk that serve ancillary purposes.
