Amazon AWS Certified Cloud Practitioner Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which benefits can customers gain by using AWS Marketplace? (Select TWO.)

- A. Fewer legal objections
- B. Ability to pay with credit cards

- C. No requirement for product licenses for any products
- **D. Speed of business**
- E. Free use of all services for the first hour

Answer: A,D

Explanation:

AWS Marketplace is a digital catalog that offers thousands of software products and solutions from independent software vendors (ISVs) and AWS partners. Customers can use AWS Marketplace to find, buy, and deploy software on AWS. Some of the benefits of using AWS Marketplace are:

Speed of business: You can quickly and easily discover and deploy software that meets your business needs, without having to go through lengthy procurement processes. You can also use AWS Marketplace to test and compare different solutions before making a purchase decision.

Fewer legal objections: You can benefit from standardized contract terms and conditions that are pre-negotiated between AWS and the ISVs. This reduces the time and effort required to review and approve legal agreements.

NEW QUESTION # 43

The financial benefits of using AWS are: (Select TWO.)

- A. deferred payment plans for startups.
- B. reduced operational expenditure (opex).
- **C. increased capital expenditure (capex).**
- **D. reduced Total Cost of Ownership (TCO).**
- E. business credit lines for startups.

Answer: C,D

Explanation:

Explanation

A core reason organizations adopt a cloud IT infrastructure is to save money. The traditional approach of analyzing Total Cost of Ownership no longer applies when you move to the cloud. Cloud services provide the opportunity for you to use only what you need and pay only for what you use. We refer to this new paradigm as the Total Cost of Operation. You can use Total Cost of Operation (TCO) analysis methodologies to compare the costs of owning a traditional data center with the costs of operating your environment using AWS Cloud services.

A pay-as-you-go model reduces investments in large capital expenditures. In addition, you can reduce the operating expense (OpEx) costs involved with the management and maintenance of data. This frees up budget, allowing you to quickly act on innovative initiatives that can't be easily pursued when managing CapEx.
