To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test CLF-C02 exam can make you achieve those goals and prove that you are competent. Buying our CLF-C02 practice test can help you pass the exam fluently and the learning costs you little time and energy. The questions and answers of our CLF-C02 Test Question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q483-Q488):

NEW QUESTION # 483

Which option is AWS responsible for under the AWS shared responsibility model?

- A. Hardware and infrastructure
- B. Network and firewall configuration
- C. Client-side data encryption
- D. Management of user permissions

Answer: A

Explanation:

Explanation

Hardware and infrastructure is the option that AWS is responsible for under the AWS shared responsibility model. The AWS shared responsibility model describes how AWS and customers share responsibilities for security and compliance in the cloud. AWS is responsible for security of the cloud, which means protecting the infrastructure that runs all the services offered in the AWS Cloud. This infrastructure is composed of the hardware, software, networking, and facilities that run AWS Cloud services. Customers are responsible for security in the cloud, which means taking care of the security of their own applications, data, and operating systems. This includes network and firewall configuration, client-side data encryption, management of user permissions, and more.

NEW QUESTION # 484

A company has deployed applications on Amazon EC2 instances. The company needs to assess application vulnerabilities and must identify infrastructure deployments that do not meet best practices. Which AWS service can the company use to meet these requirements?

- A. AWS Trusted Advisor
- **B. Amazon Inspector**
- C. Amazon GuardDuty
- D. AWSConfig

Answer: B

Explanation:

Amazon Inspector is a service that provides automated security assessment and management for AWS resources, such as Amazon EC2 instances. Amazon Inspector can scan applications for common vulnerabilities, such as SQL injection, cross-site scripting, and remote code execution. Amazon Inspector can also check the configuration of AWS resources against security best practices, such as the CIS Benchmarks and the AWS Security Best Practices. Amazon Inspector can help customers identify and remediate security issues, comply with security standards, and improve the security posture of their AWS environment¹². Reference: Amazon Inspector

NEW QUESTION # 485

Which of the following is a benefit of decoupling an AWS Cloud architecture?

- A. Fewer components to manage
- **B. Ability to upgrade components independently**
- C. Decreased costs
- D. Reduced latency

Answer: B

Explanation:

A benefit of decoupling an AWS Cloud architecture is the ability to upgrade components independently. Decoupling is a way of designing systems to reduce interdependencies and minimize the impact of changes. Decoupling allows components to interact with each other through well-defined interfaces, rather than direct references. This reduces the risk of failures and errors propagating across the system, and enables greater scalability, availability, and maintainability. By decoupling an AWS Cloud architecture, the user can upgrade or modify one component without affecting the other components⁵.

NEW QUESTION # 486

A customer runs an On-Demand Amazon Linux EC2 instance for 3 hours, 5 minutes, and 6 seconds. For how much time will the customer be billed?

- **A. 3 hours, 6 minutes**
- B. 3 hours, 5 minutes
- C. 4 hours
- D. 3 hours, 5 minutes, and 6 seconds

Answer: A

Explanation:

Amazon EC2 usage is calculated by either the hour or the second based on the size of the instance, operating system, and the AWS Region where the instances are launched. Pricing is per instance-hour consumed for each instance, from the time an instance is launched until it's terminated or stopped. Each partial instance-hour consumed is billed per-second for Linux instances and as a full hour for all other instance types¹. Therefore, the customer will be billed for 3 hours and 6 minutes for running an On-Demand Amazon Linux EC2 instance for 3 hours, 5 minutes, and 6 seconds. Reference: Understand Amazon EC2 instance-hours billing

NEW QUESTION # 487

Which AWS service or tool provides on-demand access to AWS security and compliance reports and AWS online agreements?

- A. AWS Trusted Advisor
- B. AWS Billing console
- **C. AWS Artifact**
- D. Amazon Inspector

Answer: C

Explanation:

AWS Artifact is the AWS service or tool that provides on-demand access to AWS security and compliance reports and AWS online agreements. AWS Trusted Advisor is a tool that provides real-time guidance to help users provision their resources following AWS best practices. Amazon Inspector is a service that helps users improve the security and compliance of their applications. AWS Billing console is a tool that helps users manage their AWS costs and usage. These concepts are explained in the AWS Cloud Practitioner Essentials course³.

NEW QUESTION # 488

.....

If you need the CLF-C02 training material to improve the pass rate, our company will be your choice. CLF-C02 training materials of our company have the information you want, we have the answers and questions. Our company is pass guarantee and money back guarantee. We also have free demo before purchasing. Compared with the paper one, you can receive the CLF-C02 Training Materials for about 10 minutes, you don't need to waste the time to wait.

CLF-C02 Valid Exam Answers: <https://www.itexamreview.com/CLF-C02-exam-dumps.html>

In previous years' examinations, the hit rate of CLF-C02 learning quiz was far ahead in the industry, Without studying with Amazon CLF-C02 actual questions, candidates fail and waste their time and money, Due to the high-quality and best-valid CLF-C02 Valid Exam Answers - AWS Certified Cloud Practitioner exam torrent, it has attracted about 29193 IT candidates to choose the exam dumps for CLF-C02 Valid Exam Answers - AWS Certified Cloud Practitioner certification, Countless CLF-C02 exam candidates have used these latest CLF-C02 exam dumps to prepare for the Amazon CLF-C02 certification exam and they all got success with brilliant results.

Forensics can be used to determine if and how a breach occurred CLF-C02 and also how to properly respond, You might also be prompted to register your software during the installation process.
