SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q20-Q25):

NEW QUESTION # 20

How is SAP's organizational change management framework connected with the SAP Activate methodology?

Note: There are 2 correct answers to this question.

- A. The SAP Activate phases build the dimensions of the organizational change management framework.
- B. Each change management dimension is assigned to a specific SAP Activate phase.
- C. Some change management activities are executed in more than one SAP Activate phase.
- D. The start of each change management activity is assigned to one specific SAP Activate phase.

Answer: C,D

Explanation:

SAP's Organizational Change Management (OCM) framework is tightly integrated with the SAP Activate methodology to ensure effective adoption of SAP S/4HANA Cloud Public Edition. The connection between OCM and SAP Activate is structured to align change management with project phases.

* Option A: Each change management dimension is assigned to a specific SAP Activate phase.

Incorrect. OCM dimensions (e.g., strategy, leadership, realization) span multiple phases, not one specific phase. The SAP S/4HANA Cloud OCM Guideline states, "OCM dimensions are applied across the SAP Activate phases, not confined to a single phase."

* Option B: The SAP Activate phases build the dimensions of the organizational change management framework. Incorrect. The OCM dimensions are predefined and independent, not built by SAP Activate phases. The SAP Activate Methodology Guideline notes, "The OCM framework's dimensions are established to support SAP Activate, but the phases do not define the dimensions."

* Option C: The start of each change management activity is assigned to one specific SAP Activate phase. Correct. Each OCM activity has a defined starting point within a specific SAP Activate phase, ensuring alignment with project milestones. The SAP S/4HANA Cloud OCM Guide explains, "Change management activities are mapped to specific SAP Activate phases, with clear starting points to ensure timely execution, such as stakeholder analysis in the Prepare phase."

* Option D: Some change management activities are executed in more than one SAP Activate phase.

Correct. Activities like communication or training span multiple phases to sustain engagement. The SAP Activate Methodology Guide confirms, "Certain change management activities, such as stakeholder engagement and communication, are executed across multiple SAP Activate phases to maintain momentum and support adoption." Extract from Official Documentation:

* SAP S/4HANA Cloud OCM Guide (SAP Help Portal, <https://help.sap.com>): "The OCM framework integrates with SAP Activate by assigning the start of each change management activity to a specific phase, while some activities, like communication, extend across multiple phases to ensure continuous engagement."

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Change management activities are aligned with SAP Activate phases, with defined starting points for each activity and some activities spanning multiple phases to support sustained adoption." Additional Context:

The integration of OCM with SAP Activate ensures that change management is proactive and iterative, aligning with the agile nature of cloud implementations. This structured yet flexible approach maximizes user adoption and project success.
