NEW QUESTION # 195

What is the role of a tunnel-group configuration of Secure Client remote-access vpn on Cisco ASA?

- A. It enables clientless webvpn.
- **B. It binds group policy and vpn together.**
- C. It configures a Secure Client group policy.
- D. It provides an IP address pool.

Answer: B

Explanation:

In a Cisco ASA Secure Client (AnyConnect) remote-access VPN, the tunnel-group configuration plays a crucial role in associating a group policy with a VPN connection. The tunnel-group acts as a container that defines authentication, authorization, and connection parameters.

The group policy specifies the permissions and restrictions for the VPN users.

The tunnel-group links this policy to the specific VPN configuration.
