

# Pass Guaranteed CS0-003 - Authoritative CompTIA Cybersecurity Analyst (CySA+) Certification Exam Certified

## CompTIA Cybersecurity Analyst (CySA+) Certification Exam Objectives

EXAM NUMBER: CS0-003

CompTIA

BONUS!!! Download part of PremiumVCEDump CS0-003 dumps for free: [https://drive.google.com/open?id=1Us-InJ2DxevFV\\_NZKUv9gxlumCs5-4zZ](https://drive.google.com/open?id=1Us-InJ2DxevFV_NZKUv9gxlumCs5-4zZ)

Users do not need to spend too much time on CS0-003 questions torrent, only need to use their time pieces for efficient learning, the cost is about 20 to 30 hours, users can easily master the test key and difficulties of questions and answers of CS0-003 prep guide, and in such a short time acquisition of accurate examination skills, better answer out of step, so as to realize high pass the qualification test, has obtained the corresponding qualification certificate. Differ as a result the CS0-003 Questions torrent geared to the needs of the user level, cultural level is uneven, have a plenty of college students in school, have a plenty of work for workers, and even some low education level of people laid off.

The CS0-003 Exam is designed to test candidates on a range of topics related to cybersecurity, including threat and vulnerability management, incident response, compliance and regulations, security operations and monitoring, and more. CS0-003 exam consists of multiple-choice questions and performance-based simulations, and candidates are required to demonstrate their ability to apply their knowledge in real-world scenarios.

CompTIA CySA+ certification is ideal for cybersecurity analysts who want to advance their careers in this field. CompTIA Cybersecurity Analyst (CySA+) Certification Exam certification is recognized by many employers as a valuable qualification and can lead to better job opportunities and higher salaries. Additionally, passing the CompTIA CySA+ certification exam can also help candidates to demonstrate their expertise in this field and increase their credibility among their peers and clients.

>> CS0-003 Certified <<

## CS0-003 Guide Questions - CS0-003 Test Torrent & CS0-003 Exam Torrent

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things. Especially for candidates to take the CS0-003 exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our CS0-003 training quiz give full consideration to this problem. And we can claim that if you study our CS0-003 study materials for 20 to 30 hours, you can pass the exam for sure.

### CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q494-Q499):

#### NEW QUESTION # 494

The developers recently deployed new code to three web servers. A daffy automated external device scan report shows server vulnerabilities that are failure items according to PCI DSS.

If the vulnerability is not valid, the analyst must take the proper steps to get the scan clean.

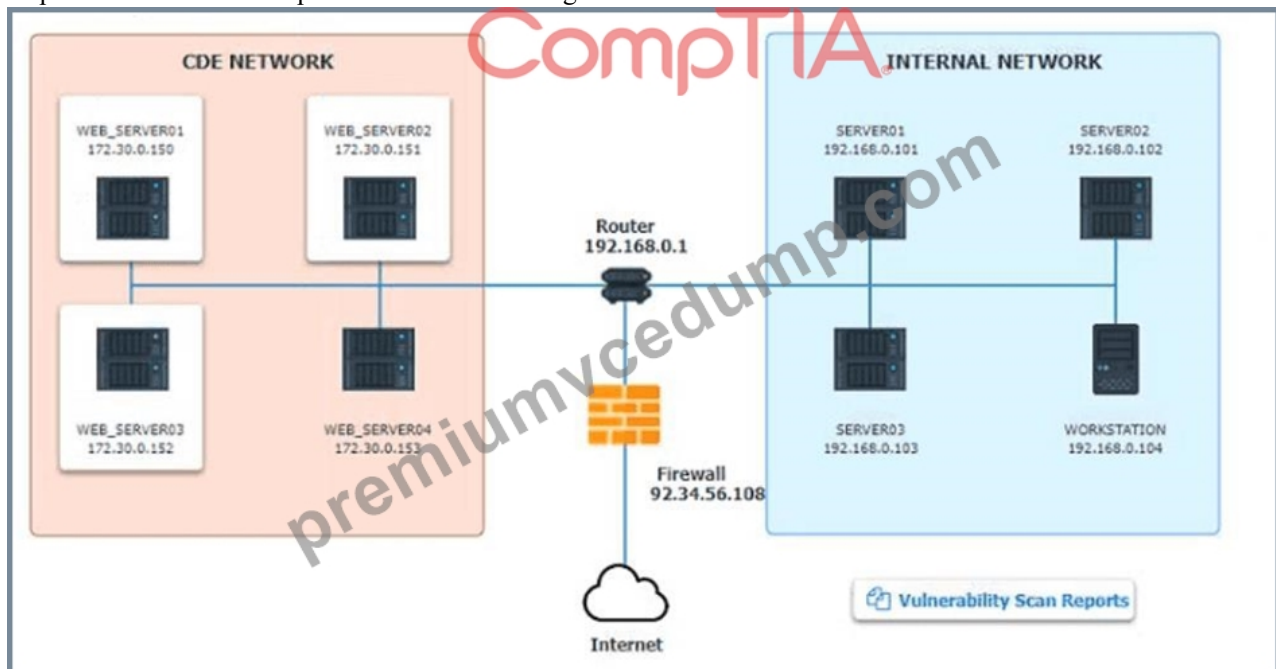

If the vulnerability is valid, the analyst must remediate the finding.

After reviewing the information provided in the network diagram, select the STEP 2 tab to complete the simulation by selecting the correct Validation Result and Remediation Action for each server listed using the drop-down options.

#### INSTRUCTIONS:

The simulation includes 2 steps.

Step1: Review the information provided in the network diagram and then move to the STEP 2 tab.

## Vulnerability Scan Report

### HIGH SEVERITY

**Title:** Cleartext Transmission of Sensitive Information

**Description:** The software transmits sensitive or securitycritical data in Cleartext in a communication channel that can be sniffed by authorized users.

**Affected Asset:** 172.30.0.15

**Risk:** Anyone can read the information by gaining access to the channel being used for communication.

**Reference:** CVE-2002-1949

### MEDIUM SEVERITY

**Title:** Sensitive Cookie in HTTPS session without 'Secure' Attribute

**Description:** The Secure attribute for sensitive cookies in HTTPS sessions is not set, which could cause the use agent to send those cookies in plaintext over HTTP session.

**Affected Asset:** 172.30.0.152

**Risk:** Session Sidejacking

**Reference:** CVE-2004-0462

### LOW SEVERITY

**Title:** Untrusted SSL/TLS Server X.509 Certificate

**Description:** The server's TLS/SSL certificate is signed by a Certification Authority that is untrusted or unknown.

**Affected Asset:** 172.30.0.153

**Risk:** May allow man-in-the-middle attackers to insert a spoofed certificate for any Distinguished Name (DN).

**Reference:** CVE-2005-1234

STEP 2: Given the Scenario, determine which remediation action is required to address the vulnerability.

## Network Diagram

### INSTRUCTIONS

STEP 2: Given the scenario, determine which remediation action is required to address the vulnerability.

System	Validate Result	Remediation Action
WEB_SERVER01	<div>▼</div> <div>False Positive False Negative True Positive True Negative</div>	<div>▼</div> <div>Encrypt Entire Session Encrypt All Session Cookies Implement Input Validation Submit as Non-Issue Employ Unique Token in Hidden Field Avoid Using Redirects and Forwards Disable HTTP Request Certificate from a Public CA Renew the Current Certificate</div>
WEB_SERVER02	<div>▼</div> <div>False Positive False Negative True Positive True Negative</div>	<div>▼</div> <div>Encrypt Entire Session Encrypt All Session Cookies Implement Input Validation Submit as Non-Issue Employ Unique Token in Hidden Field Avoid Using Redirects and Forwards Disable HTTP Request Certificate from a Public CA Renew the Current Certificate</div>
WEB_SERVER03	<div>▼</div> <div>False Positive False Negative True Positive True Negative</div>	<div>▼</div> <div>Encrypt Entire Session Encrypt All Session Cookies Implement Input Validation Submit as Non-Issue Employ Unique Token in Hidden Field Avoid Using Redirects and Forwards Disable HTTP Request Certificate from a Public CA Renew the Current Certificate</div>

Answer:

Explanation:

## Network Diagram

### INSTRUCTIONS

STEP 2: Given the scenario, determine which remediation action is required to address the vulnerability.

System	Validate Result	Remediation Action
WEB_SERVER01	<div>False Positive</div> <div>False Negative</div> <div>True Positive</div> <div>True Negative</div>	<div>Encrypt Entire Session</div> <div>Encrypt All Session Cookies</div> <div>Implement Input Validation</div> <div>Submit as Non-Issue</div> <div>Employ Unique Token in Hidden Field</div> <div>Avoid Using Redirects and Forwards</div> <div>Disable HTTP</div> <div>Request Certificate from a Public CA</div> <div>Renew the Current Certificate</div>
WEB_SERVER02	<div>False Positive</div> <div>False Negative</div> <div>True Positive</div> <div>True Negative</div>	<div>Encrypt Entire Session</div> <div>Encrypt All Session Cookies</div> <div>Implement Input Validation</div> <div>Submit as Non-Issue</div> <div>Employ Unique Token in Hidden Field</div> <div>Avoid Using Redirects and Forwards</div> <div>Disable HTTP</div> <div>Request Certificate from a Public CA</div> <div>Renew the Current Certificate</div>
WEB_SERVER03	<div>False Positive</div> <div>False Negative</div> <div>True Positive</div> <div>True Negative</div>	<div>Encrypt Entire Session</div> <div>Encrypt All Session Cookies</div> <div>Implement Input Validation</div> <div>Submit as Non-Issue</div> <div>Employ Unique Token in Hidden Field</div> <div>Avoid Using Redirects and Forwards</div> <div>Disable HTTP</div> <div>Request Certificate from a Public CA</div> <div>Renew the Current Certificate</div>

### INSTRUCTIONS

STEP 2: Given the scenario, determine which remediation action is required to address the vulnerability.

System	Validate Result	Remediation Action
WEB_SERVER01	True Positive	Encrypt Entire Session
WEB_SERVER02	True Positive	Encrypt All Session Cookies
WEB_SERVER03	True Positive	Request Certificate from a Public CA

### NEW QUESTION # 495

A security analyst needs to identify a computer based on the following requirements to be mitigated:

- \* The attack method is network-based with low complexity.
- \* No privileges or user action is needed.
- \* The confidentiality and availability level is high, with a low integrity level.

Given the following CVSS 3.1 output:

- \* Computer1: CVSS3.1/AV:N/AC:L/PR:N/UI:R/S:U/C:H/I:L/A:H
- \* Computer2: CVSS3.1/AV:L/AC:L/PR:N/UI:N/S:U/C:H/I:L/A:H
- \* Computer3: CVSS3.1/AV:N/AC:H/PR:N/UI:N/S:U/C:H/I:L/A:H
- \* Computer4: CVSS3.1/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:L/A:H

Which of the following machines should the analyst mitigate?

- A. Computer3
- B. Computer1
- C. Computer2
- **D. Computer4**

**Answer: D**

Explanation:

Comprehensive Detailed Explanation: To match the mitigation criteria, we analyze each machine's CVSS (Common Vulnerability Scoring System) attributes:

- \* Attack Vector (AV): N for network (matches the requirement of network-based attack).
- \* Attack Complexity (AC): L for low (meets the requirement for low complexity).
- \* Privileges Required (PR): N for none (indicating no privileges are needed).
- \* User Interaction (UI): N for none (matches the requirement that no user action is needed).
- \* Confidentiality (C), Integrity (I), and Availability (A): Requires high confidentiality and availability with low integrity.

From these criteria:

- \* Computer1 requires user interaction (UI:R), which disqualifies it.
- \* Computer2 has a local attack vector (AV:L), which disqualifies it for a network-based attack.
- \* Computer3 has a high attack complexity (AC:H), which does not meet the low complexity requirement.
- \* Computer4 meets all criteria: network attack vector, low complexity, no privileges, no user interaction, and appropriate confidentiality, integrity, and availability levels.

Thus, Computer4 is the correct answer.

References:

- \* NIST NVD (National Vulnerability Database): CVSS vector standards.
- \* CVSS 3.1 User Guide: Explanation of each CVSS metric and its application in vulnerability prioritization.

#### NEW QUESTION # 496

After an upgrade to a new EDR, a security analyst received reports that several endpoints were not communicating with the SaaS provider to receive critical threat signatures. To comply with the incident response playbook, the security analyst was required to validate connectivity to ensure communications. The security analyst ran a command that provided the following output:

ComputerName: comptia007

RemotePort: 443

InterfaceAlias: Ethernet 3

TcpTestSucceeded: False

Which of the following did the analyst use to ensure connectivity?

- A. nmap
- **B. tnc**
- C. tracert
- D. ping

**Answer: B**

Explanation:

The command output shown indicates that the analyst used a TCP connection test to check if communication on port 443 (usually HTTPS) succeeded.

tnc (Test-NetConnection in PowerShell): This command in PowerShell is specifically designed to test connectivity to a specified port and IP address. The output (TcpTestSucceeded: False) is characteristic of the tnc command.

#### NEW QUESTION # 497

An analyst suspects cleartext passwords are being sent over the network. Which of the following tools would best support the analyst's investigation?

- A. OpenVAS
- B. Maltego
- **C. Wireshark**
- D. Angry IP Scanner

**Answer: C**

Explanation:

Wireshark is a packet capture and analysis tool that allows analysts to inspect network traffic and detect cleartext credentials sent over protocols like HTTP, FTP, and Telnet.

\* Option A (OpenVAS) is a vulnerability scanner, not a network analysis tool.

\* Option B (Angry IP Scanner) identifies active hosts, but does not analyze packet contents.

\* Option D (Maltego) is used for OSINT and network reconnaissance, not packet inspection.

Thus, C (Wireshark) is the correct answer, as it captures and analyzes network packets to identify unencrypted passwords.

### NEW QUESTION # 498

An employee is no longer able to log in to an account after updating a browser. The employee usually has several tabs open in the browser. Which of the following attacks was most likely performed?

- A. LFI
- B. RFI
- C. XSS
- **D. CSRF**

Answer: D

### NEW QUESTION # 499

.....

If you are a workman and you want to pass CS0-003 exam quickly, PremiumVCEDump will be your best choice. CS0-003 dumps and answers from our PremiumVCEDump site are all created by the IT talents with more than 10-year experience in IT certification. It can not only save your time, but also help you pass the CS0-003 Exam easily.
