ECCouncil Certified Cybersecurity Technician Sample Questions (Q95-Q100):

NEW QUESTION # 95

A major metropolitan municipal corporation had deployed an extensive IoT network for managing various facilities in the city. A recent cyber attack has paralyzed the city's vital services, bringing them to a complete halt. The Security Operations Center (SOC) has captured the network traffic during the attack and stored it as IoT_capture.pcapng in the Documents folder of the Attacker Machine-1. Analyze the capture file and identify the command that was sent to the IoT devices over the network.
(Practical Question)

- A. Woodland_Blaze_Warning999
- B. Woodland_Blaze_Warninggil
- C. Forest_Fire_Alert444

- D. Nature_Blaze_Warning555

Answer: C

NEW QUESTION # 96

SecuraCorp, a leading financial institution, is worried about zero-day vulnerabilities. With a sprawling network infrastructure and multiple transaction points, it needs a system that does not solely rely on signatures but can effectively identify suspicious patterns based on the behavior in the network. Which type of IDS/IPS should SecuraCorp primarily deploy for its needs?

- A. Anomaly-based IDS
- B. Signature-based IDS
- C. Network-based IDS
- D. Host-based IDS

Answer: A

NEW QUESTION # 97

An IoT device that has been placed in a hospital for safety measures, it has sent an alert command to the server. The network traffic has been captured and stored in the Documents folder of the Attacker Machine-1. Analyze the IoTdeviceTraffic.pcapng file and select the appropriate command that was sent by the IoT device over the network.

- A. Low_Tempe
- B. Temp_High
- C. High_Tempe
- D. Tempe_Low

Answer: B

Explanation:

Temp_High is the command that was sent by the IoT device over the network in the above scenario. An IoT (Internet of Things) device is a device that can connect to the internet and communicate with other devices or systems over a network. An IoT device can send or receive commands or data for various purposes, such as monitoring, controlling, or automating processes. To analyze the IoT device traffic file and determine the command that was sent by the IoT device over the network, one has to follow these steps:

Navigate to the Documents folder of Attacker-1 machine.

Double-click on IoTdeviceTraffic.pcapng file to open it with Wireshark.

Click on Analyze menu and select Display Filters option.

Enter udp.port == 5000 as filter expression and click on Apply button.

Observe the packets filtered by the expression.

Click on packet number 4 and expand User Datagram Protocol section in packet details pane.

Observe the data field under User Datagram Protocol section.

The data field under User Datagram Protocol section is 54:65:6d:70:5f:48:69:67:68 , which is hexadecimal representation of Temp_High , which is the command that was sent by the IoT device over the network.

NEW QUESTION # 98

Shawn, a forensic officer, was appointed to investigate a crime scene that had occurred at a coffee shop. As a part of investigation, Shawn collected the mobile device from the victim, which may contain potential evidence to identify the culprits.

Which of the following points must Shawn follow while preserving the digital evidence? (Choose three.)

- A. Make sure that the device is charged
- B. Do not leave the device as it is if it is ON
- C. Never record the screen display of the device
- D. Turn the device ON if it is OFF

Answer: A,B,D

NEW QUESTION # 99

A web application, www.moviescope.com, was found to be prone to SQL injection attacks. You are tasked to exploit the web application and fetch the user data. Identify the contact number (Contact) of a user, Steve, in the moviescope database. Note: You already have an account on the web application, and your credentials are sam/test. (Practical Question)

- A. 1-202-509-8421
- B. 1-202-509-7432
- **C. 1-202-509-7316**
- D. 01-202-509-7364

Answer: C

Explanation:

* SQL Injection Basics:

* SQL injection is a code injection technique that exploits vulnerabilities in an application's software by inserting malicious SQL statements into an input field for execution.

NEW QUESTION # 100

.....
