FCP_FMG_AD-7.4 Exam Quick Prep | FCP_FMG_AD-7.4 Exam Cram Pdf

In order to help you save more time, we will transfer FCP_FMG_AD-7.4 test guide to you within 10 minutes online after your payment and guarantee that you can study these FCP_FMG_AD-7.4 training materials as soon as possible to avoid time waste. We believe that time is the most valuable things in the world. This is why we are dedicated to improve your study efficiency and production. Here are some advantages of our FCP_FMG_AD-7.4 study question and we would appreciate that you can have a look to our FCP_FMG_AD-7.4 questions.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q33-

Q38):

NEW QUESTION # 33

Push updates are failing on a FortiGate device that is located behind a NAT device. Which two settings should the administrator check? (Choose two.)

- A. That the external IP address on the NAT device is set to DHCP and configured with the virtual IP
- B. That the NAT device IP address and correct ports are configured on FortiManager
- C. That the override server IP address is set on FortiManager and the NAT device
- D. That the virtual IP address and correct ports are set on the NAT device

Answer: C,D

Explanation:

When push updates are failing on a FortiGate device behind a NAT device, the administrator should check:

- * A. That the override server IP address is set on FortiManager and the NAT device.
- * The override server IP should be configured to ensure that FortiManager uses the correct IP address that can traverse the NAT to reach the FortiGate device.
- * D. That the virtual IP address and correct ports are set on the NAT device.
- * The NAT device must have the correct virtual IP (VIP) configured to map the FortiGate's internal IP to an external address, along with the correct ports needed for communication.

Options B and C are incorrect because:

- * B suggests setting the external IP on the NAT device to DHCP, which is not relevant to solving the push update issue.
- * C implies configuring NAT device IP and ports on FortiManager, which is less likely needed compared to configuring the correct VIP and ports.

FortiManager References:

- * Refer to FortiManager 7.4 Administrator Guide: Device Management and NAT Configuration.

NEW QUESTION # 34

An administrator enabled workspace mode and now wants to delete an address object that is currently referenced in a firewall policy. Which two results can the administrator expect? (Choose two.)

- A. FortiManager will disable the status of the address object until the changes are installed.
- B. FortiManager will replace the deleted address object with the none address object in the referenced firewall policy.
- C. FortiManager will temporarily change the status of the referenced firewall policy to disabled.
- D. FortiManager will not allow the administrator to delete a referenced address object until they lock the ADOM.

Answer: B,D

Explanation:

When operating in workspace mode on FortiManager 7.4, the administrator must understand how object references and deletions work:

- * Option C- "FortiManager will not allow the administrator to delete a referenced address object until they lock the ADOM": In workspace mode, all changes are managed within an Administrative Domain (ADOM) scope. When an object (like an address object) is referenced in a policy, FortiManager prevents its deletion to maintain configuration integrity. The ADOM must be locked by the administrator to make changes to any referenced objects. This locking mechanism ensures that no unintended deletions or changes occur that could disrupt the policies or configuration.
- * FortiManager Reference: "In workspace mode, changes to objects or policies require the ADOM to be locked. If an object is referenced, you must lock the ADOM before deleting or modifying the object." (FortiManager 7.4 Administration Guide, Section on Workspace Mode and ADOM Management)
- * Option D- "FortiManager will replace the deleted address object with the none address object in the referenced firewall policy": If the administrator attempts to delete an address object that is currently referenced by a firewall policy, FortiManager will replace the deleted object with the 'none' address object. This is done to maintain the policy structure and avoid policy corruption due to a missing reference. This behavior ensures that the firewall policy remains syntactically correct, even though the specific address object is no longer in use.
- * FortiManager Reference: "When a referenced object is deleted, FortiManager will replace it with a 'none' object in the policy. This behavior is to ensure the integrity and continuity of the policy configurations." (FortiManager 7.4 Administration Guide, Object Management and Policy Handling in Workspace Mode)

NEW QUESTION # 35

Refer to the exhibit showing a Download Import Report. Why is it failing to import firewall policy ID 1?

```
start to import config from device(Remote-FortiGate) vdom(root) to
vdom(root), package(Remote-FortiGate_root)

'firewall address',SKIPPED,"(name=all, oid=2309_DUPLICATE)"

'firewall address',FAIL,"(name=REMOTE_SUBNET, oid=2311,
reason=interface((firewall address:REMOTE_SUBNET) any<-port6) binding
fail)"

'firewall policy',FAIL,"(name=1, oid=3070, reason=interface(interface binding
contradiction. detail: (firewall address:REMOTE_SUBNET) any<-port6) binding
fail)"
```

- A. Policy ID 1 for this managed FortiGate already exists on FortiManager in the policy package named Remote-FortiGate.
- B. Policy ID 1 is configured from the interface any to port6. FortiManager rejects the request to import this policy because the any interface does not exist on FortiManager.
- C. The address object used in policy ID 1 already exists in the ADOM database with any as the interface association, and conflicts with the address object interface association locally on FortiGate.
- **D. Policy ID 1 does not have the ADOM Interface mapping configured on FortiManager.**

Answer: D

Explanation:

When FMG is managing a FAZ, you cannot switch to advanced mode. And it's only in advanced mode Vdoms of the same Fortigate can be assigned to different ADOMs.

NEW QUESTION # 36

An administrator configures a new OSPF area on FortiManager and has not yet pushed the changes to the managed FortiGate device. In which database will the configuration be saved?

- **A. Device-level database**
- B. ADOM-level database
- C. Configuration-level database
- D. Revision history database

Answer: A

NEW QUESTION # 37

Refer to the exhibit. A service provider administrator has assigned a global policy package to a managed customer ADOM named My_ADOM, which has four policy packages. The customer administrator has access only to My_ADOM.

How can the customer or service provider administrators remove the global header policy from the policy package named Shared_Package?

- A. The customer administrator can unassign the policy by locking My_ADOM.
- B. The customer administrator can unassign the global policy from My_ADOM.
- C. The service provider administrator can unassign the policy from the global ADOM.
- D. The service provider administrator can unassign the global policy from My_ADOM.

Answer: C

NEW QUESTION # 38

.....

When asked about the opinion about the exam, most people may think that it's not a quite easy thing, and some people even may think that it's a difficult thing. FCP_FMG_AD-7.4 learning materials of us include the questions and answers, which will show you the right answers after you finish practicing. FCP_FMG_AD-7.4 Online Test engine can record the test history and have a performance review, with this function you can have a review of what you have learned.

FCP_FMG_AD-7.4 Exam Quick Prep: https://www.exams4sures.com/Fortinet/FCP_FMG_AD-7.4-practice-exam-dumps.html

In order to meet the needs of each candidate, the team of IT experts in Exams4sures FCP_FMG_AD-7.4 Exam Quick Prep are using their experience and knowledge to improve the quality of exam training materials constantly. So you can trust us on the accuracy of the FCP_FMG_AD-7.4 practice materials, and there are 98 to 100 percent of people pass the test by our Fortinet FCP_FMG_AD-7.4 latest torrent, which convincingly demonstrate the usefulness of them. So these FCP_FMG_AD-7.4 latest dumps will be a turning point in your life.

I pointed out that neither of us knew a thing about Download FCP_FMG_AD-7.4 Pdf Java, but he said, So what, Introducing Google Chromecast, In order to meet the needs of each candidate, the team of IT experts in Exams4sures are FCP_FMG_AD-7.4 using their experience and knowledge to improve the quality of exam training materials constantly.

Prepare For Fortinet FCP_FMG_AD-7.4 Exam Offline

So you can trust us on the accuracy of the FCP_FMG_AD-7.4 practice materials, and there are 98 to 100 percent of people pass the test by our Fortinet FCP_FMG_AD-7.4 latest torrent, which convincingly demonstrate the usefulness of them.

So these FCP_FMG_AD-7.4 latest dumps will be a turning point in your life, Free 3 months updates for FCP_FMG_AD-7.4 practice software, The interface of the FCP_FMG_AD-7.4 software mock test is extremely easy to understand and you won't face any issues while using this specific software.
