

Pass Guaranteed High Pass-Rate Oracle - 1Z0-1109-25 - Oracle Cloud Infrastructure 2025 DevOps Professional New Question

2025 Latest PracticeVCE 1Z0-1109-25 PDF Dumps and 1Z0-1109-25 Exam Engine Free Share: <https://drive.google.com/open?id=1vbNRRjluSQfGrBamLC6C9QK34s8zXGfN>

PracticeVCE Oracle Cloud Infrastructure 2025 DevOps Professional (1Z0-1109-25) practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The Oracle 1Z0-1109-25 Exam Dumps are similar to real exam questions. Our Oracle Cloud Infrastructure 2025 DevOps Professional (1Z0-1109-25) practice test software is suitable for computer users with a Windows operating system.

Oracle 1Z0-1109-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Understand DevOps Principles and Effectively Work with Containerization Services: This section of the exam measures the skills of DevOps Engineers and Cloud Architects in applying DevOps methodologies and containerization practices. It covers implementing a microservices architecture, creating Docker containers, and managing Oracle Cloud Infrastructure Registry (OCIR) and Container Instances to streamline application deployment and scalability.
Topic 2	• Configuring and Managing Continuous Integration and Continuous Delivery (CI/CD): This section tests the knowledge of CI/CD Engineers and Automation Specialists in automating the software lifecycle using OCI DevOps Service. It includes managing source code repositories, configuring build deployment pipelines, and creating artifacts for automated deployments across environments.
Topic 3	• Managing Containers Using Container Orchestration Engine: This part assesses the abilities of Kubernetes Administrators and Containerization Specialists in managing Oracle Container Engine for Kubernetes (OKE). It covers cluster creation, scaling, upgrades, networking, storage, and security configurations to optimize containerized applications in OCI environments.

Topic 4	Using Code and Templates for Provisioning and Configuring Infrastructure: This domain evaluates the expertise of DevOps Engineers and Infrastructure Architects in deploying infrastructure using Infrastructure as Code (IaC) tools like Terraform. It focuses on automating resource provisioning with OCI Resource Manager to ensure consistent and efficient infrastructure setups.

1Z0-1109-25 Exam Format | 1Z0-1109-25 Latest Exam Pdf

Our 1Z0-1109-25 Study Materials include 3 versions: the PDF, PC and APP online. You can understand each version's merits and using method in detail before you decide to buy our 1Z0-1109-25 study materials. For instance, PC version of our 1Z0-1109-25 training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and can be practiced and learned at any time.

Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q22-Q27):

NEW QUESTION # 22

Why is it important to extract output artifacts from the Oracle Cloud Infrastructure (OCI) DevOps build pipeline and store them in an Artifact Registry repository?

- A. All artifacts are permanently stored in the build pipeline. Extracting just the ones required for deployment tells the deployment pipeline which artifacts to use.
- B. Output artifacts aren't permanent. If they are to be used in the Deliver Artifacts stage, they need to be exported as output artifacts to a registry.
- C. Storing build artifacts in registries helps the deployment pipeline differentiate output artifacts created by the build pipeline from artifacts copied from a Git repository.
- D. Deliver Artifacts is a required stage of the build pipeline, and the entire pipeline won't work if it is not included in order to extract artifacts after the Managed Build stage.

Answer: B

Explanation:

In OCI DevOps Build Pipeline, the output artifacts generated during the build are temporary and will be discarded unless explicitly stored in a persistent location. By extracting and storing these artifacts in an Artifact Registry (such as OCI Artifact Registry or OCI Container Registry), you ensure that they are available for subsequent stages, such as deployment.

Storing artifacts in a registry provides a persistent location where the deployment pipeline can access them, ensuring the artifacts are available for reliable deployment.

NEW QUESTION # 23

How can system administrators ensure that only signed images from Oracle Cloud Infrastructure Registry are deployed to a Container Engine for Kubernetes cluster?

- A. By manually inspecting each image before deployment
- B. By configuring an image verification policy for the cluster
- C. By disabling access to the Container Engine for Kubernetes cluster
- D. By encrypting the images using a custom encryption algorithm

Answer: B

Explanation:

Image verification policies are used to ensure that only trusted and signed images are deployed to an Oracle Kubernetes Engine (OKE) cluster. By configuring such policies, administrators can enforce that images must be signed and come from trusted sources, such as the Oracle Cloud Infrastructure Registry.

NEW QUESTION # 24

How do OCI DevOps Deployment Pipelines reduce risk and complexity of production applications?

- A. By eliminating downtime of production applications
- B. By working with existing Git repositories and CI systems
- **C. By reducing change-driven errors introduced by manual deployments**
- D. By scaling builds with service-managed build runners

Answer: C

Explanation:

OCI DevOps Deployment Pipelines automate the process of deploying applications to production environments. By using automated, repeatable deployment processes, they help reduce the risk of change-driven errors, which are often introduced during manual deployments. This automation reduces human errors and ensures consistency across environments, thus minimizing complexity and risk in production.

NEW QUESTION # 25

As a DevOps engineer working on managing clusters on the OCI platform for your organization, which statement is true about managing cluster add-ons in OCI OKE Cluster?

- A. When creating a new cluster, essential cluster add-ons are set to manually update.
- B. When enabling a cluster add-on, you cannot configure the add-on by specifying one or more key/value pairs to pass as arguments to the cluster add-on.
- **C. When creating a new cluster, essential cluster add-ons cannot be disabled.**
- D. When you disable a cluster add-on using the console, the add-on is completely removed from the cluster.

Answer: C

Explanation:

Essential cluster add-ons are required for the basic functioning of the Kubernetes cluster and cannot be disabled during cluster creation. These add-ons provide necessary features such as core DNS, networking, and other critical functionalities for the cluster's operation.

NEW QUESTION # 26

An operations team is exploring the use of OCI Container Instances to run their container workloads without managing servers. Which of the following statements is false regarding the use of Container Instances?

- **A. Container Instances require the team to perform provisioning, patching, and ongoing management of servers.**
- B. The underlying infrastructure for Container Instances is fully managed and hardened by OCI, ensuring reliability and security.
- C. Billing for Container Instances is based on the allocated CPU and memory resources for each container instance.
- D. Container Instances provide a serverless compute service for running containers, eliminating the need for server management.

Answer: A

Explanation:

OCI Container Instances are a serverless compute service that allows you to run containerized workloads without managing the underlying infrastructure. Oracle Cloud Infrastructure (OCI) manages provisioning, patching, and all the ongoing server management tasks, providing a fully managed environment.

NEW QUESTION # 27

.....

There is not much disparity among these versions of 1Z0-1109-25 simulating practice, but they do help to beef up your capacity and speed up your review process to master more knowledge about the 1Z0-1109-25 exam, so the review process will be unencumbered. Though the content of these three versions is the same, the displays of them are different. And you can try our 1Z0-1109-25 Study Materials by free downloading the demos to know which one is your favorite.
